1. About this manual

The Admin Panel lets you change everything visitors see on the website, and everything that happens behind the scenes (bookings, payments, offers, partners, backups), by clicking and typing. You never need to open or change any code.

How to use this manual:

- Part 2 shows how to sign in and what the screen looks like.
- Part 3 is a quick "I want to..." table. Start there when you know the job but not the place.
- Part 4 is the **control map**: every part of the public website and the exact place where you change it.
- Parts 5 to 12 explain each area step by step: what you can add, edit, hide, reorder and delete, and what you cannot.
- Part 13 gives daily, weekly and monthly routines. Part 14 lists common problems.

> *Tip: nearly every text has an English box and a Hindi box. Fill both, so the site looks complete in both languages. If you leave a box empty, the standard wording is shown instead.*

2. Signing in and finding your way

2.1 Sign in

1. Open the website, choose Login, then "Super Admin Login".
2. Enter the admin email and password, then press the sign-in button.
3. Open the account menu and choose Admin (or add /admin to the website address).

Safety rules:

- Use a strong password nobody else knows, and change it now and then.
- Never share the admin password or the API keys.
- Press **Log out** when you finish, especially on a shared computer or phone.
- After five wrong password attempts the account is locked for 15 minutes. This is normal protection.

2.2 The Admin Panel layout

On a computer the menu is on the left. On a phone, press the "Admin menu" button. Menu groups:

Group	What it contains
Overview	Dashboard
Bookings and money	Orders, Services and plans, Other services, Appointment slots, Promo codes, Enquiries
People	Users, Associates, Customer files
Website	Website settings (everything on the public site), Banners, Scrolling notice, Pages and legal, Articles, Gallery, Reviews, FAQ, Founder, Certificates, Translations, Chatbot
System	Business settings, API keys and Analytics, Backups

The dark strip at the top shows who is signed in, a link to the public website ("Public Site") and the Log out button.

2.3 How saving works

- Every screen has a Save button. Nothing changes on the website until you press it.
- After saving, the website changes at once. If you still see the old version, refresh the page (Ctrl and F5).
- A green message confirms a save. A red message explains what to correct. Nothing is lost when you see a red message.
- Items can usually be **switched off** (hidden) instead of deleted. Hide first; delete only when you are sure.

3. Quick guide: "I want to..."

I want to...	Go to
See today's orders and money	Dashboard
Confirm that a customer has paid	Orders
Tell a customer their Kundli is ready	Orders (change status), then Customer files (upload the report)
Change a price or add a plan	Services and plans
Open times for consultation calls	Appointment slots
Make a discount code	Promo codes
Answer a message from the Contact form	Enquiries
Approve an associate or pay commission	Associates
Change the big heading or picture on the home page	Website settings, Home page: banner (hero)
Change any heading or sentence on the home page	Website settings, the four "Home page" text screens
Hide a home page block (for example FAQ)	Website settings, Home page: show or hide sections
Add, remove or rename menu items	Website settings, Main menu links
Add Facebook, Instagram, YouTube, WhatsApp icons	Website settings, Social media
Change what the thin top bar shows	Website settings, Top bar
Hide or change the floating call, WhatsApp, AI, chat buttons	Website settings, Floating buttons
Change the colours of the website	Website settings, Colours of the website
Change or switch off the opening screen	Website settings, Opening screen
Put a clickable link inside any text	Press Add link above the text box (see part 8)
Put a notice at the top or bottom	Scrolling notice, or Website settings, Home page
Upload GST, MSME, Trademark, ISO certificates	Certificates
Change the phone, address, bank, UPI, GST	Business settings
Switch Kundli, Matching or Panchang on or off	Website settings, Panchang, Kundli and Matching tools
Add the Google Analytics ID	API keys and Analytics

I want to...	Go to
Make Google show the site properly	Website settings, SEO (see 12.2)
Take or download a backup	Backups

4. Control map: where every part of the website is changed

This table lists what a visitor sees and the screen where you control it. Anything not listed is automatic (for example the date and Panchang line).

4.1 Home page

Part of the home page	Control
Top thin dark bar (time, date, Panchang line, phone, icons, buttons)	Website settings, Top bar
Logo in the header	Website settings, Logo
Main menu links	Website settings, Main menu links
Yellow strip under the header	Website settings, Home page (Highlight strip), and Banners
Large banner pictures, heading, text, two buttons	Website settings, Home page: banner (hero), and Hero content
Three cards under the banner	Website settings, Home page: three cards and About
About block (picture, heading, three points, button)	Website settings, Home page: three cards and About
Services grid (cards with pictures)	Services and plans, and Other services
Janam Kundli, Prashn Kundli, Matching plan boxes and prices	Services and plans
Connected services (two big boxes)	Other services (the first two with a website address)
Free tools block	Website settings, Panchang, Kundli and Matching tools
Kundli request form heading and text	Website settings, Home page: request form, gallery, booking and payment
Gallery pictures	Gallery
Booking steps and payment boxes	Website settings, Home page: request form, gallery, booking and payment
Reviews	Reviews
FAQ	FAQ
Contact block	Website settings, Home page: reviews, FAQ and contact block; phone from Business settings
Scrolling strip at the bottom	Scrolling notice
Floating round buttons	Website settings, Floating buttons
Footer text, links, icons	Website settings: General, Business, Legal pages, Extra footer links, Social media
Opening screen	Website settings, Opening screen
Colours	Website settings, Colours of the website

4.2 Other pages

Page	Control
Services and service detail	Services and plans (title, text blocks, pictures, video, links, plans, prices)
Other services	Other services
About	Website settings, Content (short text and mission), and Pages and legal
Founder	Founder
Gallery	Gallery
Blog	Articles
Offers	Promo codes
Certificates	Certificates
FAQ	FAQ
Contact	Business settings (phone, map), Website settings, Contact (hours, note)
Privacy, Terms, Refund and other legal pages	Pages and legal
Panchang, Kundli, Matching	Website settings, Panchang, Kundli and Matching tools (on or off, tool address)
App page	Website settings, Mobile app, and Business settings
Chat assistant answers	Chatbot
Fixed words such as button names	Translations

5. Home page: step by step

All home page controls are inside **Website settings**. The left list is grouped; the first group is "Home page".

5.1 Banner (hero)

1. Open Website settings, then "Home page: banner (hero)".
2. **Banner picture 1** and **picture 2**: press Upload and choose a photo (landscape pictures look best), or paste a picture address. Picture 2 fades in and out slowly.
3. **Darkness over the pictures**: 0 shows the picture as it is, 90 makes it very dark. Around 60 keeps white text easy to read.
4. **First button text** and **where it goes**: for example "Book Your Consultation" going to /services. The place can be a page of the site (/services), a full web address (https://...), a phone link (tel: +919827991224) or a mail link.
5. **Second button**: same. Switch off "Show the second button" to remove it.
6. Press Save.

The small heading, big heading and the paragraph of the banner are in Website settings, "Hero content". Leave a box empty to use the standard wording. The paragraph accepts links (see part 8).

5.2 Show or hide sections

Website settings, "Home page: show or hide sections". Each block of the home page has its own switch: three cards, About, services grid, plans, connected services, free tools, request form, gallery, booking steps, payment, reviews, FAQ and contact. Hidden blocks are saved and can be switched on again at any time.

5.3 Headings and sentences

Four screens hold the wording of the home page. In each, every box has an English and a Hindi version. Boxes that show an **Add link** button accept links and bold words.

Screen	What it controls
Home page: three cards and About	The three cards' titles and texts; the About small heading, heading, text, picture, three points and button (the button can go to any link; empty means WhatsApp)
Home page: services, plans and tools headings	Headings and texts above the services, the three plan sections, connected services and free tools; the "Consult Now" and "Select Plan" words
Home page: request form, gallery, booking and payment	Request form heading and side panel; gallery heading; booking heading, the four steps and the button; payment heading, the left box steps (one per line) and the right box text
Home page: reviews, FAQ and contact block	Headings for reviews and FAQ; contact heading, text, the "How we can help" box with three points, and the button

How to change a sentence: open the screen, click the box, type, press Save. To go back to the standard wording, clear the box and save.

5.4 Highlight strip

Website settings, "Home page". The "Highlight strip" in English and Hindi shows a one-line message under the banner (for example an offer or a festival notice). Leave both empty to hide it. It accepts links.

6. Menus, links and buttons

6.1 Main menu

Website settings, "Main menu links".

1. Press **Add link**. Type the name in English and Hindi, and where it goes (for example /services, https://example.com or tel:+91...).
2. Use the **Show** tick to hide a link without deleting it.
3. Use the up and down arrows to change the order. Use the cross to remove a link.
4. Press Save.

If the list is empty, the standard menu (Home, About, Services, Kundli, Prashn Kundli, Matching, Booking, Gallery, Contact) is used. "Go back to the standard menu" clears your list.

6.2 Extra footer links

"Extra footer links" works the same way. The links appear in a "More links" row above the copyright line. Good for a WhatsApp group, a YouTube video or another website.

6.3 Social media

1. Open "Social media". Each platform has a row with a name, a link and Active or Hide.
2. Paste the full address of your page (for example https://www.instagram.com/yourpage). For WhatsApp you can type the mobile number.
3. Choose Active to show it, Hide to keep it off.
4. Use the small arrow to test the link, then Save.

Active icons appear in the top bar, the home banner, the Contact page and the footer. No keys are needed.

6.4 Top bar

"Top bar" has a switch for every part: time, seconds, day, date, paksha, tithi (with end time), Hindu month, Vikram Samvat, Panchang Calendar button, phone, social icons, Sign in and Register links, and the whole bar. The Panchang values are calculated automatically every day.

6.5 Floating buttons

"Floating buttons" controls the four round buttons:

- Switch Call, WhatsApp, Ask AI and Chat on or off one by one, and the "Ask a question" bar.
- **Number the call button dials** and **WhatsApp number**: leave empty to use the main phone from Business settings.
- **First WhatsApp message**: the sentence that is already typed when a visitor opens WhatsApp (English and Hindi).

7. Look of the site

7.1 Colours

"Colours of the website": five colour pickers (main button, orange accent, dark brown, gold, page background). Press a picker, choose a colour, Save. Choose a **dark** colour for "Dark brown", because white text is written on it. "Use standard colour" returns to the original. The whole website, including the admin, changes at once.

7.2 Logo and icon

"Logo": upload a logo picture and a small browser-tab icon. Empty means the standard logo.

7.3 Opening screen

"Opening screen": switch it on or off, choose how many seconds it stays (1 to 8), and change the name, the line below it, the small capital line and the symbol in the circle. It shows once per visit, on the home page only.

7.4 General texts

"General": tagline, footer note and copyright line. The footer note accepts links.

8. Writing text with links (hyperlinks)

Every large text box in the Admin Panel has an **Add link** button. This is how to use it:

1. Type your sentence, for example: Call us today for a consultation.
2. Select the words that should be clickable (for example "Call us today") with the mouse.
3. Press **Add link**. A small box opens with the selected words filled in.
4. In "Where it goes" type the address:
   - another page of your site: /services or /contact
   - a website: https://www.example.com
   - a phone number: tel:+919827991224
   - an email: mailto:name@example.com
5. Press **Insert link**. In the box it appears as [Call us today](tel:+919827991224). That is normal; visitors see a clickable link.

More ways to format:

You type	Visitors see
[Our YouTube channel](https://youtube.com/@name)	a clickable link
important	bold text
a blank line	a new paragraph

For safety, only web, phone, mail and in-site addresses become links. Anything else stays as plain text.

You can also add link boxes, pictures and videos inside **Services**, **Pages**, **Articles**, **Founder** and similar screens using "content blocks": add a text, image, YouTube or link block and move it up or down.

9. Content screens

9.1 Services and plans

Menu: Bookings and money, Services and plans.

A service is what you offer (Janam Kundli). A plan is a version with its own price (Basic, Detailed, Premium).

Add a service: press Add Service; enter the title, tagline and description in English and Hindi; add a picture or a YouTube link; add content blocks and extra links; switch Active on; Save.

Add a plan: click the service, press Add Plan; enter title (English, Hindi), the price in rupees (for example 501), optional original price, delivery days, pages, the list of features (one per line), "Most chosen" if it should stand out, and tick "includes call" with minutes if a consultation call is part of the plan. A call plan needs appointment slots (see 10.2).

Editing and removing: Edit changes any detail; prices of earlier orders do not change. **Deactivate** hides a service or plan and keeps its history. **Delete** removes it for ever; a service that already has orders should be deactivated.

The home page uses the services named janam-kundli, prashna-kundli and kundli-matching for its three plan sections. Other active services still appear on the Services page.

9.2 Other services

Puja, Paath, Yagya, Vastu, Vehicle, Driver, ITR help desk and similar. For each: title, description (accepts links), picture, an optional website address (shows a "Visit Website" link and, for the first two with an address, the Connected Services boxes), order and Active.

9.3 Banners

Pictures with a title and link at the top, bottom, left or right. Choose position and type (single or slideshow), upload the picture, write titles in both languages, add the link and set the order. Prefer pictures under 500 KB. Banners that are switched off do not show.

9.4 Scrolling notice (marquee)

The moving strip at the bottom (or top). Set the text in both languages, speed, font size, text colour and background colour (quick colour buttons help), position, "pause when the pointer is over it" and "visitors may close it". A preview shows before you save.

9.5 Pages and legal

Edit About and the legal pages (Privacy Policy, Terms and Conditions, Refund policy, Platform Guidelines, Member Agreement, Rules and Regulations). Each has an English text and a Hindi text that accept links, plus content blocks. Change legal wording only with the lawyer's approval.

9.6 Articles, Gallery, Reviews, FAQ, Founder

- **Articles** (blog): title, short summary, picture, text (accepts links), optional video, publish switch.
- **Gallery**: pictures with captions; the first five active pictures also appear on the home page.

- **Reviews**: name, place, rating and text. Add only genuine reviews with permission. A review shows on the home page when it is switched on and verified.
- **FAQ**: question and answer in both languages (answers accept links). The first eight active FAQs appear on the home page and all on the FAQ page. Google can show them as rich answers.
- **Founder**: name, photo, biography (accepts links) and achievements.

9.7 Certificates

Upload GST, MSME, Trademark, ISO and other certificates so visitors can view, download and print them. Choose the kind, title in both languages, the certificate number and the PDF or picture. The Active switch hides one without deleting it.

9.8 Translations and Chatbot

- **Translations**: change fixed words (button names, labels) in Hindi or English. Search for the text and edit it.
- **Chatbot**: add question-and-answer pairs with keywords; edit the welcome message; switch the assistant on or off. Write your own answers for prices, timings and policies so customers always get correct information.

10. Bookings and money

10.1 Orders

Each booking becomes an order (for example MKJK-2026-0004).

Find an order: use the search box (number, name or phone) and the tabs (All, Awaiting verification, Paid, In progress, Completed).

Verify a payment. Customers pay to your UPI or bank and enter the reference (UTR). Such an order says "Awaiting verification".

1. Check your bank or UPI statement for that amount and reference.
2. Open the order. Compare amount and reference.
3. Press Approve if the money has arrived (the order becomes Paid and an invoice number is made), or Reject with a clear reason if not.

> *Never approve a payment only because the customer says they paid.*

Move the order forward. Change the status so the customer can follow progress. A short note is required each time. You cannot skip steps.

Status	Meaning	Next
Order received	Booking made	Kundli in progress
Kundli in progress	Work started	Kundli complete
Kundli complete	Report ready	Dispatched (physical) or Execution complete (digital)
Dispatched	Sent by courier	Delivered

Status	Meaning	Next
Delivered	Customer has it	Execution complete

For dispatched orders enter the courier name and tracking number. Appointments (for call plans) can be approved, rejected or completed from the order. Invoices of paid orders can be opened from the order.

10.2 Appointment slots

Slots are the times customers can choose for call plans. Without slots, call plans cannot be booked.

1. Choose From date and To date, and tick the weekdays you are available.
2. Enter the daily Start and End time, the minutes per slot (for example 30) and people per slot (usually 1).
3. The screen tells you how many slots it will create. Press Add slots.

Slots already existing for the same day and time are skipped; past dates are ignored. In the list, "Switch off" hides a slot (use for holidays); Delete removes an unused slot. A slot with bookings cannot be deleted.

10.3 Promo codes

1. Press Create Offer Code. Enter the code (letters and numbers), titles in both languages, discount type (flat rupees or percentage) and value.
2. Optional: maximum discount (percentage codes), minimum order, total uses, uses per customer (1 is usual, 0 unlimited), the services it works on (none ticked means all), start and end dates.
3. Keep Active on and Save.

If a code does not apply, customers see exactly why (minimum amount, wrong service, already used, expired or full). Make one code per campaign and switch it off when it ends.

10.4 Enquiries

Messages from the Contact page, the home page Kundli request form and the chat appear here with name, phone and message. Call or message the person, then press the resolved toggle. Filters show open, resolved or all.

11. People

- **Users**: all registered customers with phone, email and number of orders; use search to help someone find their account.
- **Associates**: four tabs. *Associates* (approve, reject, view details, notes and own commission), *Commission rules* (standard percentage or amount, for everything or one service or plan), *Payout requests* (mark Paid with reference, or Rejected with reason) and *Settings* (programme on or off, automatic approval, minimum payout, referral days, terms). Commission stages: Pending, Earned, Paid, Cancelled. Never mark a payout Paid before the money is sent.
- **Customer files**: open any customer's uploaded files and upload a report for them. PDF, pictures, video, audio and text open on screen; Word and Excel download. Maximum 4 MB per file. Files that pretend to be another type are refused automatically.

12. System

12.1 Business settings

Contact and name, Panchang coordinates, the map (whether to show it, where, label), the app download link, manual payment options (UPI ID, QR picture, bank details) and GST/billing. The email and the address are empty until you enter them; once entered they appear on the Contact page, footer and invoices. Double-check the UPI and bank details: customers pay to exactly what is written.

12.2 SEO and Google

Website settings, **SEO**: page title and description for Google (English and Hindi), keywords, the picture shown when someone shares the link, and the Google Search Console code. Tips:

- Write a title under 70 characters and a description under 160 that include words people search for, such as "Janam Kundli", "Kundli matching", "Prashn Kundli", "Vastu" and your service names.
- After the site is on your own domain, add it to Google Search Console and submit the sitemap address (your website address followed by /sitemap.xml).
- Keep service descriptions, FAQ answers and article texts detailed and honest; Google reads them.
- The site already adds search-friendly data automatically: page titles, descriptions, language versions, a sitemap, and FAQ and service information.

12.3 API keys and Analytics

Stores the connections to outside services (encrypted): Razorpay, MSG91, email (SMTP), Google login and the Google Analytics ID. Enter Analytics like this: create a Web property at analytics.google.com, copy the Measurement ID (starts with G-), paste it here and save, then check Realtime in Google Analytics. To stop tracking use Website settings, Analytics.

> *Never send these keys by WhatsApp or email in plain text.*

12.4 Backups

An automatic copy is made every day (plus weekly on Sundays and monthly on the 1st). Choose how many copies to keep. "Back up now" takes a copy at once (do it before big changes). Download saves a readable copy to your computer (keep one monthly). Passwords and secret keys are never included, and uploaded files are stored separately. Restoring is done by the developer.

13. Routines

Every day: open the Dashboard and clear "Payments to verify"; reply to Enquiries; update order statuses.

Every week: add appointment slots for the next weeks; review associate requests and payouts; check that banners, the highlight strip and the scrolling notice are current.

Every month: download a backup; switch off finished promo codes; look at Google Analytics; check certificates and legal pages.

14. Common problems

Problem	What to do
Customer says they paid but the order is still "Awaiting verification"	Check your bank or UPI statement for amount and reference, then Approve or Reject
A promo code is refused	Read the message shown; check minimum order, services, dates and per-customer limit
Customers cannot choose a consultation time	Add slots in Appointment slots
I saved but the website shows the old text	Refresh with Ctrl and F5; check you pressed Save and saw the green message
A link I typed does not work	Links need https:// at the start, or / for a page of the site; use the Add link button
The menu looks wrong after my changes	Website settings, Main menu links, press "Go back to the standard menu"
White text is hard to read after changing colours	Pick a darker "Dark brown" or press "Use standard colour"
A Kundli, Matching or Panchang page is empty	The outside tool may be down; try later or switch the page off
The map is not shown	Business settings, Location Map: switch it on and enter the place
I forgot my password	Contact the developer
I deleted something by mistake	Contact the developer at once; downloaded backups help
Mobile OTP is not arriving	MSG91 must be set up (keys and template); meanwhile use email and password or Google

15. Do and do not

Do: check payments in your own bank before approving; fill Hindi and English; keep slots and notices current; download a monthly backup; log out when finished.

Do not: share the admin password or keys; approve a payment without checking the money; delete services that have orders (deactivate them); change legal text without the lawyer; upload very large pictures; make the Dark brown colour light.

16. Getting help

Contact the developer for restores, new features or anything unclear. Please have ready what you were doing, what you expected, what happened, and the date and time. A screenshot helps.
