Admin Panel User Guide

Maharshi Kanad Jyotish Kendra: a complete guide to running the whole website yourself

Website: https://maharshikanadjyotishkendra.com
Admin sign-in: https://maharshikanadjyotishkendra.com/auth/signin/super-admin
Version: November 2026 · all screens are from the real admin panel

Contents

1	Getting started: what the admin panel is and how to open it	2
2	Dashboard	6
3	Orders: handling customer bookings	9
4	Payments & invoices, and the GST report	16
5	Catalogue: Services → Packages → Plans → Offers	21
6	Other services, call bookings and appointment slots	35
7	Messages: WhatsApp chats, support tickets and enquiries	40
8	Sister services: Matrimony, Pilgrimage & tours, Tax desk	45
9	People: Users, Associates and Customer files	54
10	Website settings: changing the look and wording of the site	62
11	Website content: slides, banners, pages, articles, gallery, reviews and more	74
12	System: Business settings, API keys and backups	92
13	Daily work: checklists and complete procedures	99
14	Troubleshooting, safety and glossary	102
15	Reading, downloading and editing this guide inside the admin panel	106

1 Getting started: what the admin panel is and how to open it

Read this chapter once, before anything else. Everything after it will then be easier.

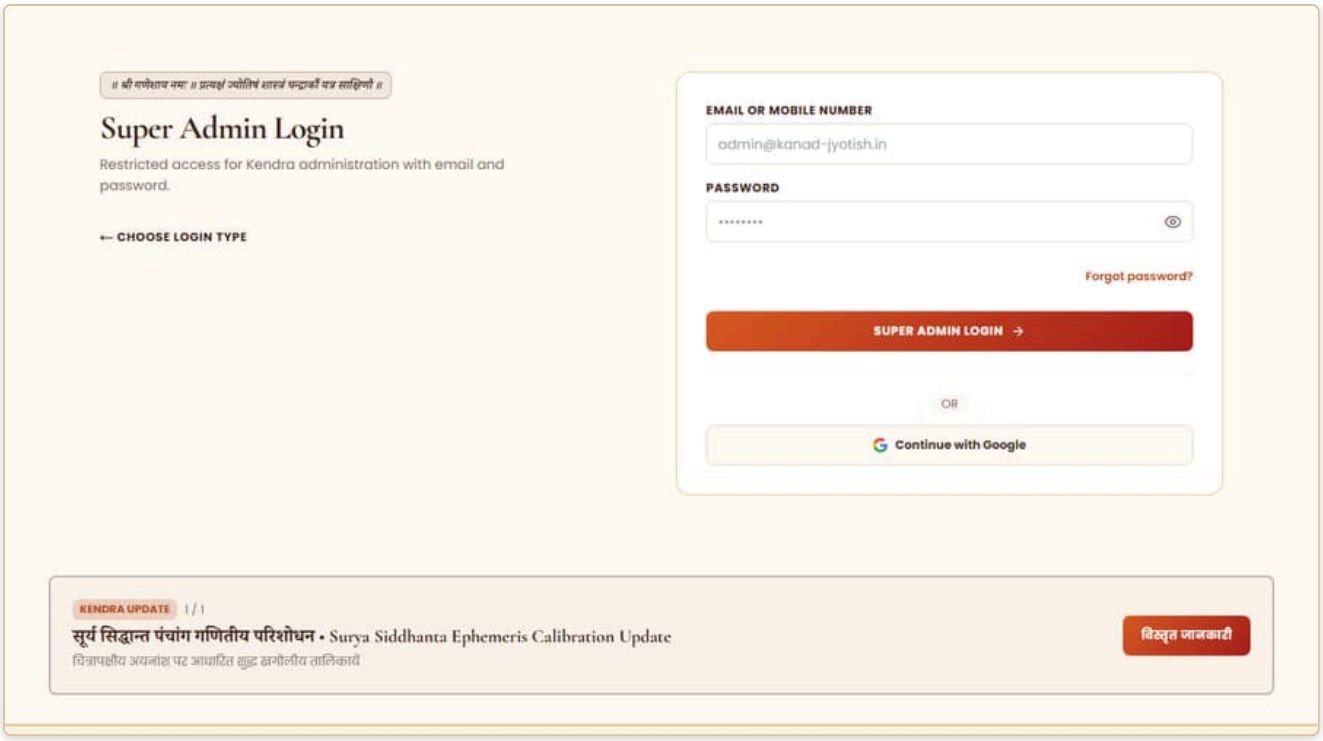

1.1 Who this guide is for

This guide is for the Kendra's administrators (Super Admin). The admin panel is where you run **everything the visitor sees on the website** and **every customer order**, without needing a developer: changing services and prices, moving orders forward, checking payments, delivering Kundli PDFs, running offers, writing articles, pulling reports and taking backups.

- Each chapter first says what the page does, then explains the parts of the screen, then gives step-by-step tasks and the list of fields.
- Words in **bold** are the real button or field names on the panel. Some field names on the panel are in capitals (for example **TITLE (ENGLISH)**, **SLUG**). They are written here exactly as they appear so you can match them.
- Chapter 13 collects the daily routines and complete procedures (adding a service, giving a refund, running a festival offer). If you are in a hurry, go straight there.

1.2 Signing in

1. Open `https://maharshikanadjyotishkendra.com/auth/signin/super-admin` in your browser.
2. Enter your e-mail and password and press **Super Admin Login**.
3. After a successful sign-in you land on the **Dashboard**.

The Super Admin sign-in page. The 'My account' link in the site header leads here too.

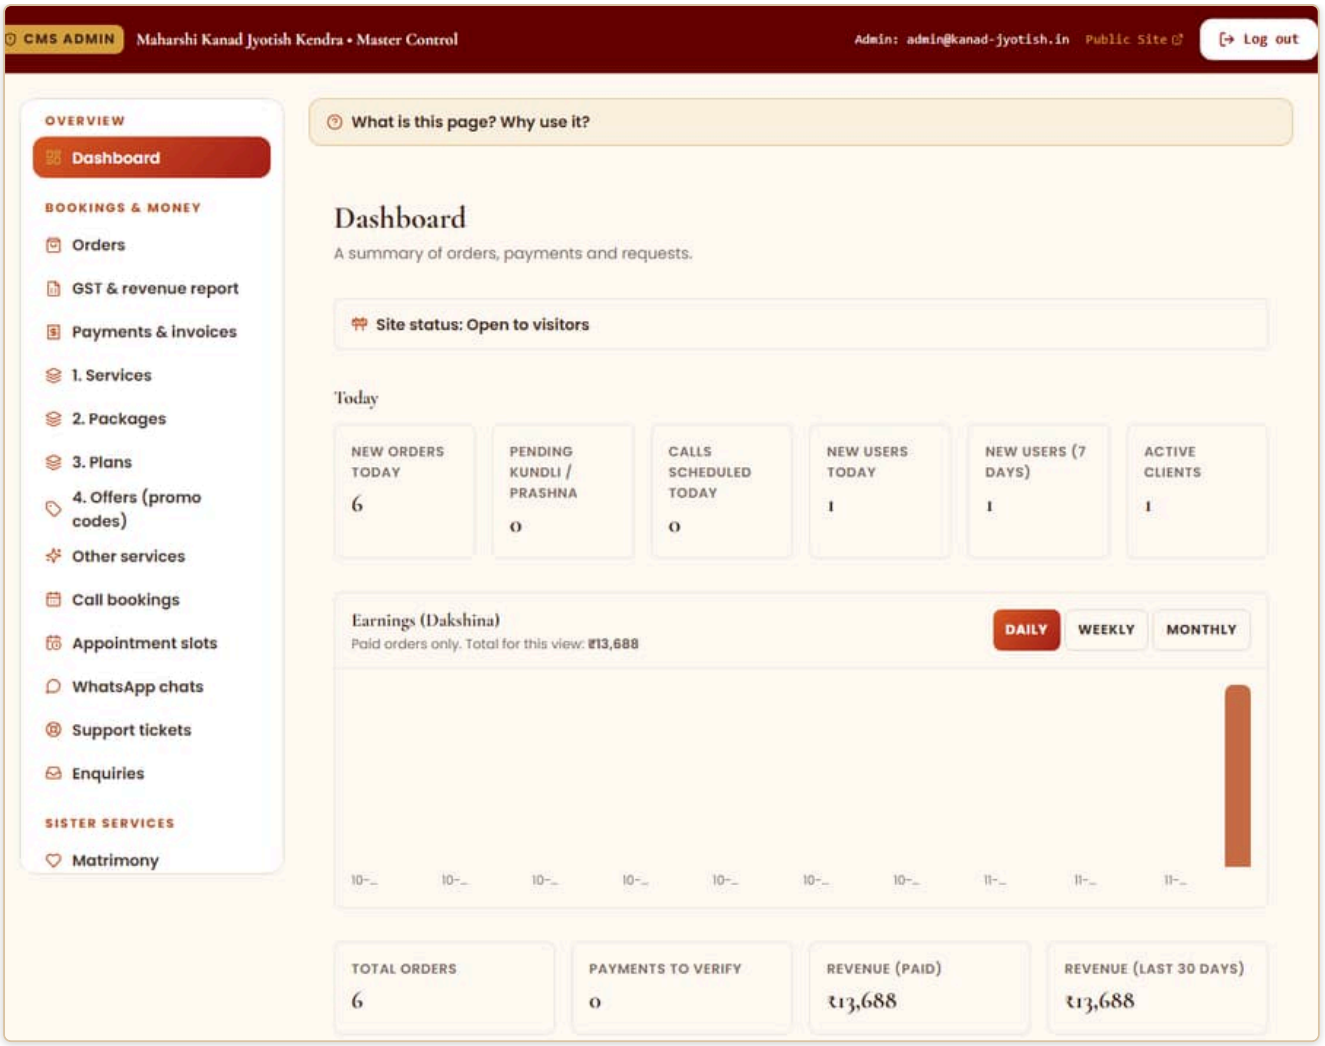

> **Note:** Share the sign-in address only with administrators. Customers and associates have their own sign-in. The 'Choose your login type' page offers three options: User, Associate and Super Admin.

> **Caution:** Never share your password and never write it on paper or in a chat. If anyone else uses this computer, press **Log out** (top right) as soon as you finish.

1.3 The layout: top bar and left menu

Every admin page has the same three parts:

- **The dark red top bar (CMS ADMIN):** shows your sign-in e-mail, a **public portal** link (to open the customer-facing site) and the **Log out** button.
- **The left menu:** all pages in 6 groups (listed below).
- **The main area:** the open page. At its top is a cream strip **'What is this page? Why use it?'**. Press it for a plain-words introduction to that page. You can also use **'Add demo video for this page'** to attach a video or picture that explains the page, so a new assistant can learn by watching.

The dashboard: menu on the left, red bar on top, today's summary in the middle.

All pages in the left menu (6 groups, 38 pages)

Group	What it contains
Overview	Dashboard
Bookings & money	Orders · GST & revenue report · Payments & invoices · 1. Services · 2. Packages · 3. Plans · 4. Offers (promo codes) · Other services · Call bookings · Appointment slots · WhatsApp chats · Support tickets · Enquiries
Sister services	Matrimony · Pilgrimage & tours · Tax desk (ITR)
People	Users · Associates · Customer files
Website	Website settings · Home hero slides · Banners · Scrolling notice · Pages & legal · Guides & visuals · Articles · Gallery · Reviews · FAQ · Founder · Team & assistants · Certificates · Translations · Chatbot
System	Business settings · API keys & Analytics · Backups

1.4 Language: Hindi and English

The **हिन्दी** and **EN** buttons at the top of the site switch the language. The whole admin panel opens in both. For most content (a service name, description, FAQ and so on) the panel asks for **two fields**: one English, one Hindi. **Fill in both**; whichever language you leave empty will show a blank to visitors.

1.5 Five golden rules

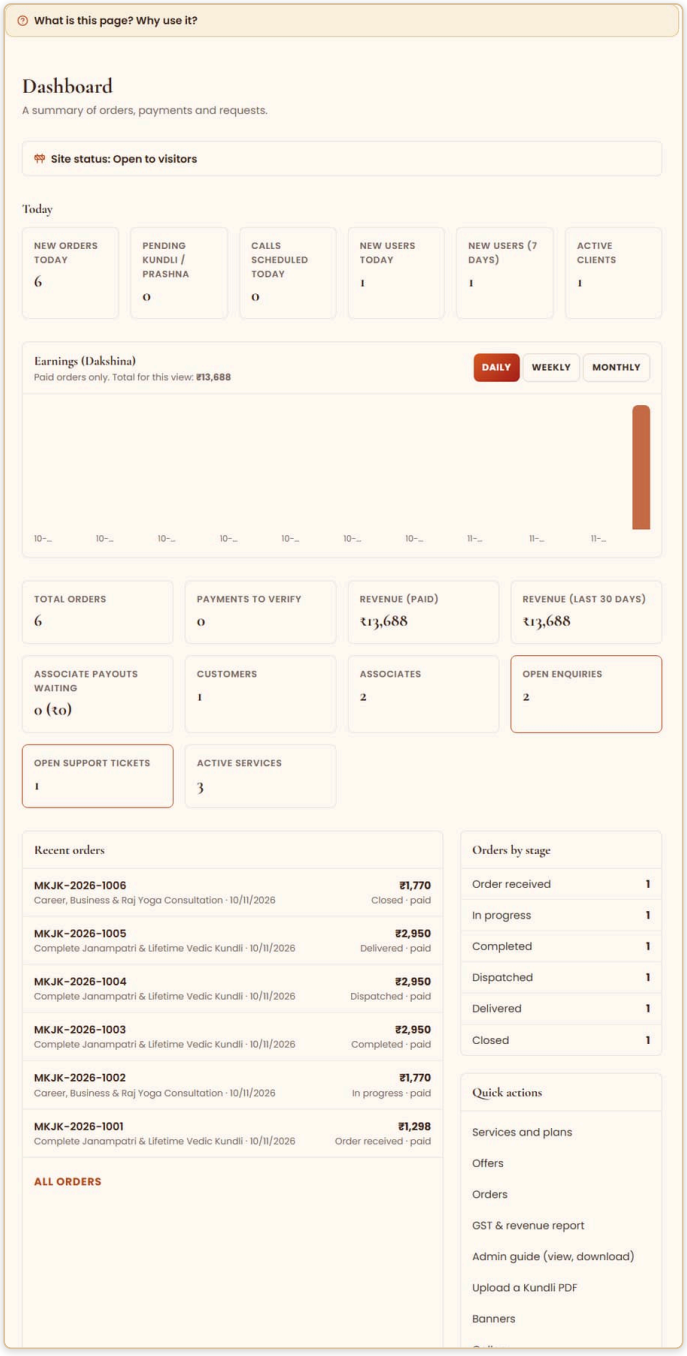

1. **Nothing changes until you press Save.** Every form has a save button at the bottom (Save / SAVE / COMMIT STATUS TRANSITION). Treat the work as done only when a success message appears.
2. **Choose 'Deactivate' before 'Remove'.** Deactivating hides an item from the website but keeps its record, and you can switch it on again. **Remove** is permanent.
3. **What you change goes live at once.** To experiment, use an old or inactive item, and open the public portal after each change to check it.
4. **Every order status change needs a note.** The note stays in the audit trail forever and helps later with any dispute or question.
5. **Download one backup every week and keep it somewhere safe.** (Chapter 12.3)

> **Tip:** If you get stuck on a page, first open the cream strip 'What is this page?'. Every page has a plain-words introduction there. This guide can also be read on the site itself, under **Pages & legal → Guide: Admin**.

2 Dashboard

A summary of today's work. Start every day here.

The dashboard is a **live summary**. Every box can be pressed to open the related page, so you can jump straight into the work.

The complete dashboard.

2.1 The 'Today' strip: six boxes

Box	Meaning	When pressed opens
New orders today	Orders received today	Orders
Pending Kundli / Prashna	Kundli, Kundli-matching and Prashna orders still to be prepared	Orders, with the 'Kundli & Prashna queue' filter
Calls scheduled today	Calls fixed with customers for today	Call bookings calendar
New users today	Accounts created today	Users
New users (7 days)	Accounts created in the last seven days	Users
Active clients	Customers who have placed at least one order	Users

2.2 The earnings (Dakshina) chart

Only **payments already received** are counted. The **Daily · Weekly · Monthly** buttons at the top right of the chart change the view, and 'Total of this view' is written under the chart heading.

2.3 The other statistic boxes

Box	Meaning
Total orders	All orders so far
Payments to verify	The customer sent money by UPI or bank and gave a reference, but you have not checked it yet. **Bring this to 0 every day**, because the customer's order does not move until you approve it.
Amount received	Total payments received so far
Revenue (last 30 days)	Earnings of the last 30 days. Opens the GST report
Associate payouts pending	Commission still owed to associates (count and amount)
Customers / Associates	Total accounts, by role
Open enquiries	Messages you have not answered
Open support tickets	Customers' help requests that are not resolved
Active services	Services currently visible on the website

2.4 The three lists below

- **Recent orders:** the newest 6 orders with number, service, date, amount, stage and payment. **All orders** opens the full list.
- **Orders by stage:** how many orders sit in each stage (Order received → In progress → Ready → Dispatched → Delivered → Complete). You can see at a glance where the queue is building up.
- **Quick actions:** shortcuts to the most-used pages: Services and plans, Offers, Orders, GST & revenue report, **Admin guide (view, download)**, Kundli PDF upload, Banners, Gallery, Blog, Site settings.

2.5 Maintenance mode (switching the site off for a while)

The dashboard has a bar reading 'Site status: open to visitors'. For big changes or server work you can switch the site off temporarily:

1. There are two optional message boxes: one in English and one in Hindi. Write for visitors, for example: 'We are making a small improvement. Please come back in an hour.'
2. Press **Turn ON maintenance mode**.
3. Visitors see a 'We will be back soon' page and your message. **You (the admin) still see the real site and can run the panel**, with an orange bar on top saying 'Maintenance mode is ON'. The sign-in pages stay open to everyone, so you can sign in from outside too.
4. When the work is done, switch maintenance mode off from the same place.

> **Caution:** If you leave maintenance mode on by mistake, customers cannot book. Always switch it off after the work and check the public portal.

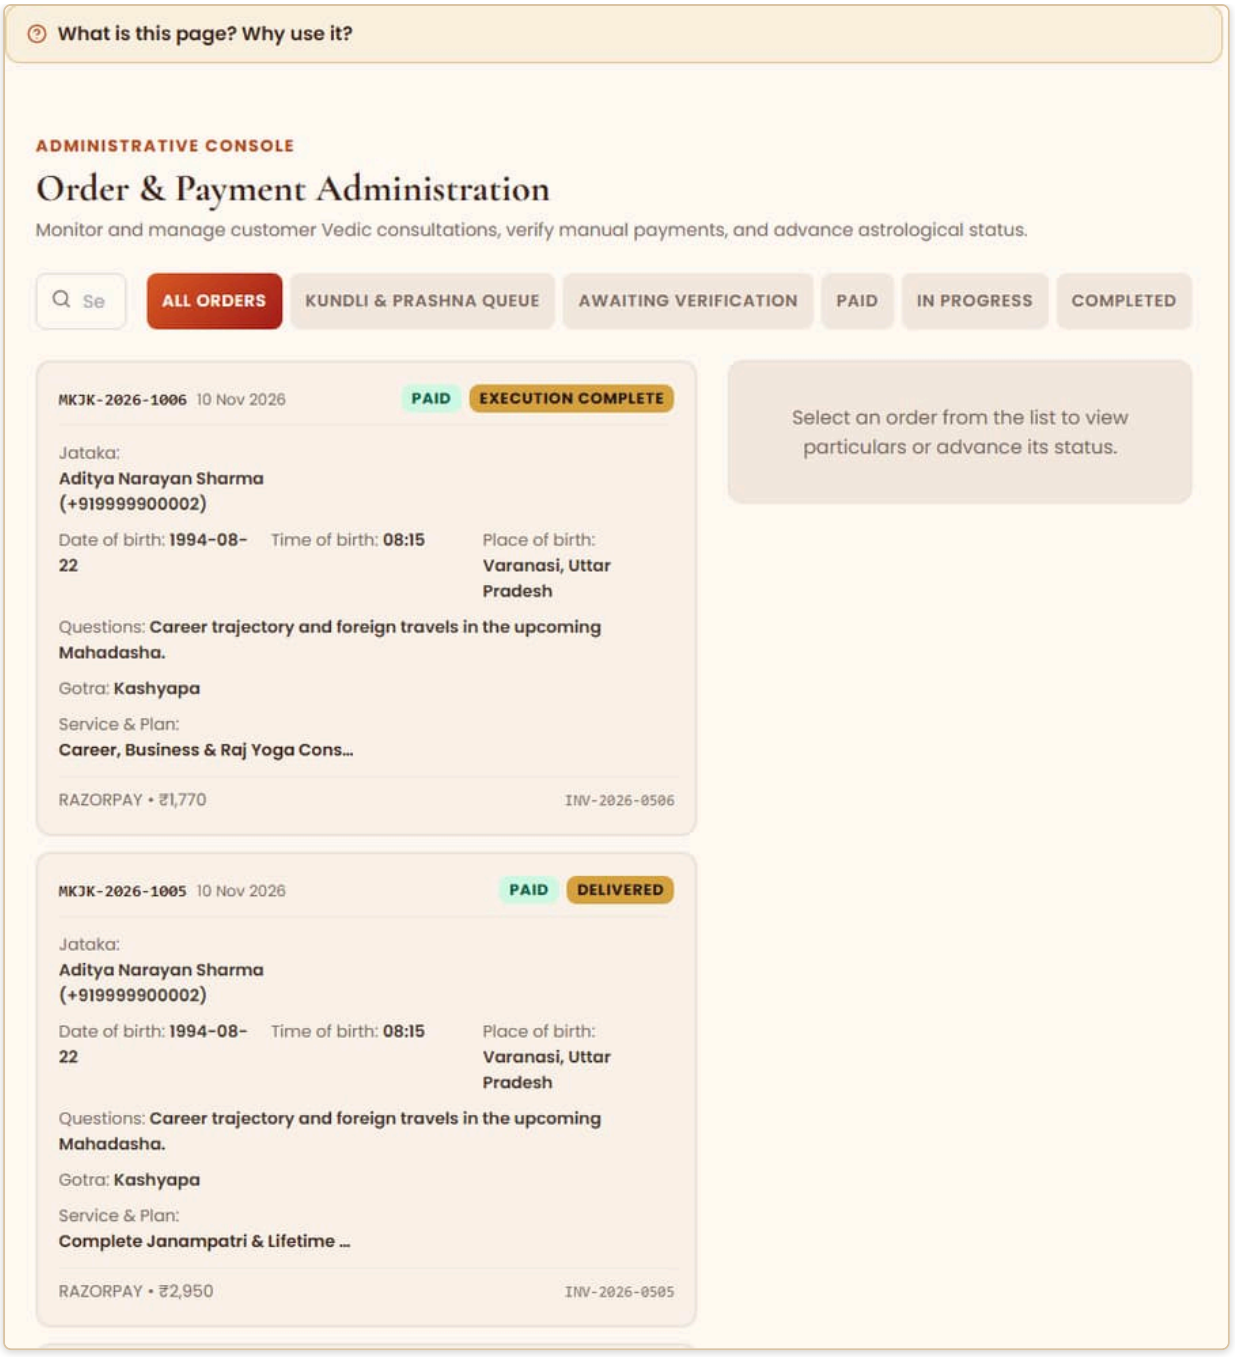

3 Orders: handling customer bookings

The Kendra's daily work happens here. Every booking is moved from 'Order received' to 'Complete' on this page.

3.1 What this page shows

On **Orders** (menu: Bookings & money → Orders) every booking is a card showing:

- The order number (for example **MKJK-2026-1003**) and date.
- Two coloured tags: the **payment status** (PAID and so on) and the **stage** of the work (for example KUNDLI COMPLETE).
- The **Jataka** (the person the Kundli is for): name, mobile, date, time and place of birth, gotra.
- The customer's **question**, the **service / plan**, the payment mode (RAZORPAY or manual) and amount, and the invoice number (INV-2026-0503).

The Orders page: search and filters at the top, order cards below, details panel on the right.

3.2 Search and filters

At the top is a search box: search by order number, name or mobile. Next to it are six filter buttons:

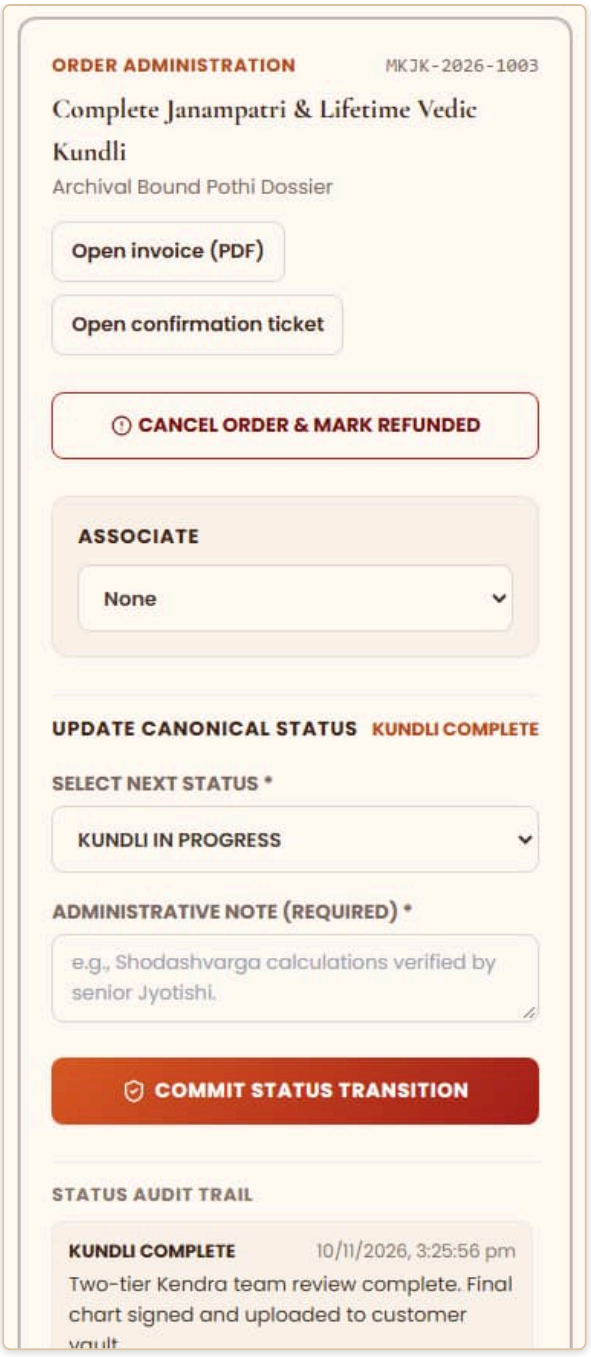

Filter	What it shows	When to use it
ALL ORDERS	Every order	To see the whole list
KUNDLI & PRASHNA QUEUE	Kundli, Kundli-matching and Prashna Kundli orders (ordinary service bookings left out)	Planning the pandit's day

Filter	What it shows	When to use it
AWAITING VERIFICATION	Orders where the customer paid by UPI/bank, gave a reference, and you have not yet checked	Every morning and evening. An order here means the customer's work is stuck
PAID	Orders already paid	Checking earnings or invoices
IN PROGRESS	Order received, Kundli in progress, Kundli complete, Dispatched: all unfinished orders	Seeing what is pending
COMPLETED	Delivered and Execution complete orders	Checking old work

> **Tip:** When a customer phones about an order, type their mobile number in the search box. The order appears at once.

3.3 The order details panel

Press any card. The **order panel** (titled 'Order Administration') opens on the right. When nothing is selected it says 'Select an order from the left to view details or change its status.'

The panel that opens on the right: invoice, confirmation ticket, cancel/refund, associate, status update and history.

Parts of the panel, top to bottom

Part	What it does
Open invoice (PDF)	Opens the customer's GST invoice. Print or save it and send it to the customer. (It exists only after payment)
Open confirmation ticket	The booking confirmation: payment amount, appointment, birth details and so on. What it shows is set in 'Website settings → Confirmation ticket'
Cancel order & mark refunded	Cancels the whole order and records a refund. (See 3.7)

Part	What it does
Associate	If this customer came through an associate, or you want to credit someone, pick them from the list. 'None' removes it. Commission is created for that associate. **The associate cannot be changed once the order's commission has been paid out**
Update Canonical Status	The form to move the order to the next stage (see 3.4)
Status Audit Trail	Every change: which status, when, by whom and the note written. It cannot be erased

3.4 The six stages, and how to change the status

Every order moves in exactly this order. **No stage can be skipped or reversed.**

#	Stage (on the panel)	Meaning	Your job
1	ORDER RECEIVED	Order arrived and is paid	Check the details and start the work
2	KUNDLI IN PROGRESS	The Kundli or consultation is being prepared	Calculation and writing
3	KUNDLI COMPLETE	The Kundli is ready	Upload the PDF in 'Customer files' (chapter 9.3)
4	DISPATCHED	The printed pothi has been sent by post/courier	Fill in the courier name and tracking number
5	DELIVERED	The customer has received it	Mark it after the customer confirms
6	EXECUTION COMPLETE	All work done; the order is closed	The final stage

> **Note:** For **digital-only plans** (where the plan's printed pages are empty or zero) you may go straight from stage 3 (KUNDLI COMPLETE) to stage 6 (EXECUTION COMPLETE). Skipping dispatch and delivery is fine. If the plan has printed pages, the dispatch stages are required.

Steps to change a status

1. Select the order card on the left.
2. In the panel's **Select Next Status *** list choose the next stage. (Only the next valid stage will work.)

3. If you choose **DISPATCHED**, two more fields appear: **Courier / Carrier Name** (for example India Post) and **Tracking / Consignment ID**. The customer sees these on their order-tracking page.
4. Write a short note in **Administrative Note (Required) ***, for example: 'Shodashvarga calculation done, sent for review.' The button will not work with an empty note.
5. Press **Commit Status Transition**. A new entry is added to the audit trail and the customer's tracking page changes.

> **Caution: You cannot go back once a stage is chosen.** Read once before pressing the button. If you moved ahead too early, write the reason in the next note and carry on, or ask the developer.

3.5 Checking manual (UPI / bank) payments

When a customer pays by Razorpay (card/UPI gateway) the payment becomes 'PAID' by itself. But when the customer **sends money straight to your QR/UPI/bank account**, they give a reference number (UTR) and a receipt picture while booking. Such an order appears under **AWAITING VERIFICATION** and waits for your confirmation.

1. Press the **AWAITING VERIFICATION** filter and open the order.
2. The panel shows **Verify Manual Payment** with the customer's **Reference** and a **View Uploaded Receipt Proof** link.
3. Check in your bank/UPI app that this amount really arrived under that reference.
4. If it did, press **Approve**. The order becomes PAID, the invoice is created and the work can proceed.
5. If it did not, press **Reject** and write the **reason** in the small window. The customer sees the reason and can pay again.

> **Caution:** Do not press **Approve** without seeing the money in your bank. Once the invoice exists it is hard to undo, and the amount also enters the GST report.

3.6 Orders with a call / appointment

For plans that include a call the customer picks a time slot. Such orders show an **Appointment** section in the panel with the time and three choices: **Approve**, **Reject** (a reason is required) and **Complete**. Mark it Complete when the call is over. All calls are also visible as a calendar on **Call bookings** (chapter 6).

3.7 Cancelling an order and refunds

A customer can cancel an order from their own account, or upgrade their plan. The rules are in 'Pages & legal → Cancellation & Refund Policy'. You can cancel any order too.

A. You want to cancel an order yourself

1. Open the order and press **Cancel order & mark refunded**.
2. In the window that opens write the **reason for cancelling** and confirm.
3. The order's payment status becomes REFUNDED and the refund status is recorded.
4. **Now send the money back to the customer yourself from your bank/UPI.** The panel only keeps the record; it does not move money.

B. The customer cancelled the order

Such an order shows in the panel: **'Customer cancelled — refund is waiting'**. Then:

1. Send the money back to the customer's account/UPI.
2. Then press **Refund sent — record it** and write the refund **reference / UTR** in the window.
3. The customer's account will now show that the refund has been sent.

C. The customer upgraded their plan

When a customer moves to a higher plan they pay only the **difference** and a new order is created, with the earlier payment credited as a discount. When the new order is paid, the old order closes by itself as 'credited'. **You need to do nothing extra.**

> **Caution:** Before sending a refund, look at the order's payment mode. A payment made through **Razorpay** can also be refunded from the Razorpay dashboard; a manual payment is refunded from your bank. Always record each refund's UTR in the panel so the accounts agree.

3.8 A normal day with orders

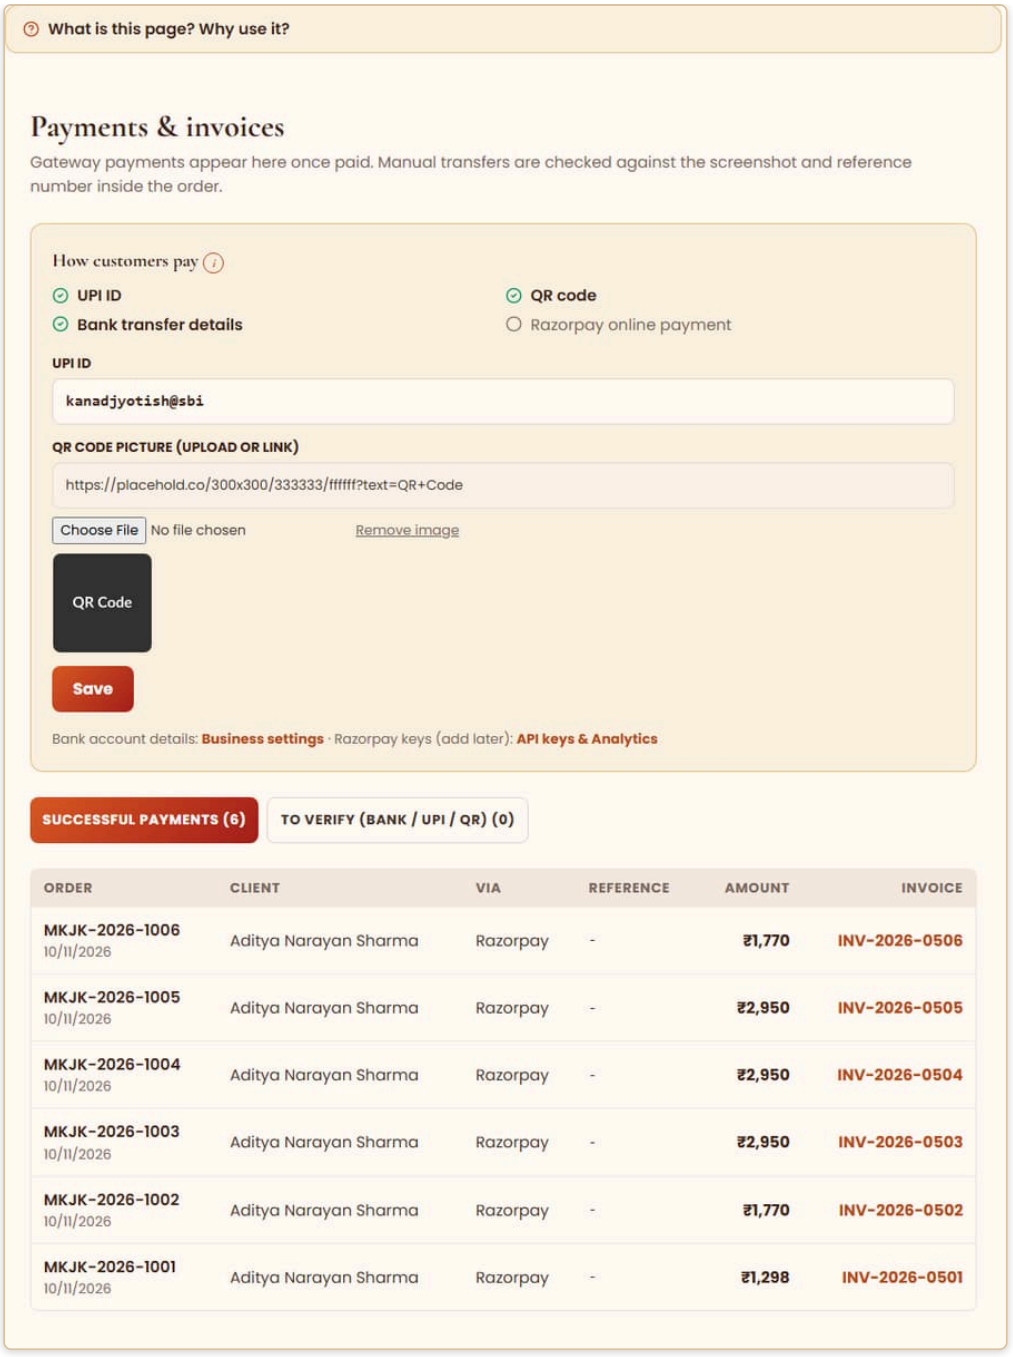

1. In the morning open **AWAITING VERIFICATION** and approve the payments that have reached the bank.
2. Open **KUNDLI & PRASHNA QUEUE**. Move 'ORDER RECEIVED' ones to 'KUNDLI IN PROGRESS'.
3. Upload finished Kundli PDFs in 'Customer files', then move the order to 'KUNDLI COMPLETE'.
4. For printed pothis choose 'DISPATCHED' and enter the courier details.
5. In the evening look at **IN PROGRESS**. Pay attention to any order stuck for many days.

4 Payments & invoices, and the GST report

How much money came in, by which route, and what the accountant needs each month.

4.1 Payments & invoices (menu: Bookings & money → Payments & invoices)

This page does two things: **(a) decide which account customers send money to** and **(b) show the payments received so far**.

The Payments & invoices page.

(a) The 'How customers pay' box

- **UPI ID:** the Kendra's UPI ID (for example `name@bank`). Customers see this when paying.
- **QR code picture (upload or link):** upload a picture of your UPI QR or paste its link. **Remove image** deletes it.
- Press **Save** after any change.
- The bank account details (account number, IFSC) are filled in under **Business settings** (chapter 12.1). The box also shows whether bank details and Razorpay are ready.

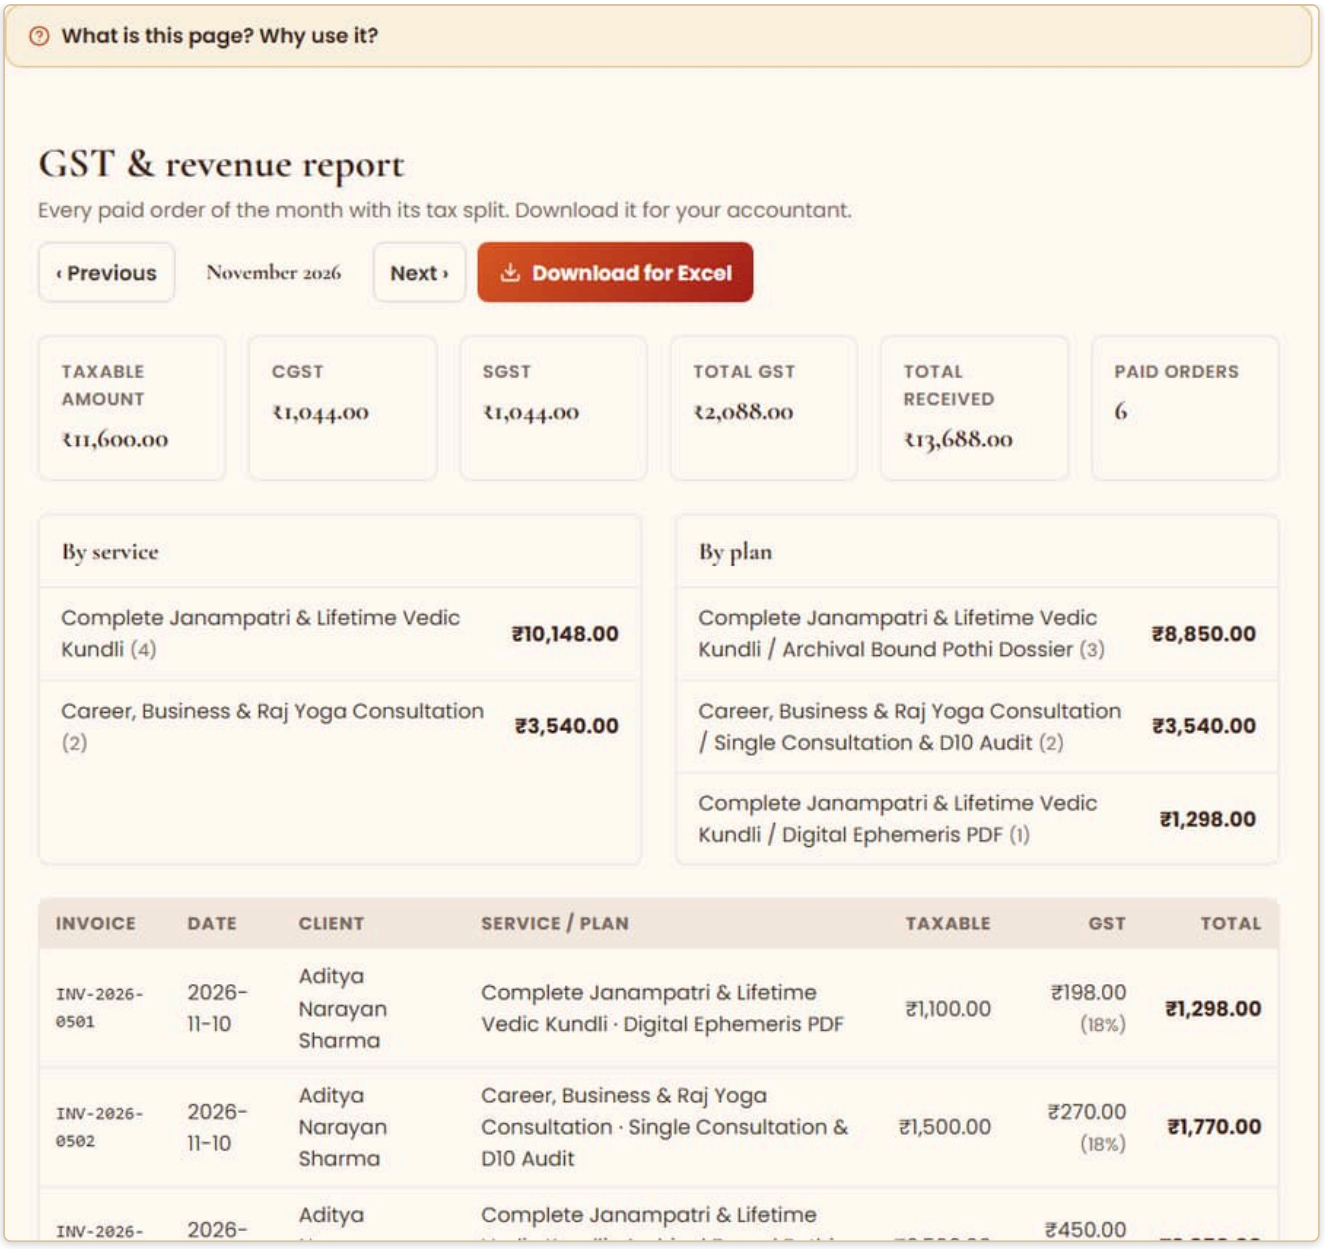

(b) The list of payments

Column	Meaning
ORDER	Order number
CLIENT	Customer's name
VIA	RAZORPAY (online gateway) or manual UPI / bank
REFERENCE	The Razorpay or manual payment reference (UTR)
AMOUNT	Total paid, including GST
INVOICE	The invoice number (for example INV-2026-0503) and its link. The PDF opens and can be printed or downloaded

> **Note:** The invoice's language, terms, signature, logo and so on are changed in 'Website settings → Invoice (bill)' (chapter 10). That section also has the **'Let customers download their own invoice'** switch.

4.2 GST & revenue report (menu: Bookings & money → GST & revenue report)

Your accountant needs this report every month for the GST return. It lists the **paid** orders of that month.

The GST & revenue report.

- Use **‹ Previous** and **Next ›** at the top to move to any month.
- Two summaries: **By service** and **By plan**: how much taxable value and GST each produced.
- The detail table: **INVOICE · DATE · CLIENT · SERVICE / PLAN · TAXABLE · GST · TOTAL**.
- **Download for Excel** gives the month's `gst-report-YYYY-MM.csv` file (with CGST and SGST shown separately). It opens straight in Excel and can be e-mailed to the accountant.

> **Tip:** Between the 1st and 5th of each month, download the previous month's report, send it to the accountant and keep a copy yourself.

> **Note:** The GST rate and GSTIN are set in 'Business settings → Taxation & Billing'. The default rate is **1800 basis points = 18%**.

5 Catalogue: Services → Packages → Plans → Offers

Everything the website sells is built on these four pages. Build them in the order 1, 2, 3, 4.

5.1 How the four relate

An example. You sell a 'Complete Janampatri':

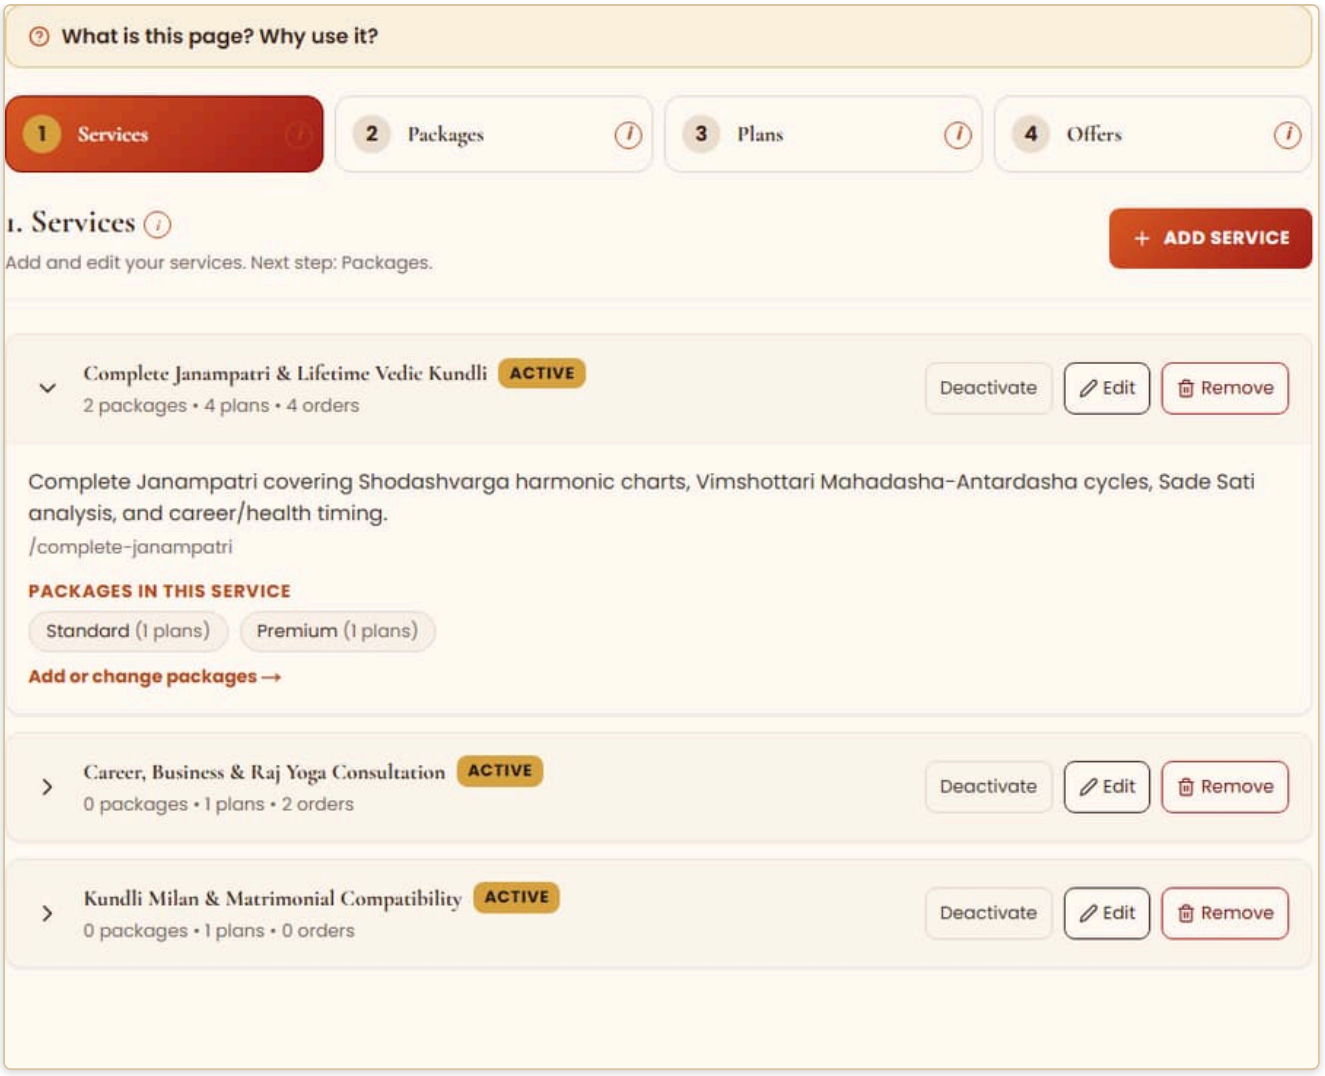

Level	What it is	Example	What the customer sees
1. Service	The big offering: its name and introduction	Complete Janampatri & Lifetime Vedic Kundli	A card on the 'Services' page, then the service's own page
2. Package	A version or category of the service	Standard · Premium	Categories (tabs) on the service page
3. Plan	**What the customer actually buys**, with its price	Kundli with Call: ₹2,499	Price, features and a 'Book now' button
4. Offer	A discount on a plan or a whole package	DIWALI10: 10% off	A discount badge by the plan and a code box while booking

Note: The order matters. You need a service before a package, a package before a plan, and a plan before an offer. That is why the menu is named '1. Services, 2. Packages, 3. Plans, 4. Offers'.

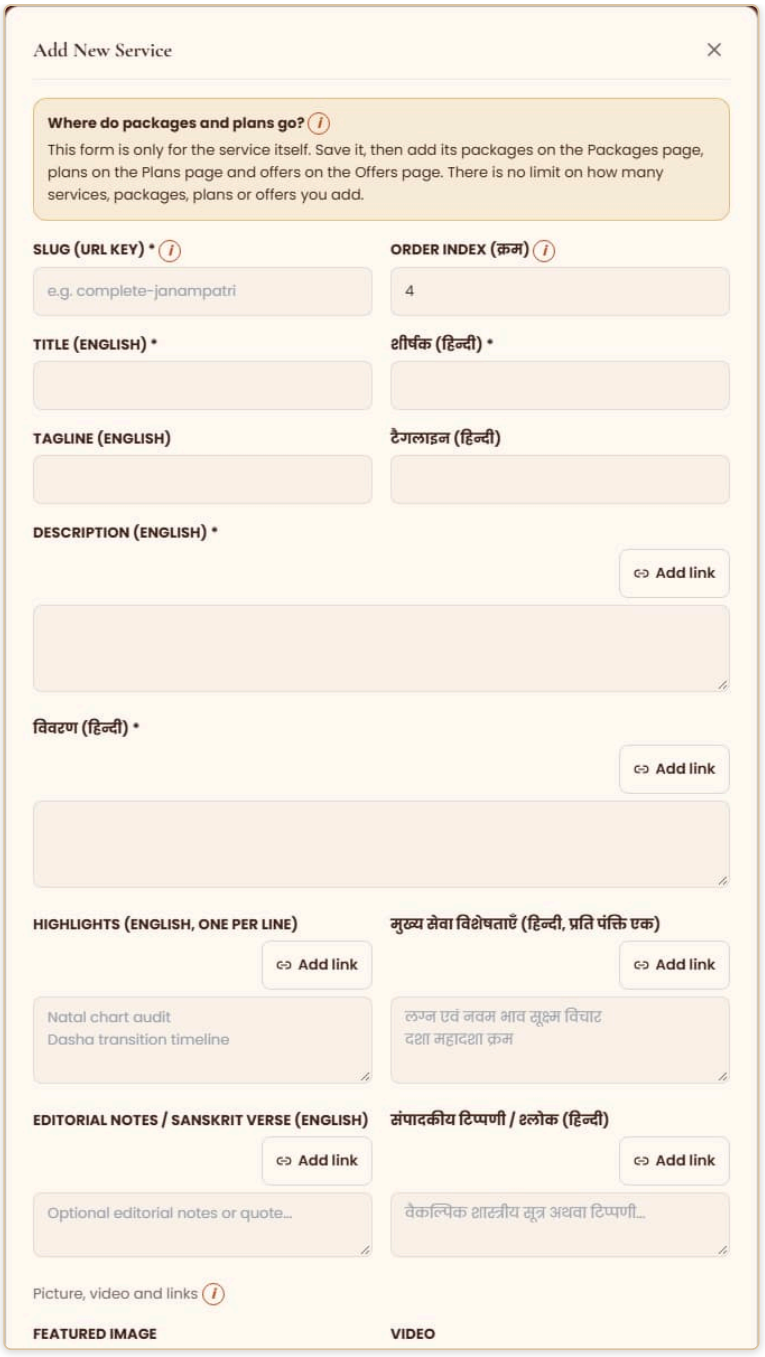

Tip: A customer chooses **service** → **package** → **plan** while booking. To avoid confusing new customers, keep only 2-3 packages per service and 2-3 plans per package.

5.2 Step 1: Services

Menu: **1. Services**. This lists all services, with an **ADD SERVICE** button on top. Each service has three buttons: **Edit**, **Deactivate** (hide from the website) and **Remove** (delete permanently).

The list of services.

The 'Add New Service' form (top part).

All fields of the service form

Field	What to enter	Example / rule
SLUG (URL KEY) *	The short name in the web address. English lower-case letters, numbers and dashes only	complete-janampatri → on the site `/services/complete-janampatri`
ORDER INDEX	A small number; lower shows first	1, 2, 3 ...
TITLE (ENGLISH) * and the Hindi title	The service name in both languages	Complete Janampatri

Field	What to enter	Example / rule
TAGLINE (English / Hindi)	One line under the name	Natal chart audit
DESCRIPTION * (English / Hindi)	The full introduction	3-4 sentences
HIGHLIGHTS (ONE PER LINE)	Main points. **One point per line**	Dasha transition timeline ⏎ ...
EDITORIAL NOTES / SANSKRIT VERSE	Optional verse or note	Optional
FEATURED IMAGE	The service picture: upload a file or paste a link	A wide, clear picture
VIDEO	A YouTube, Vimeo, Google Drive or .mp4 link, or upload a video below	Optional
PAID ON ANOTHER WEBSITE (OPTIONAL)	If this service is paid for on a partner website, put its address and a notice (English/Hindi). The 'Book' button then opens that link	https://partner-website.com
ITINERARY / STEP-BY-STEP SCHEDULE	A step-by-step programme (mainly for pujas/tours)	Day 1: Sankalp & Ganesh puja
PUJA SAMAGRI / REQUIRED MATERIALS	List of materials needed	Gangajal, roli, akshat ...
Service is Active	When off the service disappears from the website	—
Demo link / picture / video / social media account	Buttons to add a 'demo': a sample of the service	Optional

Step by step: adding a new service

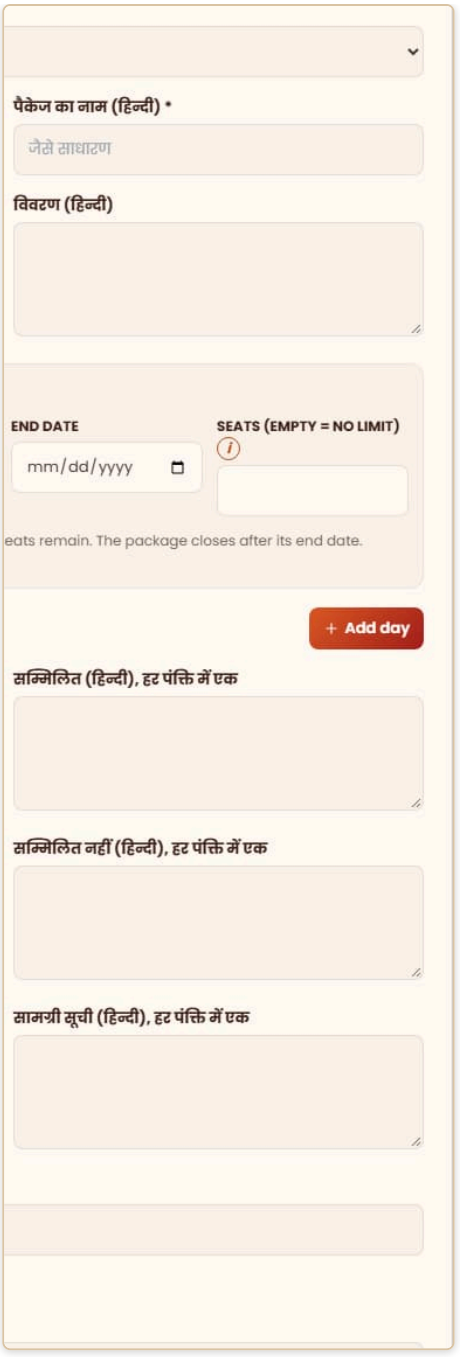

1. Open **1. Services** and press **ADD SERVICE**.
2. Fill in the SLUG, the titles and descriptions in both languages. Add a picture.
3. Press **SAVE SERVICE**. The service appears in the list.
4. Open the public portal and check that the card shows on the 'Services' page.
5. A customer can book a service only when it has at least one **active plan**, so do the next steps (package, then plan).

> **Caution: Changing the SLUG later changes the service's web address.** Old links (shared on WhatsApp or Google) will stop working. Do not change it unless you must.

> **Caution: Remove is permanent** and takes the service's packages and plans with it. If orders already exist for a service, choose **Deactivate** instead.

5.3 Step 2: Packages

Menu: **2. Packages**. At the top pick the **service** whose packages you want to see or add, then press **ADD PACKAGE**. Each package has **Edit** and **Remove**. By changing 'UNDER WHICH SERVICE' you can also move a package to another service.

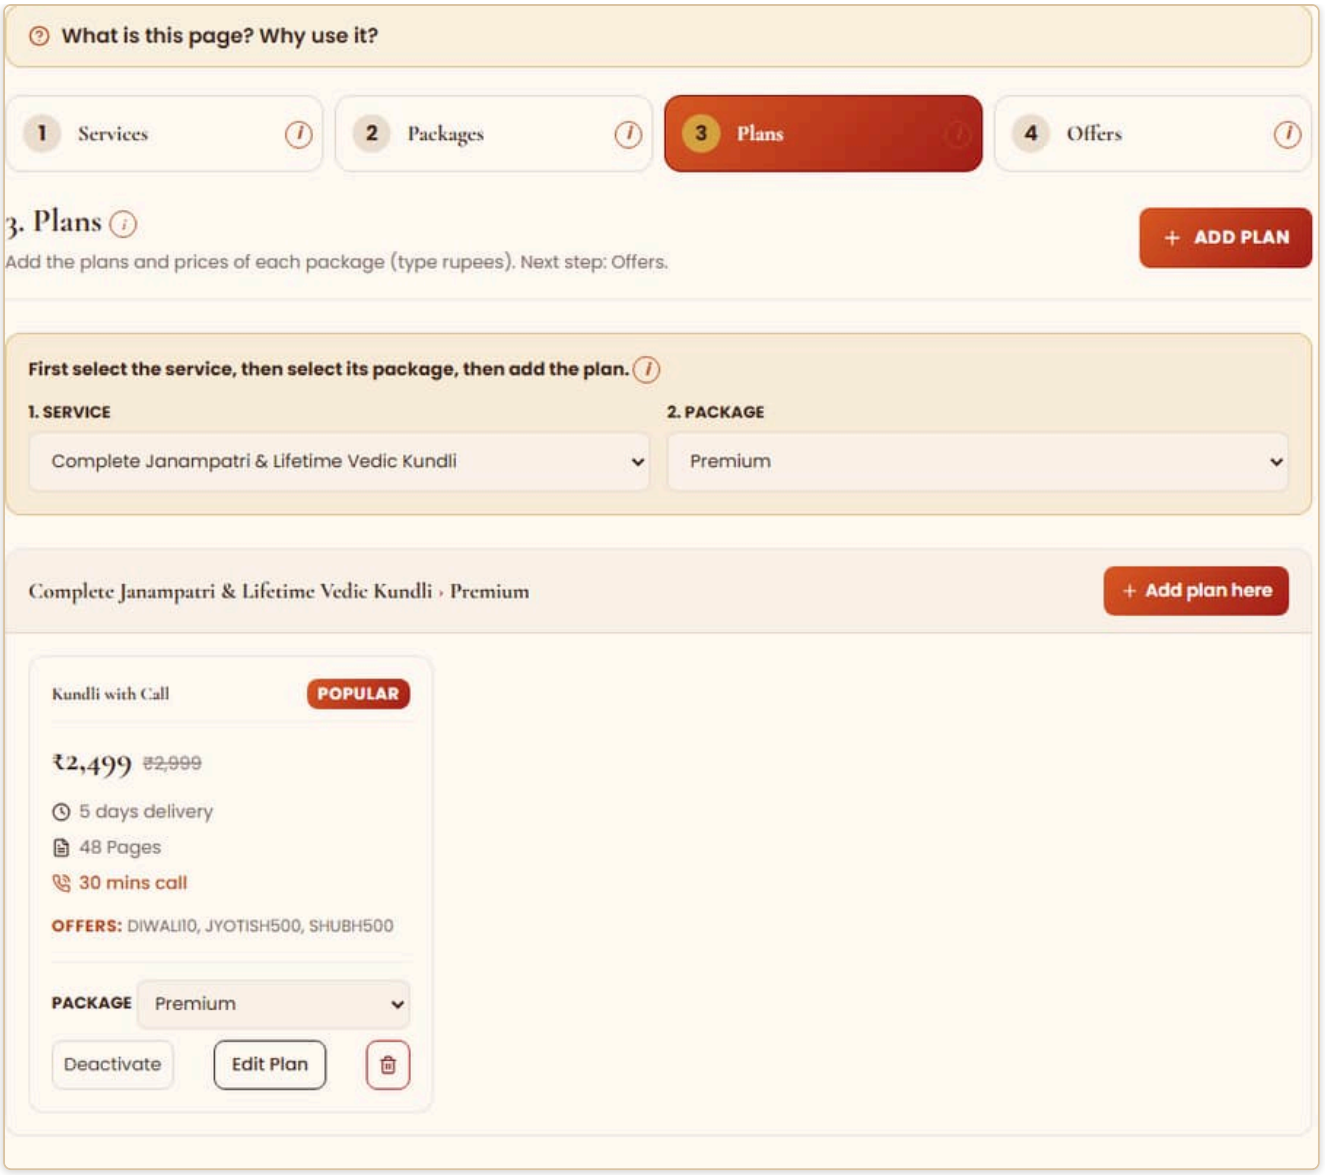

The Add Package form.

Field	What to enter
UNDER WHICH SERVICE *	The package's parent service
PACKAGE NAME * (English / Hindi)	Package name (for example Standard)
DETAILS / DESCRIPTION	A short description
NUMBER OF DAYS, START DATE, END DATE	For services with a duration, like tours and rituals. Leave empty for an ordinary Kundli

Field	What to enter
SEATS (EMPTY = NO LIMIT)	The most bookings this package can take. Empty = unlimited. When the number is reached, the package closes for booking automatically
INCLUSIONS / EXCLUSIONS / MATERIAL LIST	What is included, what is not, and what to bring. **One point per line**
Add day (daily programme)	Builds a day-by-day programme: a title and details for each day
PACKAGE IMAGE / VIDEO	Picture and video
SLUG (URL KEY, AUTO IF EMPTY)	If left empty it is made from the English name
ORDER, Package is active	Display order and on/off

5.4 Step 3: Plans (what the customer buys)

Menu: **3. Plans**. First choose the **service**, then the **package**, then press **ADD PLAN**. Each plan has **Edit Plan**, **Deactivate** and **Remove**.

The list of plans (after choosing service and package).

The Add New Plan Tier form.

Field	What to enter	Note
PACKAGE *	Which package the plan belongs to	Choose from the list
SLUG (URL KEY) *	A short English name such as `premium-call`	Unique within the package
ORDER INDEX	Display order	Lower first
PLAN TITLE * (English / Hindi)	The plan's name in both languages	For example: Kundli with Call

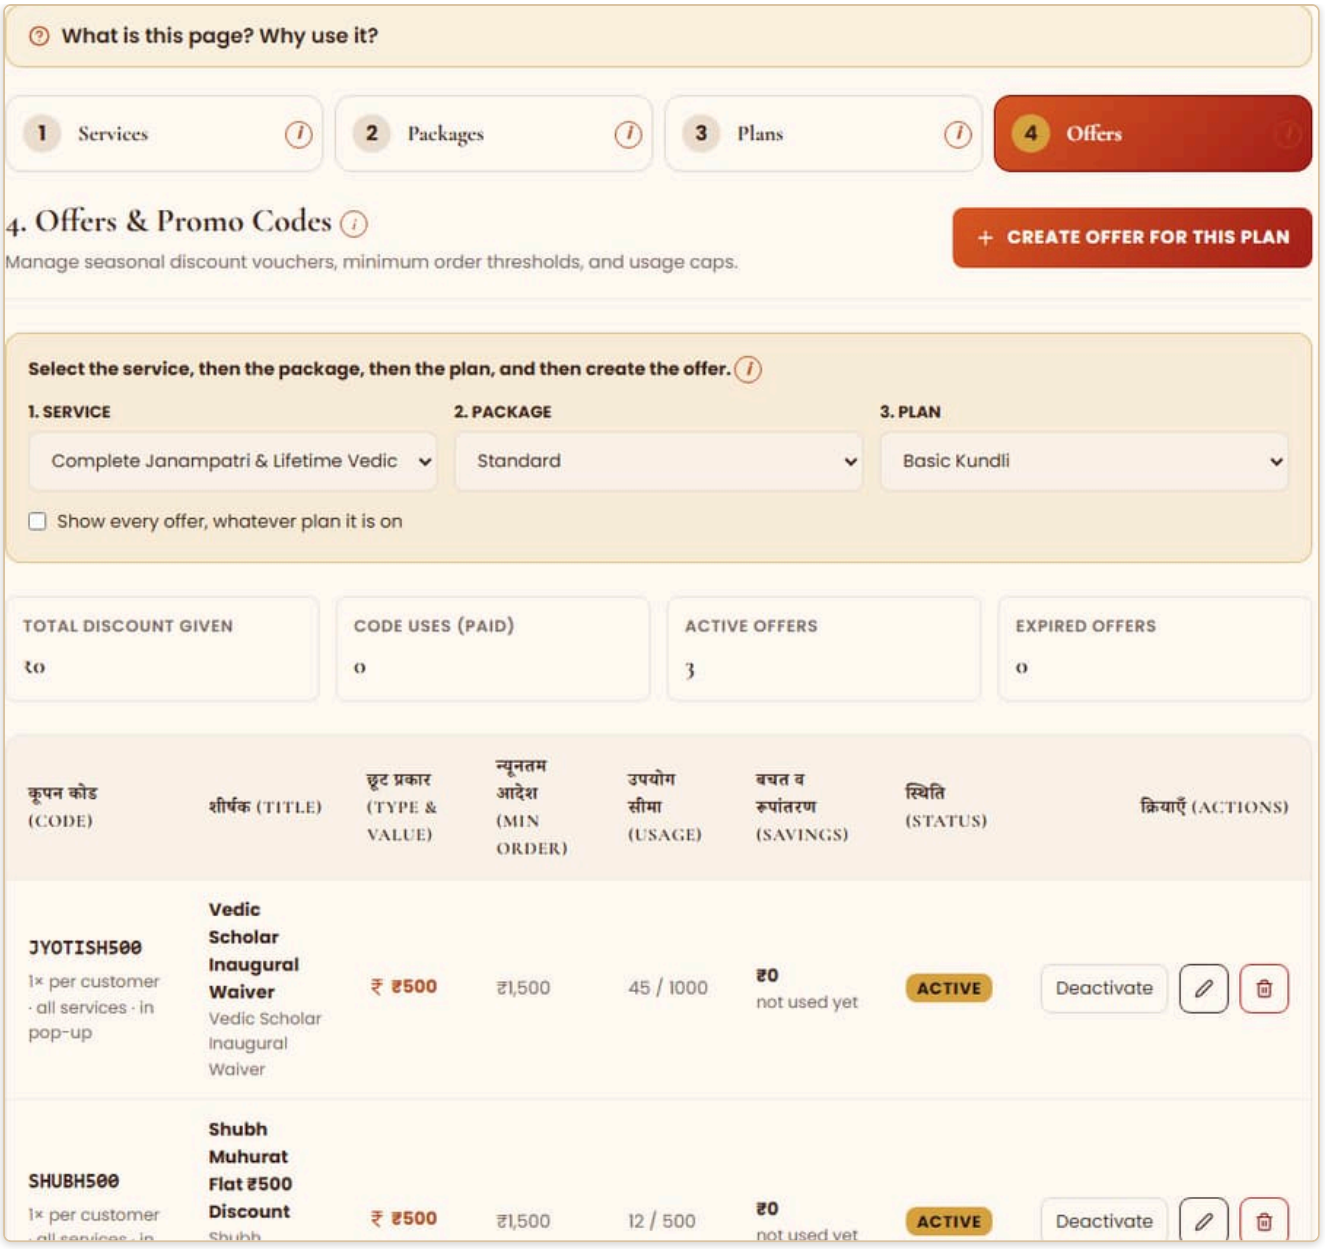

Field	What to enter	Note
PRICE (RUPEES) *	The plan's price **in rupees**	For example 2499. This is the price **before GST**; GST is added on the invoice
ORIGINAL PRICE (CUT-OFF)	A struck-through old price (optional)	For example 2999: the site shows ₹2999 struck through and ₹2499 as the real price
DELIVERY DAYS *	How many days the work takes	The customer sees this
PAGES (total)	Pages of the printed pothi	**Empty or zero = digital-only plan.** The order may then skip the 'dispatch' stages (3.4)
CALL DURATION (minutes)	If the plan includes a phone/video call, how long	Plans with a call let the customer pick a call slot
FEATURES (ONE PER LINE)	What the plan includes. **One point per line**	18-Page PDF, D1 + D9 Charts ...
PROGRAM / PREPARATION / SAMAGRI / SCHEDULE	Extra details for ritual-type plans	Leave empty for Kundli plans
PLAN IMAGE, VIDEO	Picture and video	Optional
Mark as Popular Tier	Shows a 'Popular' badge on the plan	Keep to one per package
Plan is Active	When off the plan is not offered for booking	Switch off to stop selling

> **Caution: Changing a plan's price does not change old orders.** They keep the price they were booked at. The new price applies only to new bookings.

> **Tip:** To cut a price for a festival, create an **Offer** (5.5) instead of editing the plan's price. When the offer's end date passes, the price returns by itself and you do not have to remember anything.

5.5 Step 4: Offers (promo codes and automatic discounts)

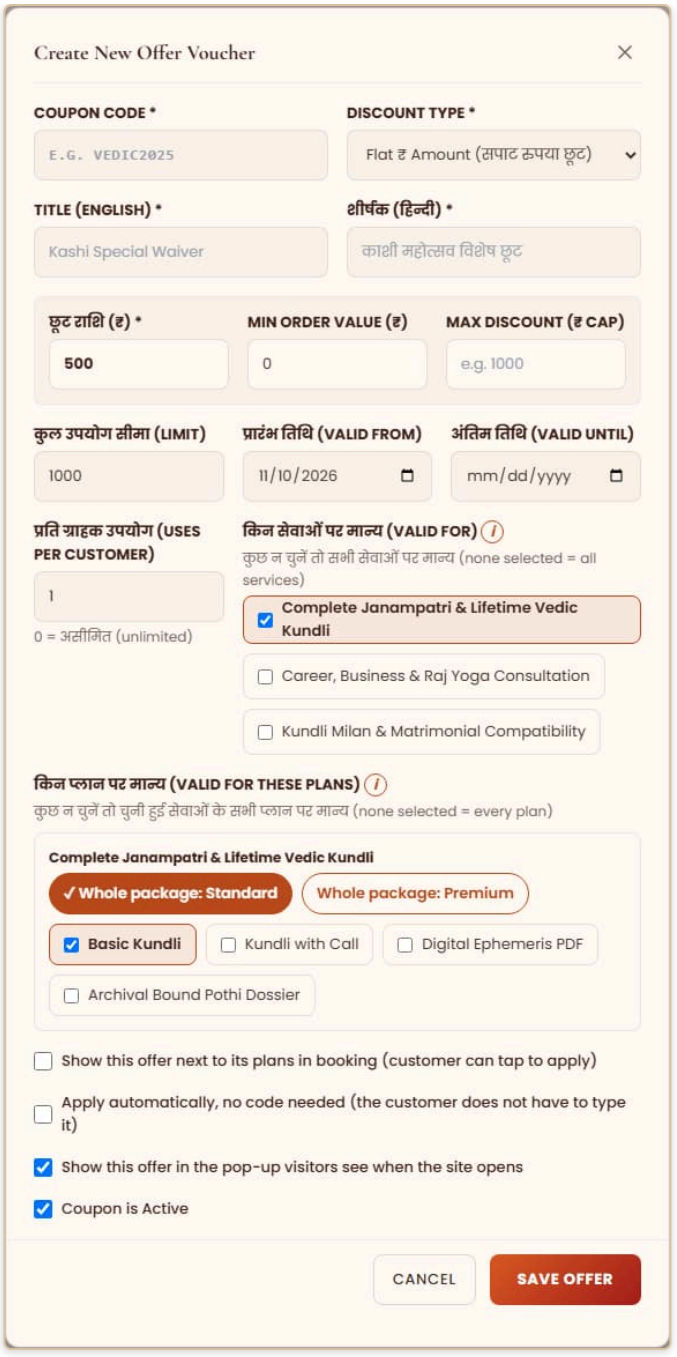

Menu: **4. Offers (promo codes)**. An offer attaches to a **plan** or to a **whole package**.

The Offers page: after choosing 1. Service, 2. Package and 3. Plan you see that plan's offers.

How to create an offer

1. At the top choose **1. SERVICE**, **2. PACKAGE** and **3. PLAN**. (To see **every offer at once**, tick **'Show every offer, whatever plan it is on'**.)
2. Press **CREATE OFFER FOR THIS PLAN**.
3. Fill in the form (table below) and press **SAVE OFFER**.
4. The new code appears in the list. Open the public portal and test it in booking.

The Create New Offer Voucher form.

Field	What to enter	Tip
COUPON CODE *	The code the customer types	Short, in capitals, easy to remember: DIWALI10. Each code is unique
DISCOUNT TYPE *	**Flat ₹ Amount** or **Percentage %**	—
TITLE (English / Hindi)	The offer name the customer sees	Diwali 10% off
Discount amount (₹)	Rupees for a flat offer; the number (for example 10) for a percentage offer	—

Field	What to enter	Tip
MIN ORDER VALUE (₹)	The offer applies only if the order is at least this much	Empty = no limit
MAX DISCOUNT (₹ CAP)	For percentage offers, the most discount that can be given	For example never more than ₹500
TOTAL USAGE LIMIT	How many times the code can be used in total	Empty = unlimited. It stops by itself when reached
VALID FROM / VALID UNTIL	The start and end of the offer	Always set an end date
USES PER CUSTOMER	How many times one customer can use it	0 = unlimited
The plan check-boxes and **Whole package: …**	Which plans the offer applies to. 'Whole package' applies to all plans of that package	Nothing chosen = all
Show this offer next to its plans in booking	The customer can apply it with one tap	—
Apply automatically, no code needed	The customer does not type a code; the discount is added by itself	Good for public sales
Show this offer in the pop-up visitors see when the site opens	Shows the offer in a small window when the site opens	Pop-up settings are in 'Website settings → Offers pop-up'
Coupon is Active	On / off	—

The columns of the offer list

CODE · TITLE · TYPE & VALUE · MIN ORDER · USAGE (for example '12 / 100': used 12 times of 100) · **SAVINGS** (how much discount customers got from this offer and how many orders it brought) · **STATUS · ACTIONS** (Deactivate / Remove offer). A **'Total discount given'** figure is shown above the list. This tells you which offer is really working and what it cost.

> **Caution: Deactivate** stops an offer but keeps its record and accounts. If orders already used an offer, deactivate it rather than removing it.

5.6 Starting a whole new service: all steps at a glance

1. **1. Services** → ADD SERVICE → fill in → SAVE SERVICE.

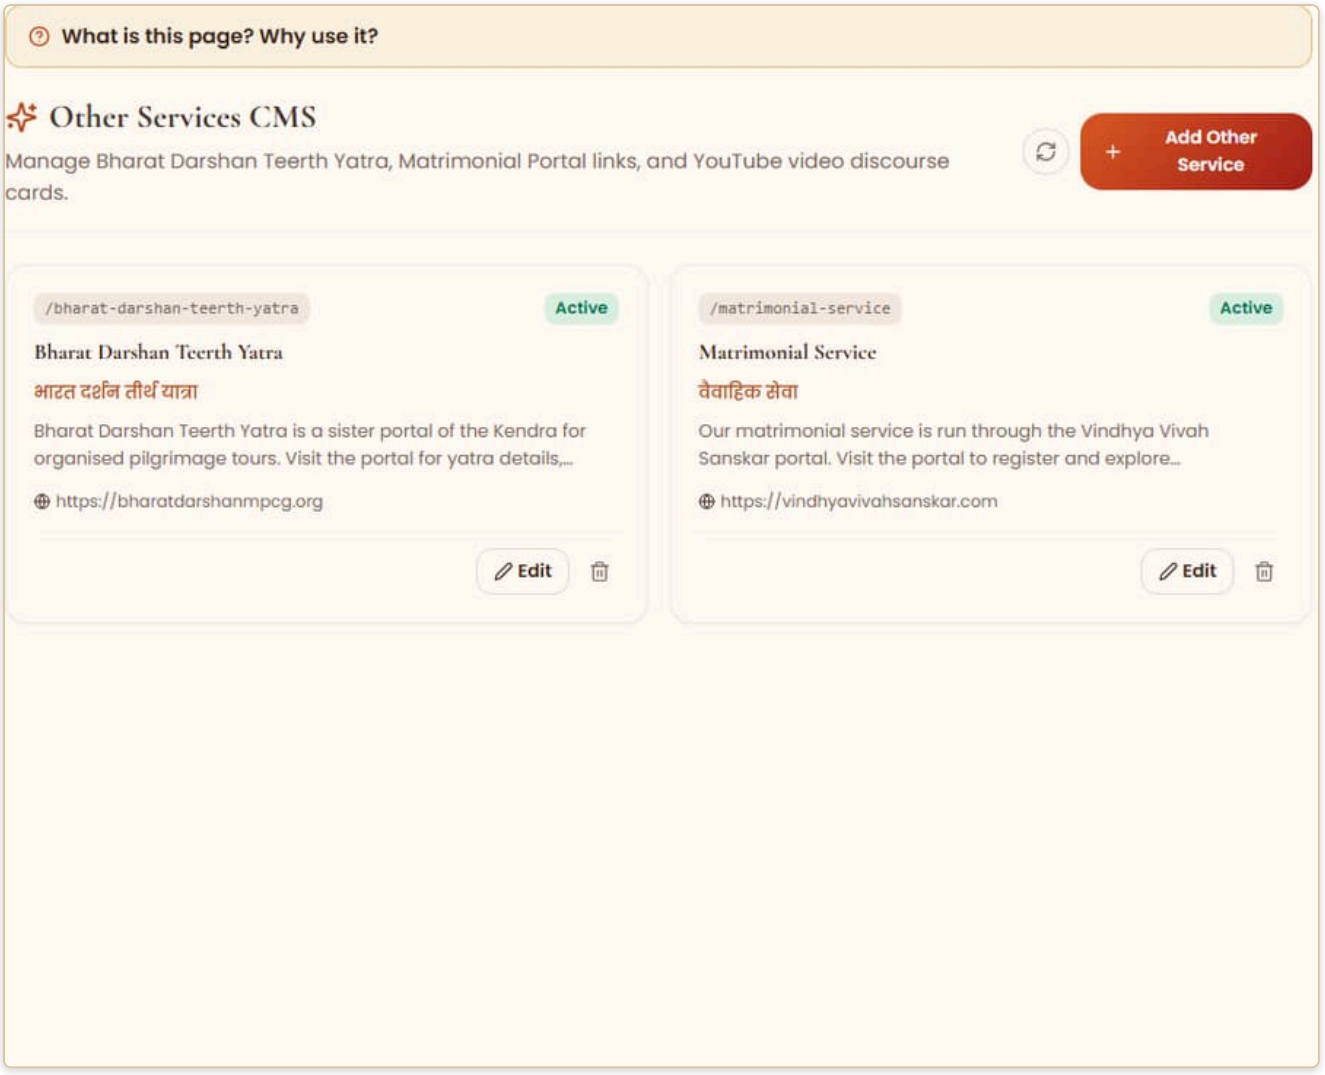

2. **2. Packages** → choose that service → ADD PACKAGE → fill in → SAVE PACKAGE.
3. **3. Plans** → choose service and package → ADD PLAN → enter the price → SAVE PLAN.
4. **4. Offers** (optional) → choose the plan → create an offer.
5. Open the **public portal** and walk the whole route from service to booking yourself (from your own mobile; stop before the final payment).
6. If it looks right, change the service's card or heading under **Website settings** → **Home page** if needed.

6 Other services, call bookings and appointment slots

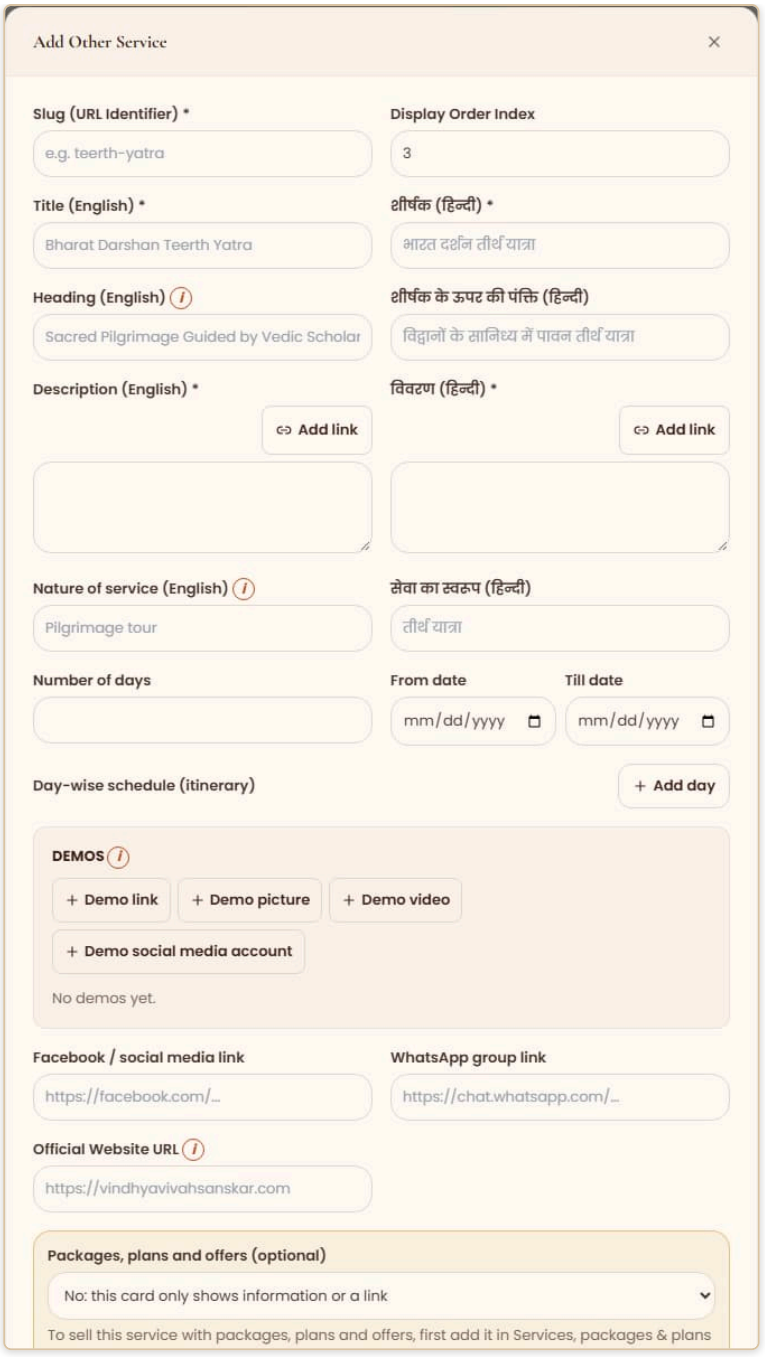

Services that live on partner websites, and fixing the time for phone consultations.

6.1 Other services

Menu: **Other services**. Here you build the cards that show on the site's **'Other Services' page**, such as Bharat Darshan Teerth Yatra or Matrimony (a sister portal). They inform and send the customer with a **'Book Now'** button to the partner website. Payment does not happen here.

The cards of other services. 'Edit' on each card.

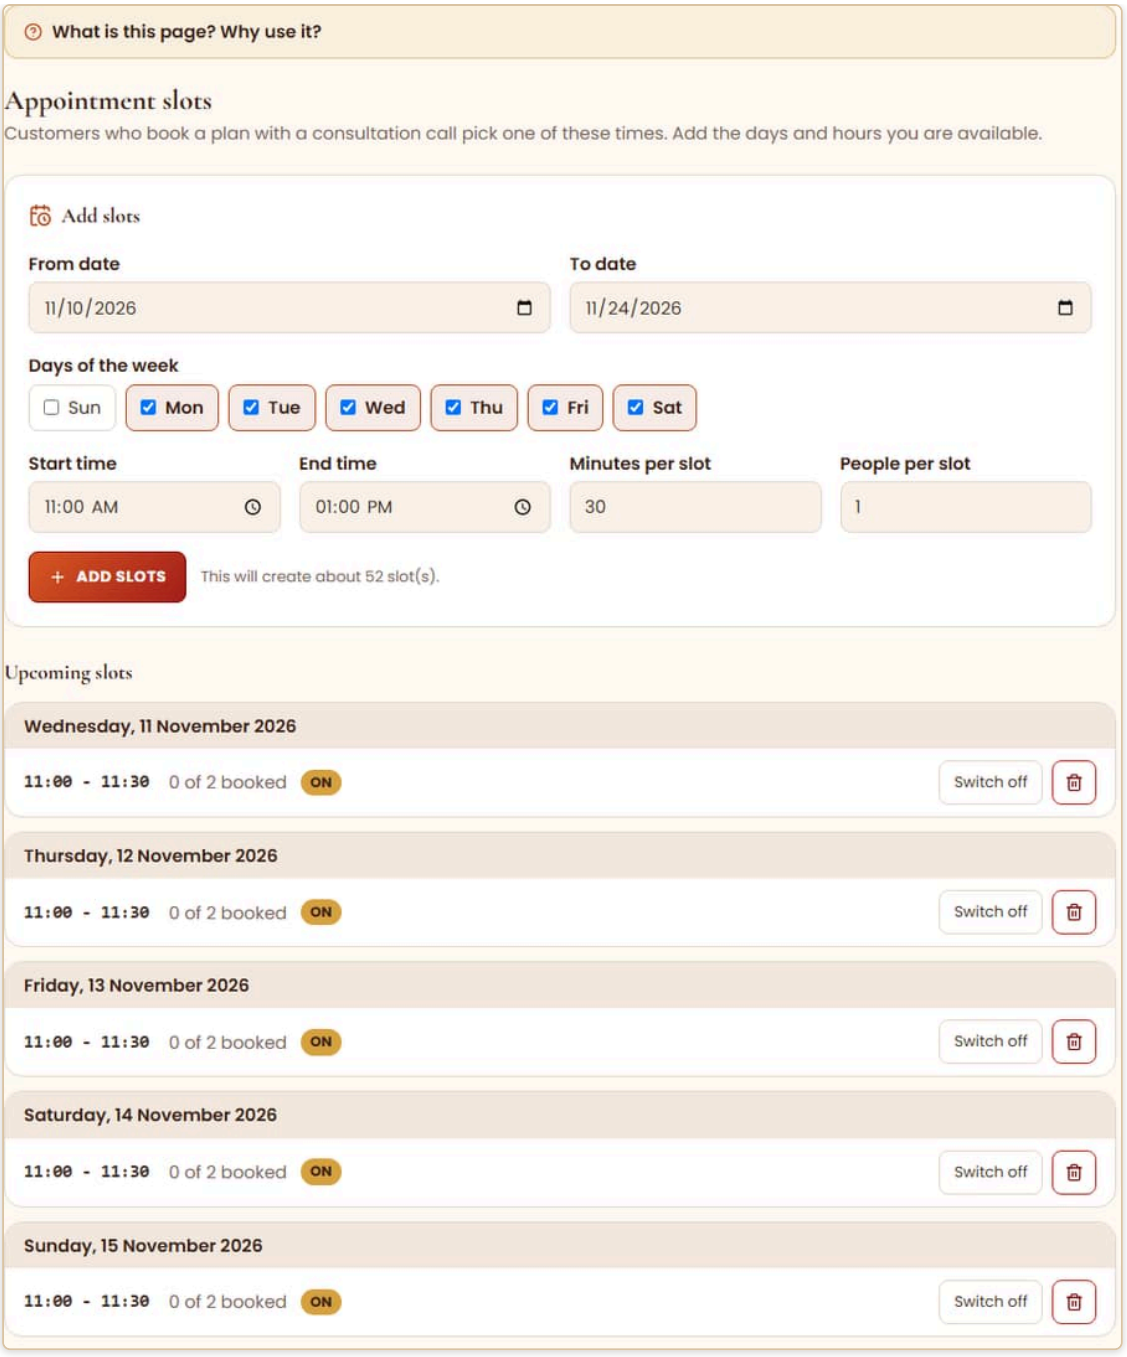

The Add Other Service form (top part).

Field	What to enter
Slug (URL Identifier) *	A short English name, such as `teerth-yatra`
Display Order Index	Display order (lower first)
Title (English) and Hindi title	The card's name
Heading	The small line above the title (for example 'Sacred Pilgrimage Guided by Vedic Scholars')
Description * (English / Hindi)	The description

Field	What to enter
Nature of service	The kind of service: for example 'Pilgrimage tour'
Number of days, From date, Till date	The duration of the trip or event
Facebook / social media link, WhatsApp group link	Links the customer can use to join
Official Website URL	The partner site, where 'Book Now' leads
Button text	What the button says (for example Visit Sister Portal)
Packages, plans and offers (optional)	To tie this card to one of our own services, pick it here: the button then opens our service page. Choose 'No: this card only shows information or a link' to keep it a plain info/link card
Add day (day-wise programme)	Add days and write each day's programme
IMAGE, YOUTUBE VIDEO LINK	Picture and video
Active (Visible publicly)	When off, the card is hidden from the site

6.2 Appointment slots: opening call times

Menu: **Appointment slots**. A customer can book a call only at times **you have opened** here. So create the slots first.

The Appointment slots page and the list of upcoming slots.

Step by step: creating slots for many days at once

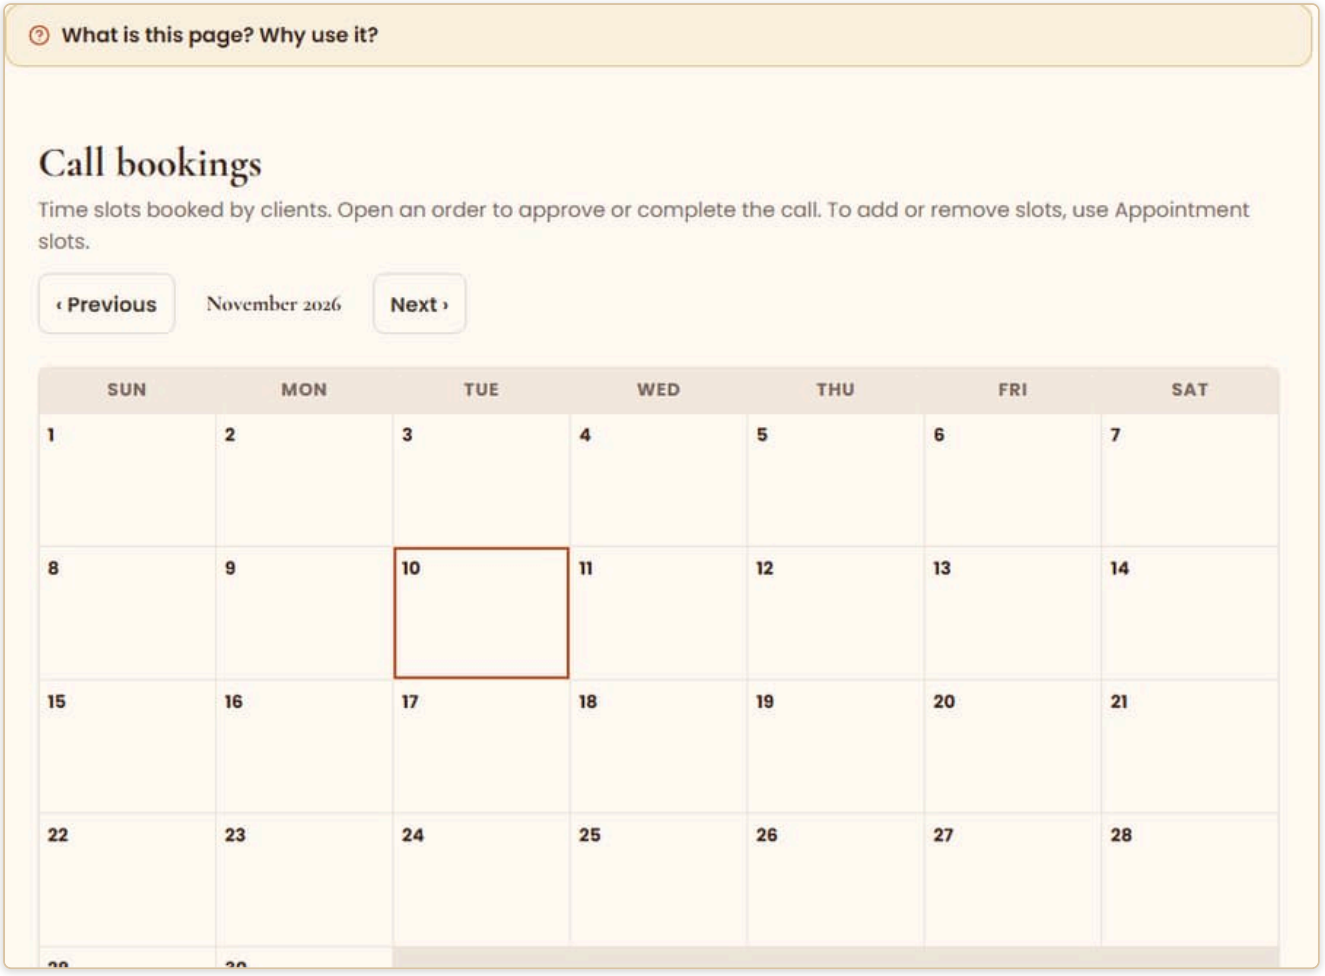

1. Choose a **From date** and a **To date**, for example 15 to 30 November.
2. **Tick the weekdays** you are available: Sun, Mon, Tue, Wed, Thu, Fri, Sat.
3. Fill in **Start time** and **End time**, for example 10:00 to 13:00.
4. Fill in **Minutes per slot** (for example 30) and **People per slot** (for example 1: one customer at a time).
5. Press **ADD SLOTS**. 30-minute slots are made for every chosen day.

Below is the **Upcoming slots** list. Each slot has two choices: **Switch off** (no new customer can pick it, for example when you are on leave) and **Delete slot**.

> **Caution:** Before you switch off or delete a slot that a customer has already booked, talk to the customer and check the appointment status in the order panel.

6.3 Call bookings: the calendar

Menu: **Call bookings**. This is a **month calendar** that shows the calls customers have booked, by date. Each call shows the **customer (Jataka) name and the time**. Use the buttons at the top to see the previous or next month.

The Call bookings month calendar.

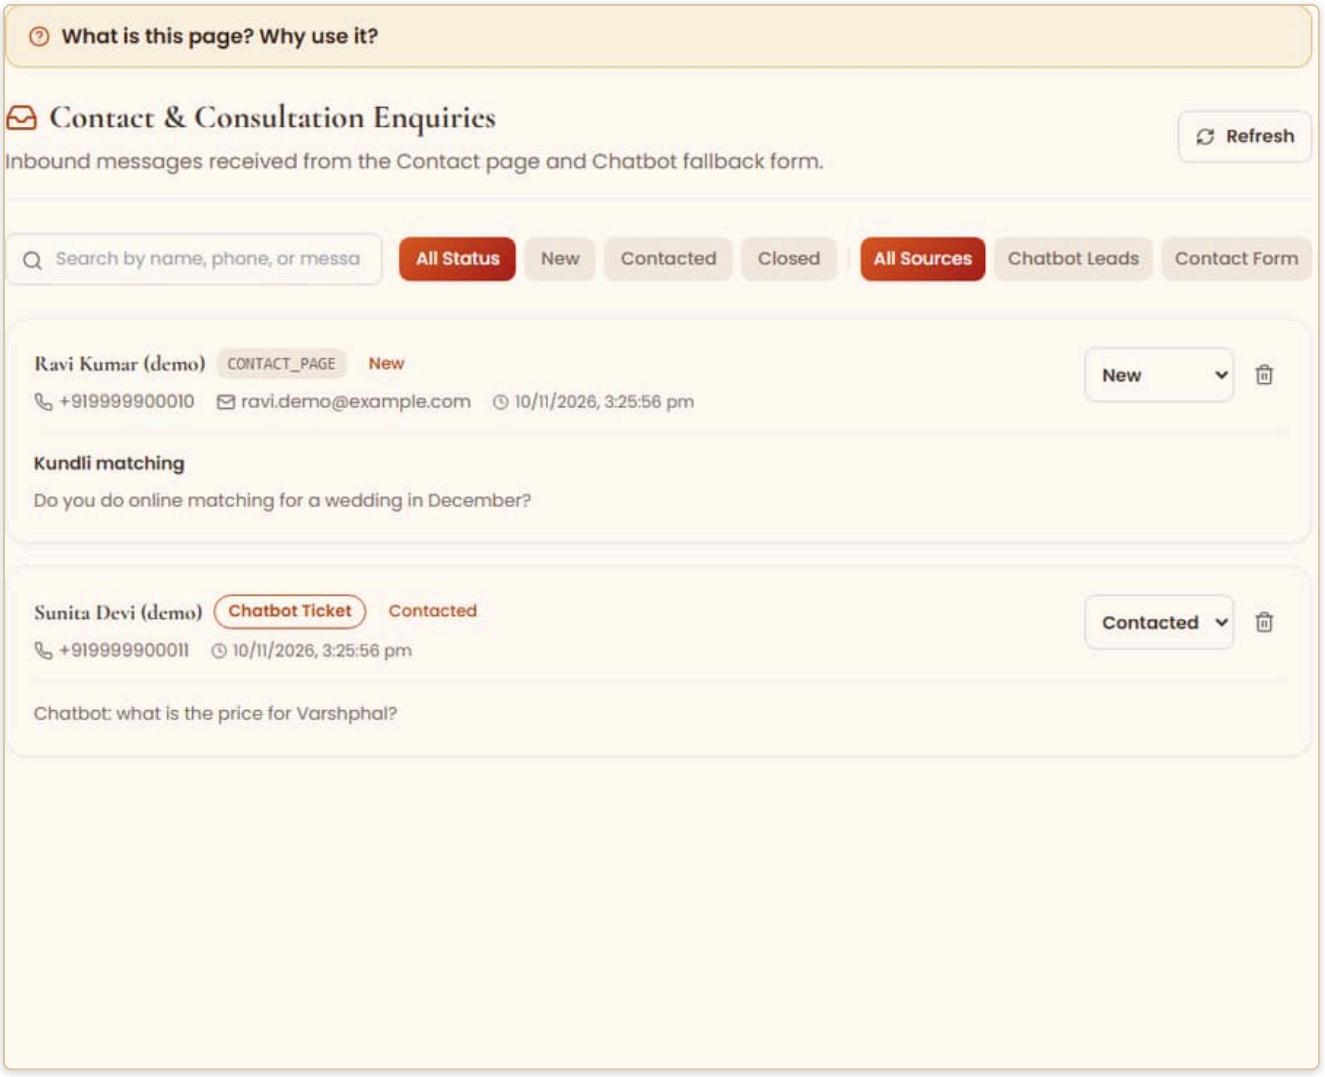

- Look every morning at **which customers you must call today** (the dashboard also shows 'Calls scheduled today').
- To change or cancel a call, open that customer's order on **Orders** and use **Appointment → Approve / Reject / Complete** (chapter 3.6).

7 Messages: WhatsApp chats, support tickets and enquiries

Customers reach you in three ways. See and answer all three on separate pages.

7.1 Enquiries

Menu: **Enquiries**. Messages from the site's **Contact form**, the **chatbot** and the service enquiry window land here. They are leads (possible customers).

The list of enquiries.

Part	What it does
Search box	Search by name, phone or words in the message

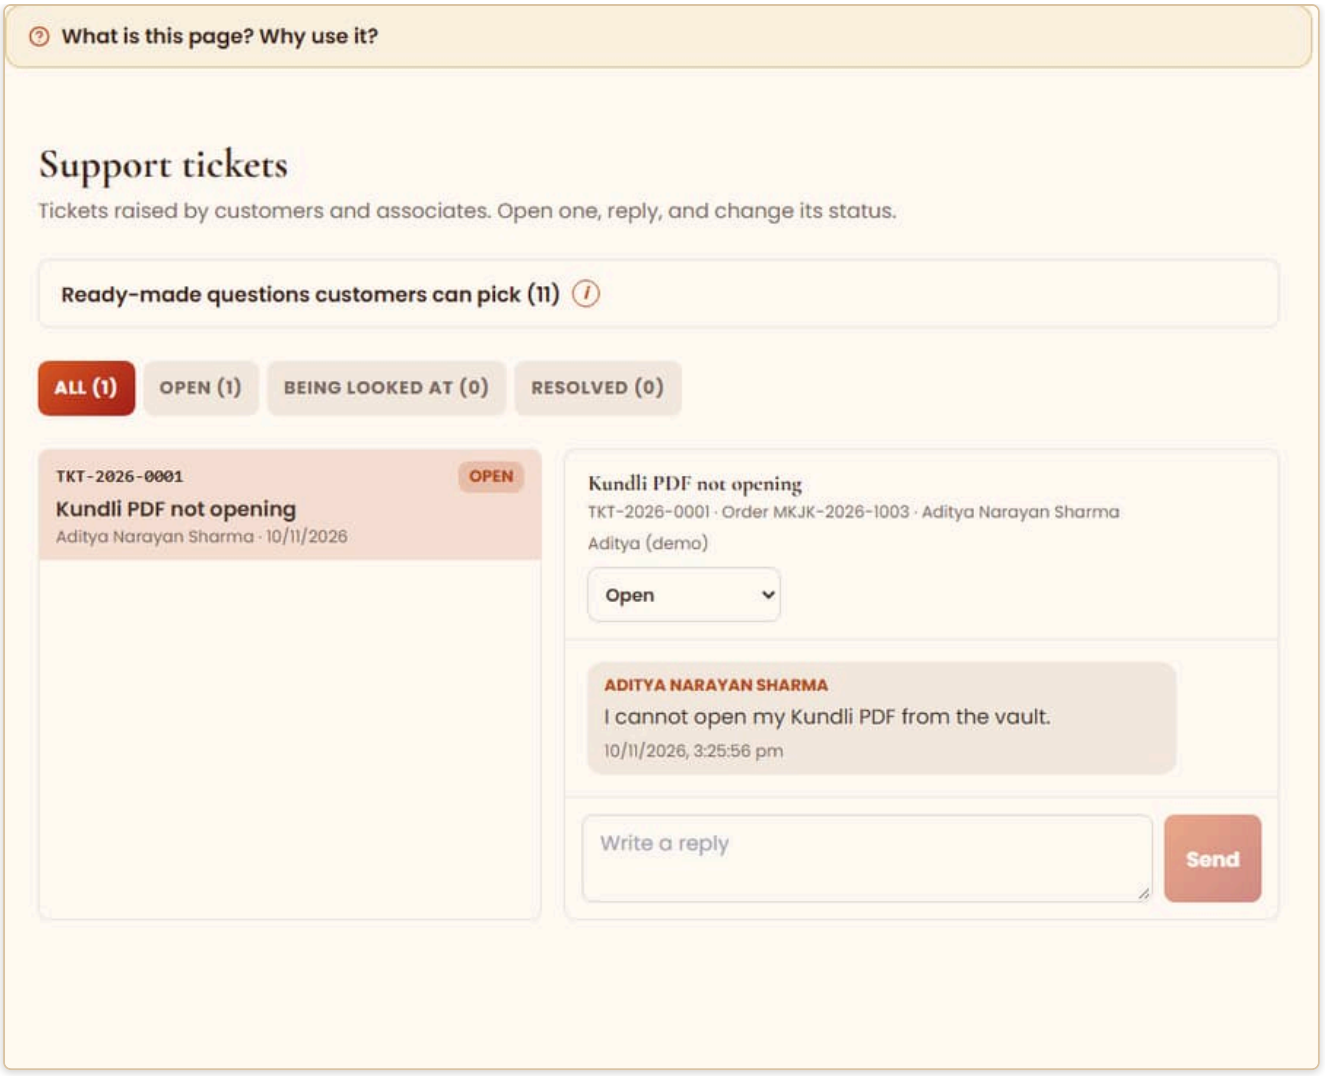

Part	What it does
All Status / New / Contacted / Closed	Filter messages by their status
All Sources / Chatbot Leads / Contact Form	Where the message came from: the chatbot or the Contact page form
Refresh	Reload the list to see new messages
Lead status on each message	New → Contacted → Closed, in that order

How to work through them

1. Twice a day (morning and evening) look at messages with status **New**.
2. Contact the customer on the number given, by phone or WhatsApp.
3. As soon as you have contacted them set the status to **Contacted**, so another assistant does not ring the same person again.
4. When the matter is finished set it to **Closed**. The dashboard's 'Open enquiries' number falls accordingly.

7.2 Support tickets

Menu: **Support tickets**. Customers and associates raise 'help' requests from their account. Each request is a **ticket** (for example TKT-2026-0001) holding the whole conversation.

An opened ticket: the conversation, the reply box and the status.

Answering a ticket

1. At the top choose **ALL / OPEN / BEING LOOKED AT / RESOLVED** to filter tickets.
2. Press a ticket. The customer's question and the conversation so far appear.
3. Write in the reply box and press **Send**. The customer sees the reply in their account.
4. Change the status: **Open** (new) → **Being looked at** (you are on it) → **Resolved** (the problem is sorted).

Changing the 'ready-made questions'

At the very top are the **ready-made questions** a customer can pick from when raising a ticket. There are 11 by default, such as: 'My payment is not confirmed yet', 'Money was deducted but the booking failed', 'I need my invoice or GST bill', 'My Kundli / report is delayed', 'I want a refund or cancellation', 'I want to upgrade my plan', 'I cannot sign in to my account', and, for associates, 'Question about my commission or payout'. To change them:

- Each question has two fields: **Question (English)** and the Hindi one. Edit them.

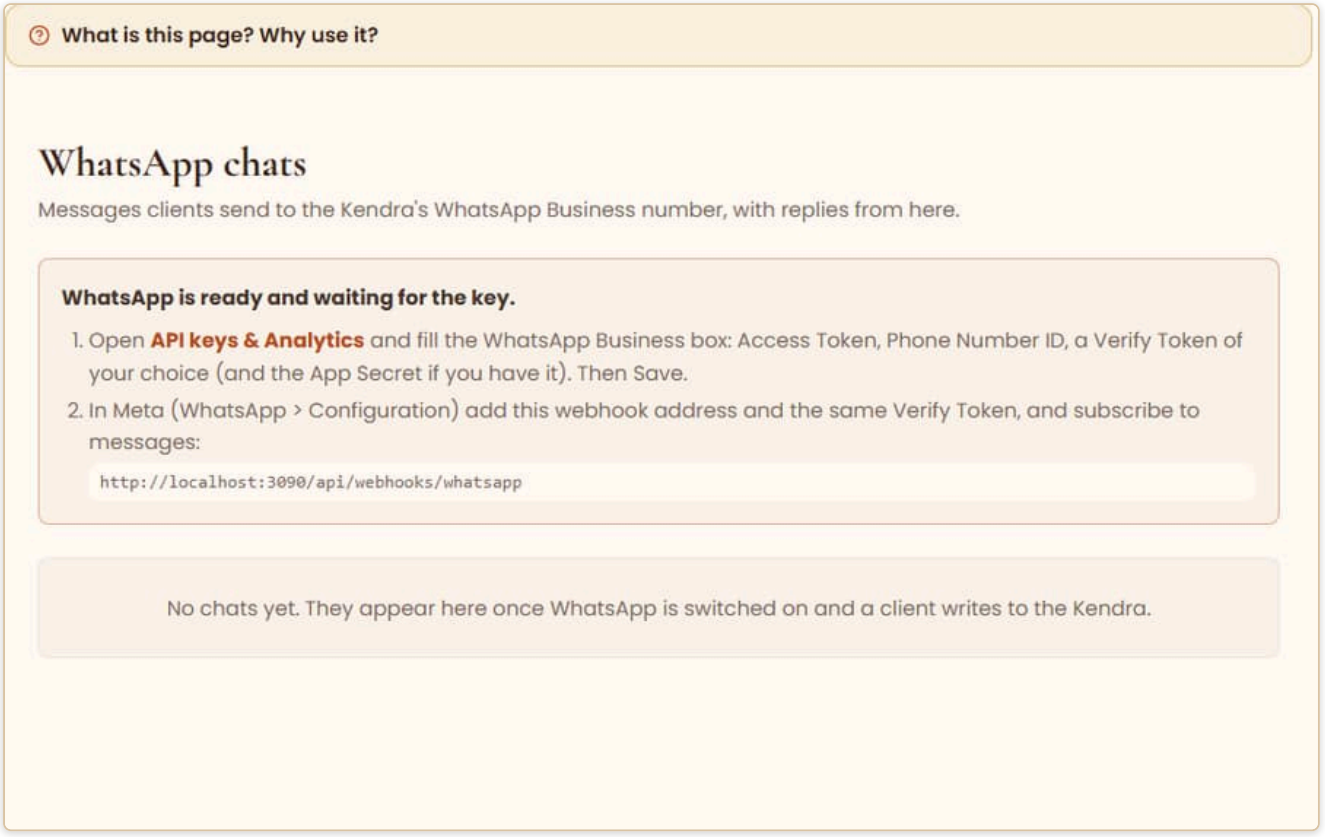

- **Move up / Move down** change the order; **Remove question** deletes; **Add a question** adds a new one.
- Then press **Save**. If something goes wrong **Restore standard questions** brings back the original list.

> **Tip:** Answer a ticket within 24 hours and set it to **Resolved** the moment it is done. This keeps the dashboard's 'Open support tickets' figure honest.

7.3 WhatsApp chats

Menu: **WhatsApp chats**. Messages that reach the Kendra's **business WhatsApp number** appear here in one place, and you can reply from here.

> **Note:** This page works only when all four keys under **API keys & Analytics → WhatsApp Business** are saved (chapter 12.2) and the webhook is connected in the Meta (WhatsApp Business) account. The developer does this set-up. If the keys are empty, this page stays empty.

The WhatsApp chats page (chats appear here once the keys are saved).

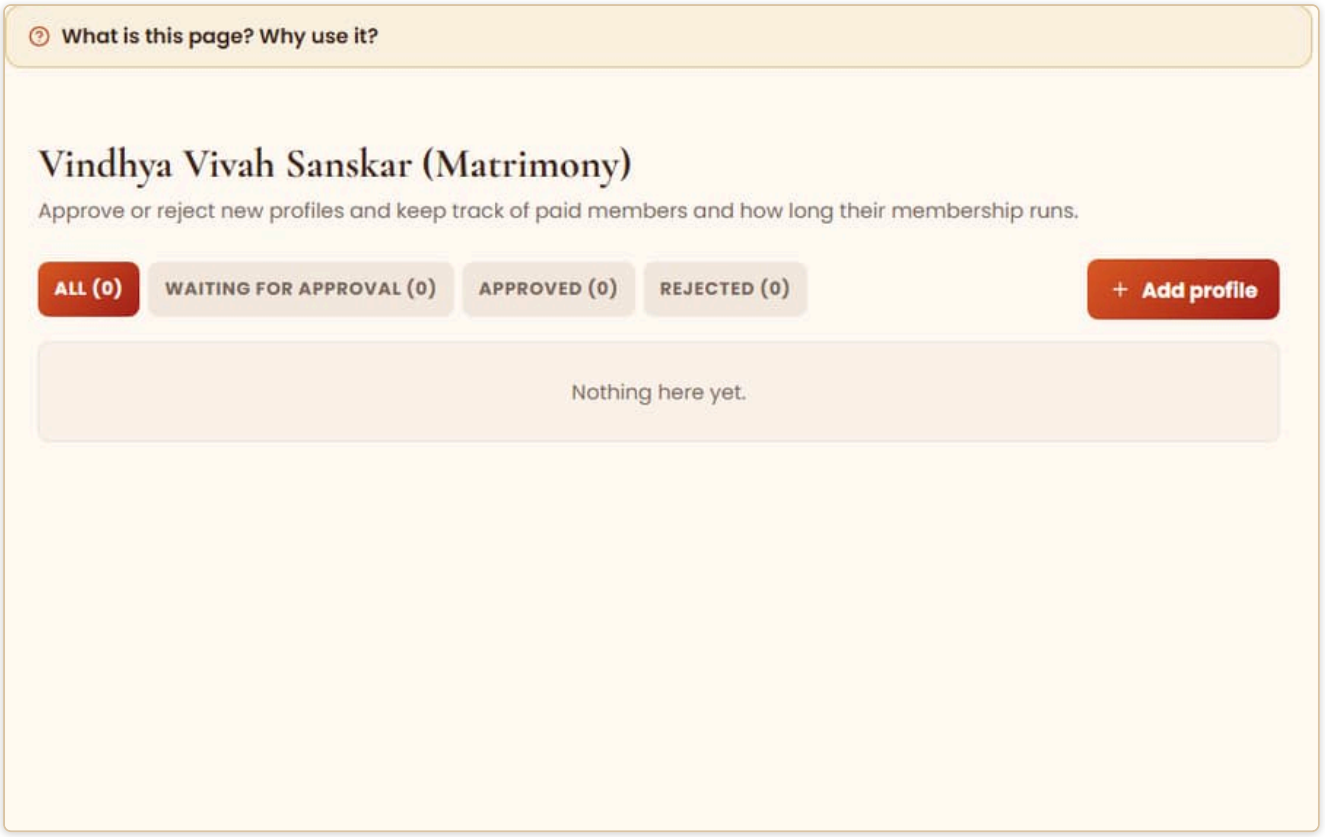

> **Tip:** The green **WhatsApp button** at the bottom right of the site is separate from this page. It lets a visitor open WhatsApp straight to your number. Its number and first message are changed in 'Website settings → Floating buttons'.

8 Sister services: Matrimony, Pilgrimage & tours, Tax desk

The records and progress of the Kendra's three extra services are kept here.

8.1 Matrimony (Vindhya Vivah Sanskar)

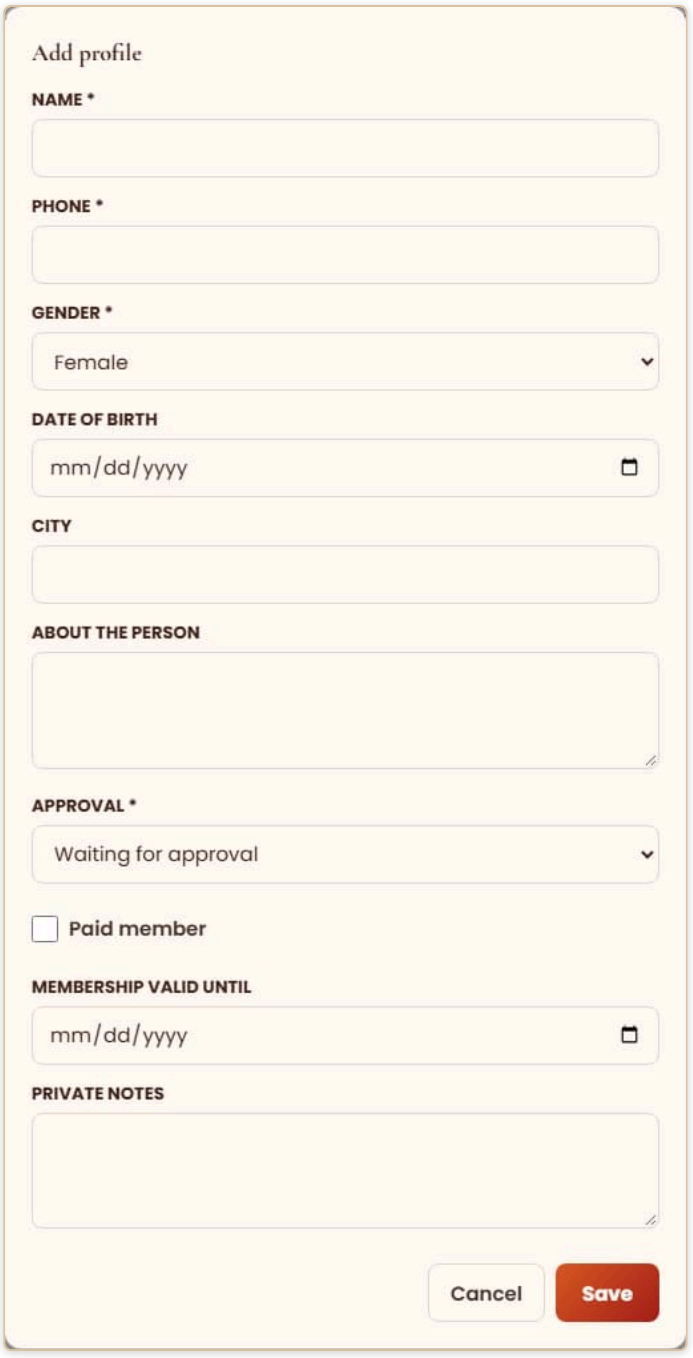

Menu: **Sister services** → **Matrimony**. Here is the list of marriage **profiles** that you approve or reject, and where you record **paid members** and their membership dates.

The Matrimony page.

- The buttons at the top filter profiles by status: **ALL · WAITING FOR APPROVAL · APPROVED · REJECTED** (each shows its count).
- **WAITING FOR APPROVAL** profiles are held for checking. Look at these daily.

Adding or editing a profile

The Add profile form.

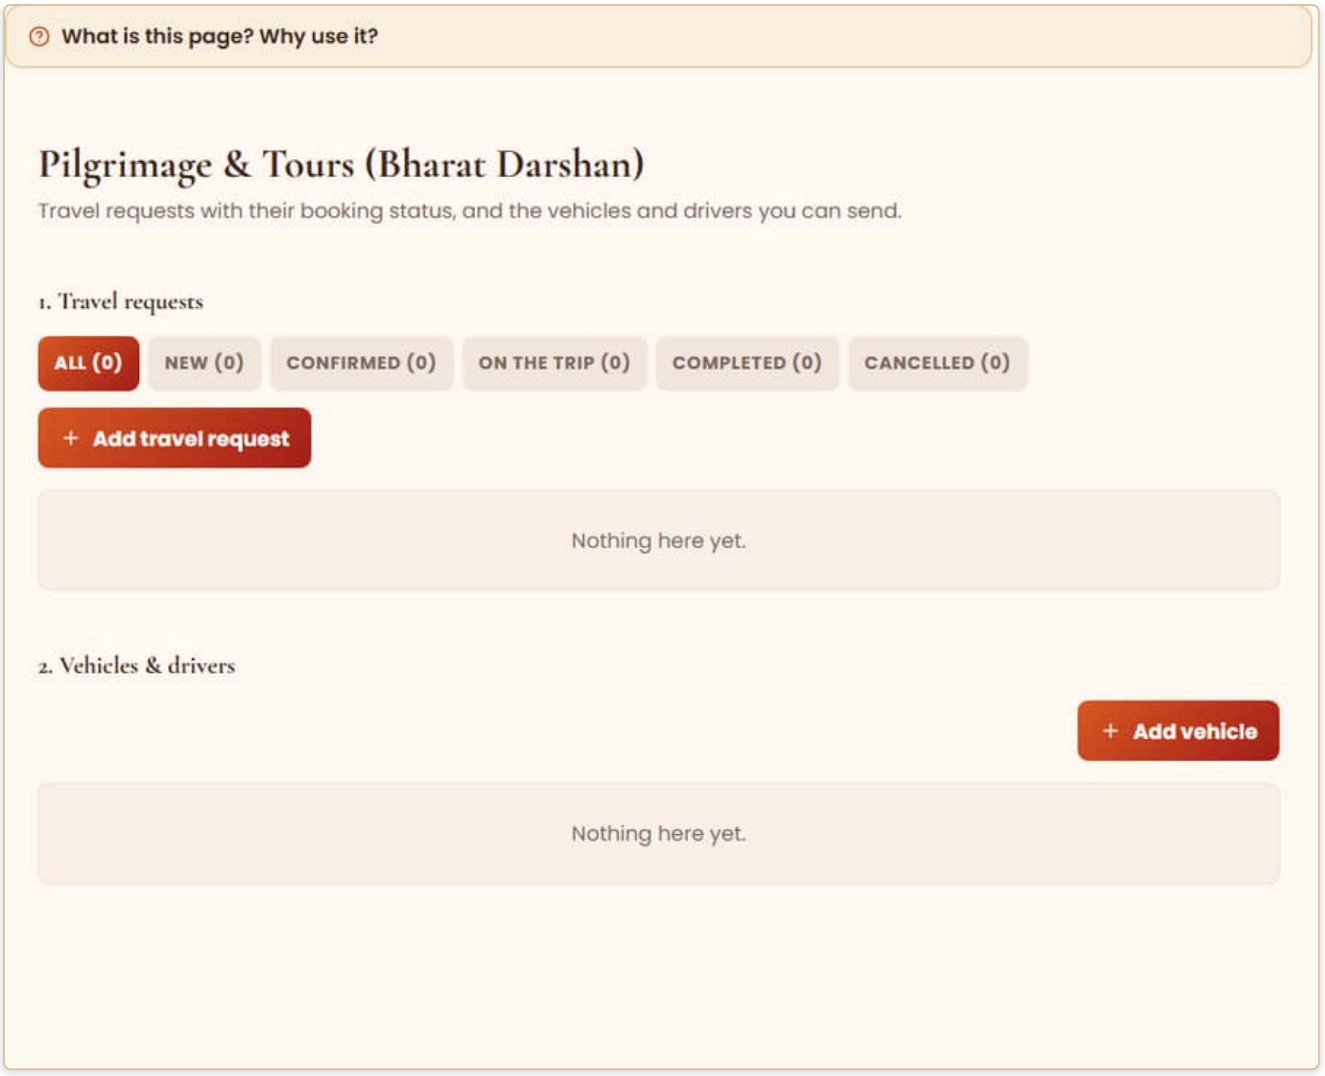

Field	What to enter
NAME * and **PHONE ***	The person's name and contact number
GENDER *	Female / Male
DATE OF BIRTH, CITY	Basic details
ABOUT THE PERSON	A short introduction: education, work, family

Field	What to enter
APPROVAL *	**Waiting for approval** (not checked yet), **Approved** (fine for the site), **Rejected**
Paid member	Tick if this person has paid the membership fee
MEMBERSHIP VALID UNTIL	The membership's last date: this is how you know whose membership ends when
PRIVATE NOTES	Notes for you only. Never shown to visitors or customers

> **Tip:** When you enter a membership date, also jot a reminder to phone that member 10 days before it ends about renewal.

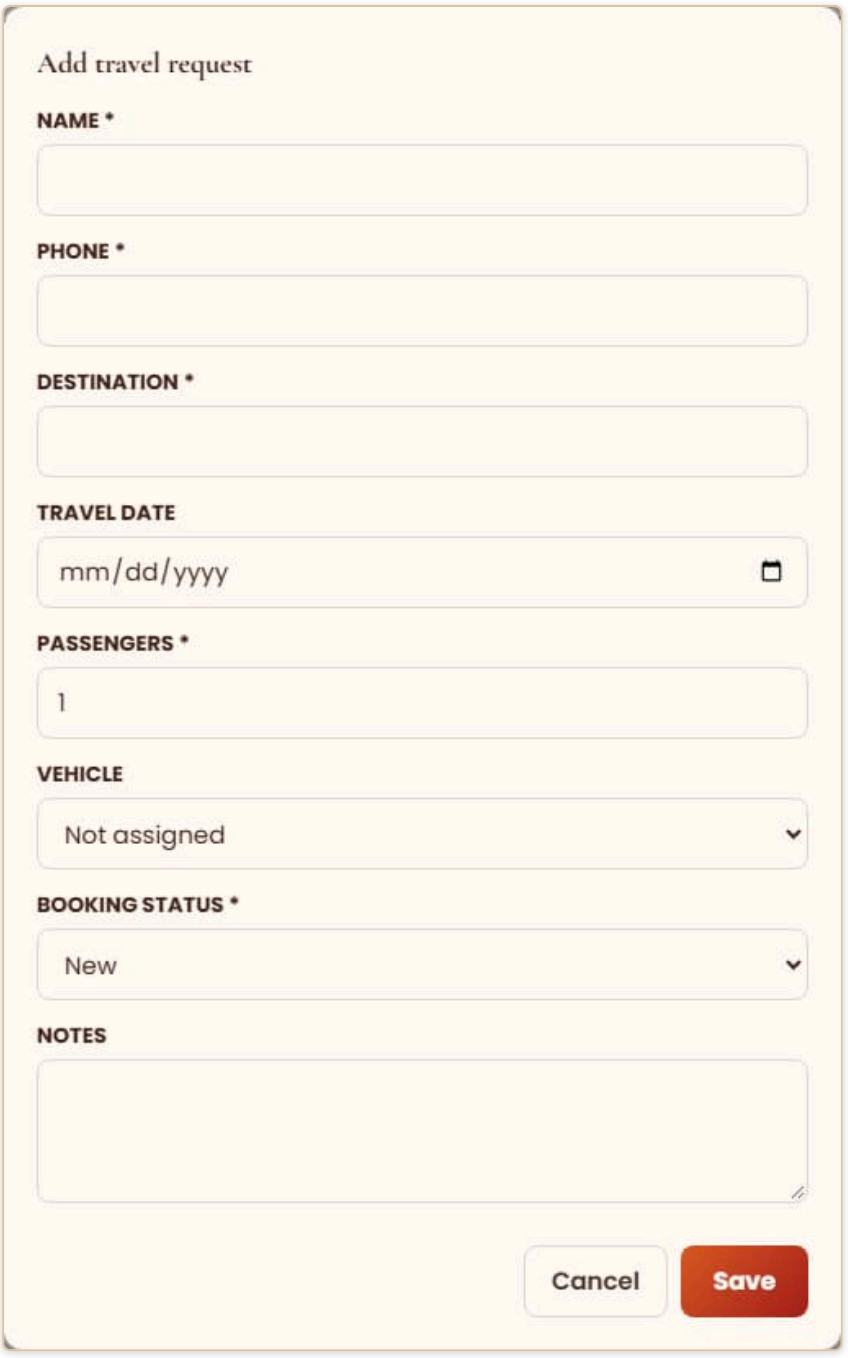

8.2 Pilgrimage & tours (Bharat Darshan)

Menu: **Pilgrimage & tours**. It has two parts: **1. Travel requests** (who wants to go where) and **2. Vehicles & drivers** (which vehicles and drivers are available).

The Pilgrimage & tours page.

Adding a travel request

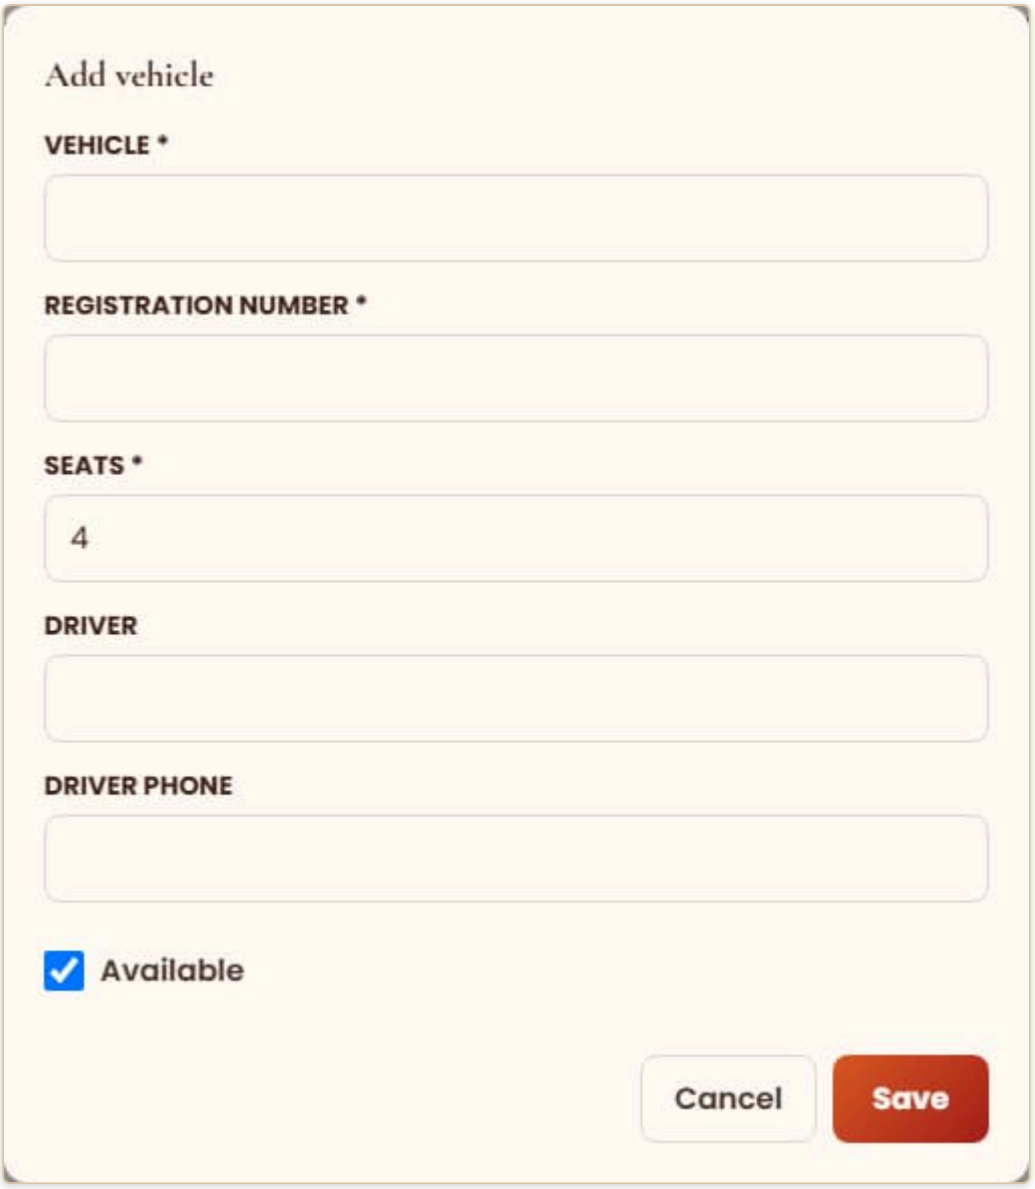

The Add travel request form.

Field	What to enter
NAME * and **PHONE ***	The traveller's / booker's name and number
DESTINATION *	Where they want to go (for example Kashi, Ayodhya, Char Dham)
TRAVEL DATE	The departure date
PASSENGERS *	Total number of travellers
VEHICLE	Pick a vehicle from the list. 'Not assigned' is allowed

Field	What to enter
BOOKING STATUS *	**New** → **Confirmed** (payment/confirmation received) → **On the trip** → **Completed**; or **Cancelled**
NOTES	Special remarks, stay needs and so on

The buttons at the top show a count for each status: **ALL · NEW · CONFIRMED · ON THE TRIP · COMPLETED · CANCELLED**.

Adding a vehicle and driver

The Add vehicle form.

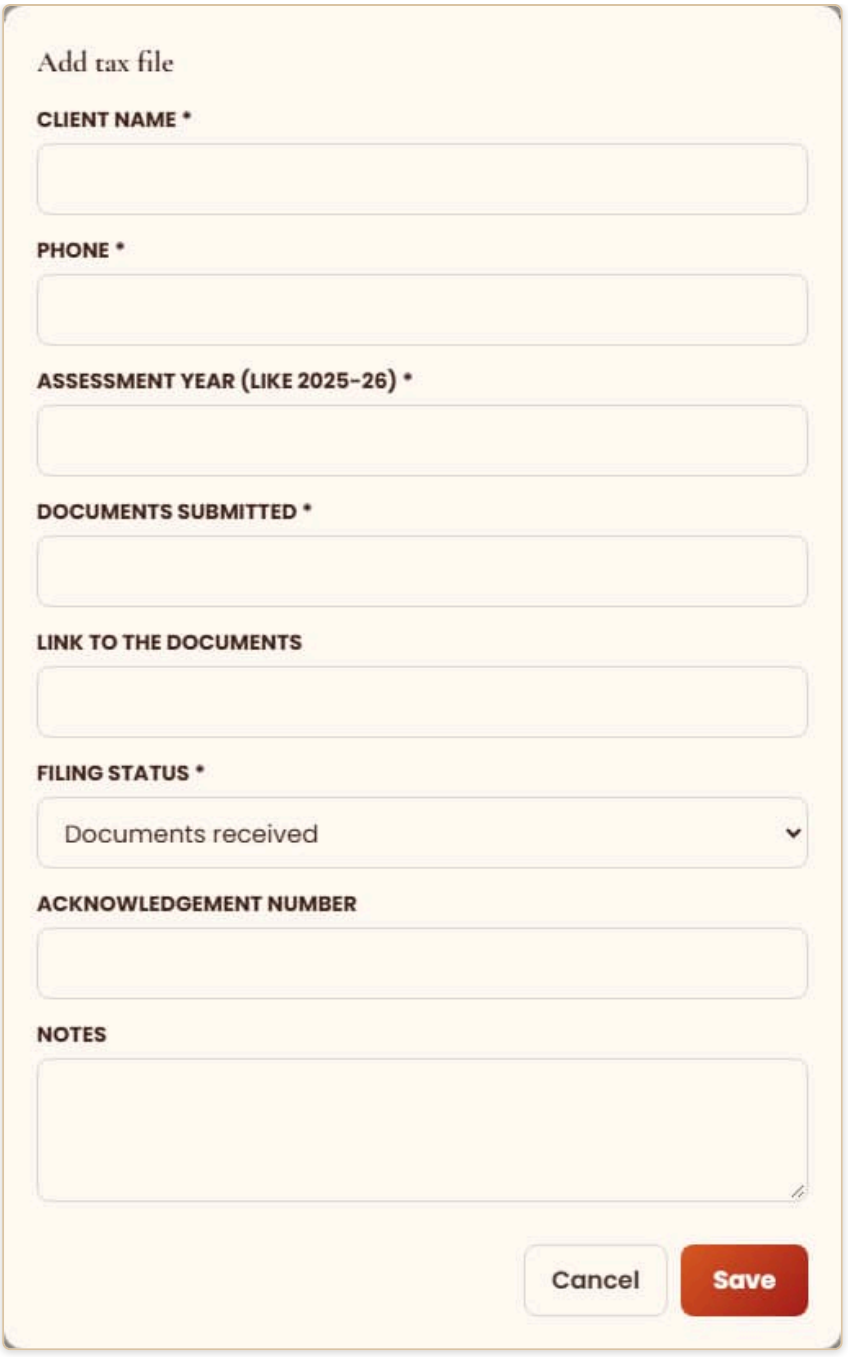

Field	What to enter
VEHICLE *	The kind of vehicle (for example Tempo Traveller)

Field	What to enter
REGISTRATION NUMBER *	The vehicle number
SEATS *	How many passengers it seats
DRIVER, DRIVER PHONE	The driver's name and number
Available	Tick if the vehicle is free now. Untick while it is on a trip

> **Tip:** When choosing a vehicle for a travel request, look only at vehicles marked **Available**. That way one vehicle is not put on two trips.

8.3 Tax desk (ITR help desk)

Menu: **Tax desk (ITR)**. For customers who give documents for their income-tax return (ITR), the file and its progress are kept here so that no file is forgotten.

The Add tax file form.

Field	What to enter
CLIENT NAME * and **PHONE ***	Whose file it is
ASSESSMENT YEAR * (like 2025-26)	The assessment year of the return
DOCUMENTS SUBMITTED *	Which papers the customer gave (Form 16, bank statements and so on)
LINK TO THE DOCUMENTS	If the documents are kept online (a drive and so on), their link
FILING STATUS *	**Documents received → In progress → Filed → Acknowledged**

Field	What to enter
ACKNOWLEDGEMENT NUMBER	The income-tax department's acknowledgement number once the return is filed
NOTES	Anything special

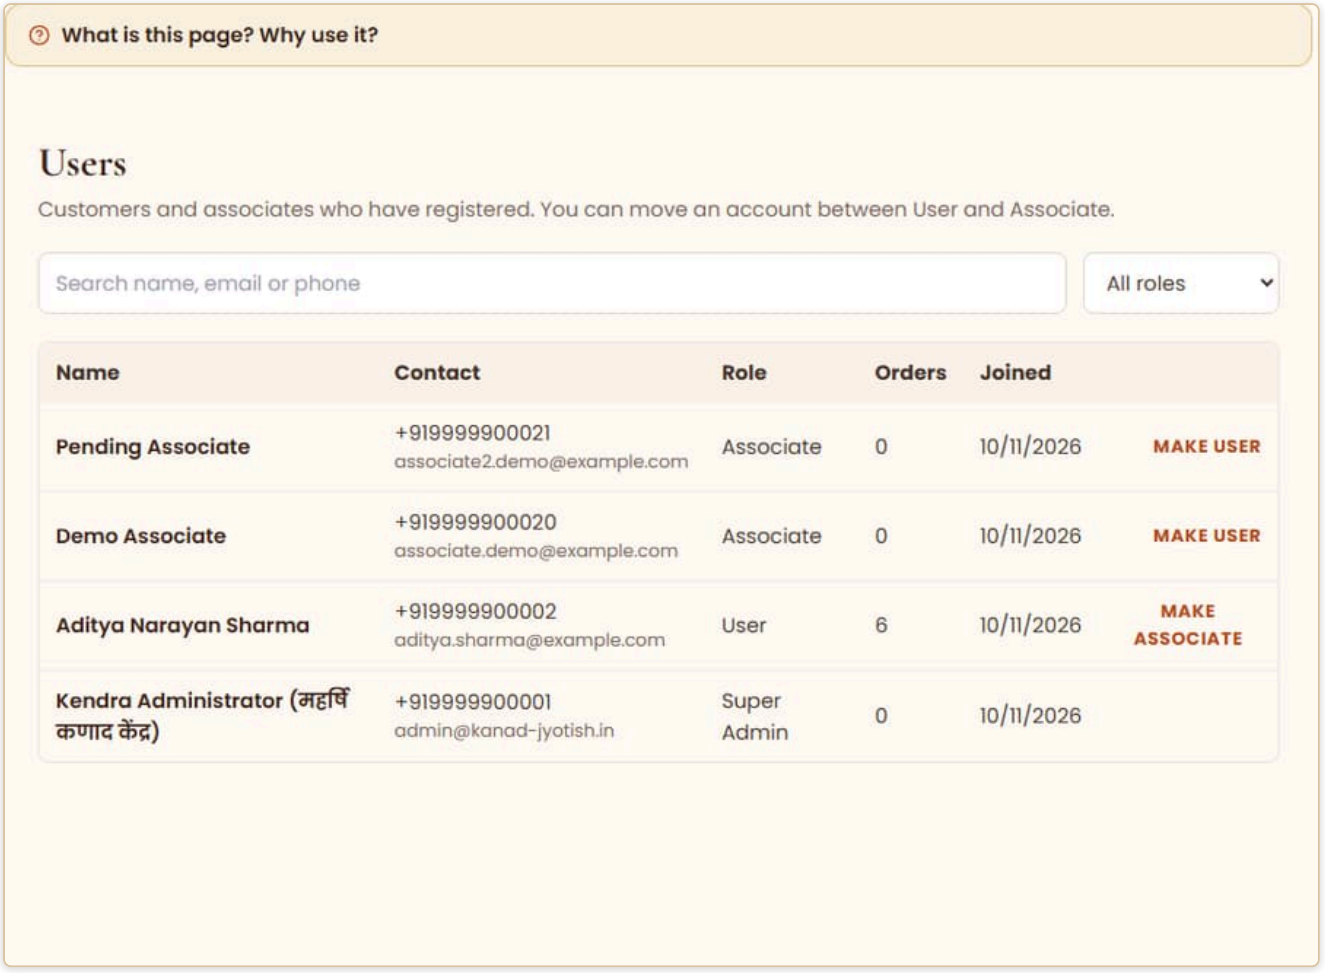

The buttons at the top filter by status with a count: **ALL · DOCUMENTS RECEIVED · IN PROGRESS · FILED · ACKNOWLEDGED**.

9 People: Users, Associates and Customer files

Who is connected to the site, how associates work, and how a customer's Kundli reaches their account.

9.1 Users

Menu: **People** → **Users**. The list of all registered people.

The Users list.

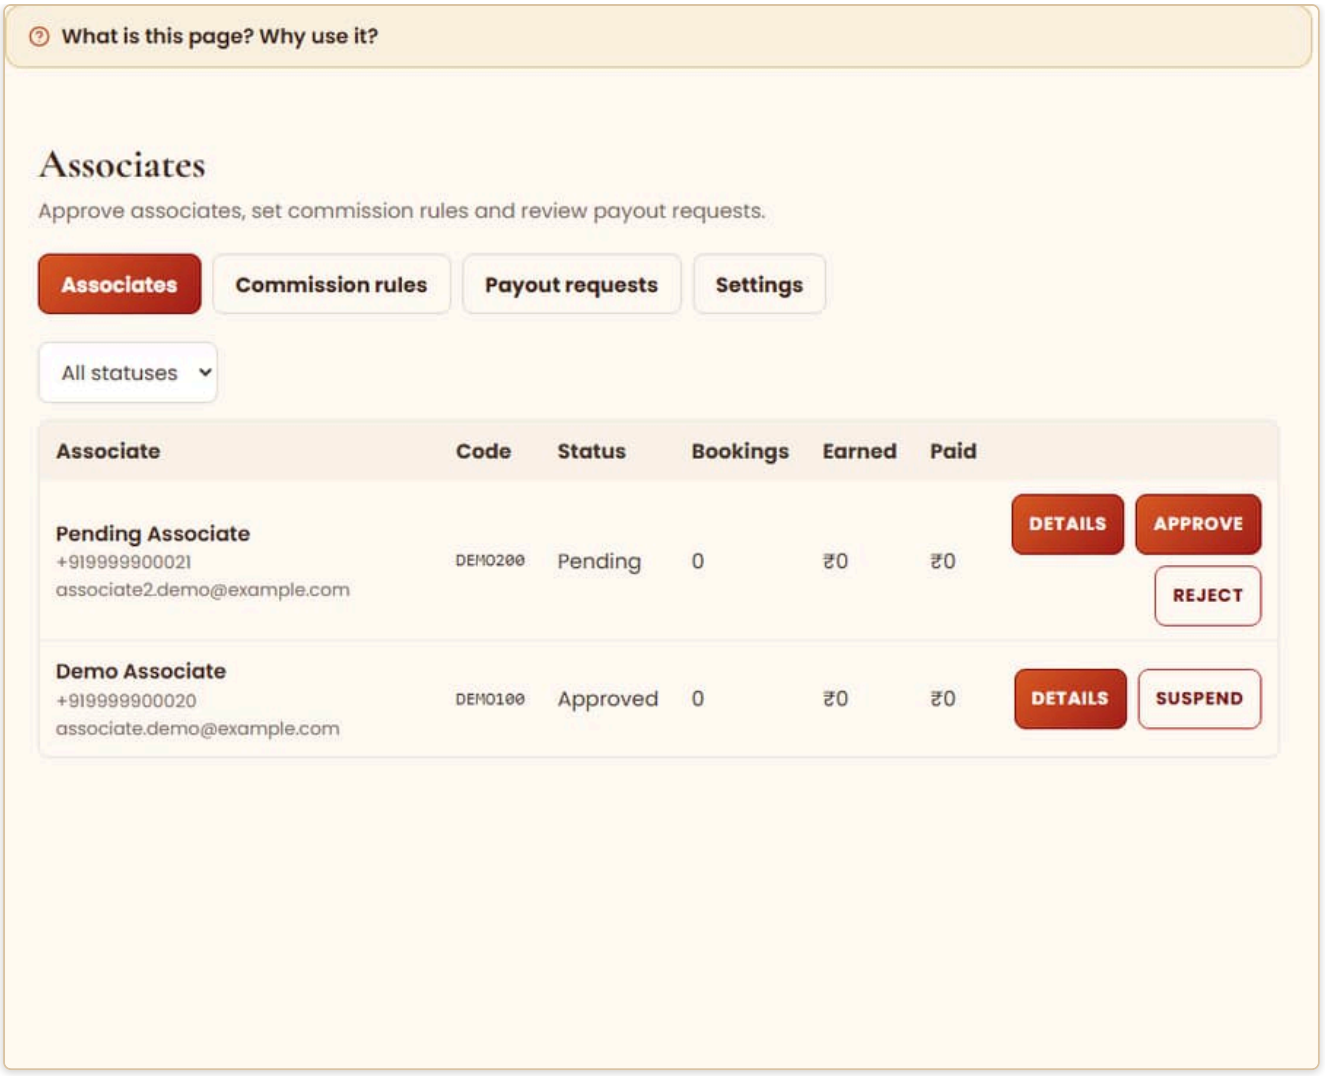

Column / control	Meaning
Search: **name, e-mail or phone**	Find any person
All roles / User / Associate / Super Admin	Filter by role. **User** = customer, **Associate** = referral partner, **Super Admin** = the Kendra's administrator

Column / control	Meaning
Name · Contact · Role · Orders · Joined	The person's name, e-mail/phone, role, number of orders and the join date
MAKE ASSOCIATE (on each customer row)	Turns that customer into an associate so they can bring customers through a referral link
MAKE USER (on each associate row)	Makes them an ordinary customer again

> **Caution:** A person's **password** cannot be changed or seen from here. If a customer forgets their password, teach them to use 'Forgot password' on the sign-in page. The **Super Admin** role is set only by the developer.

9.2 Associates (referral partners)

Associates bring customers through their own **referral link/code** and earn **commission** on every confirmed booking. Menu: **People** → **Associates**. The page has four tabs:

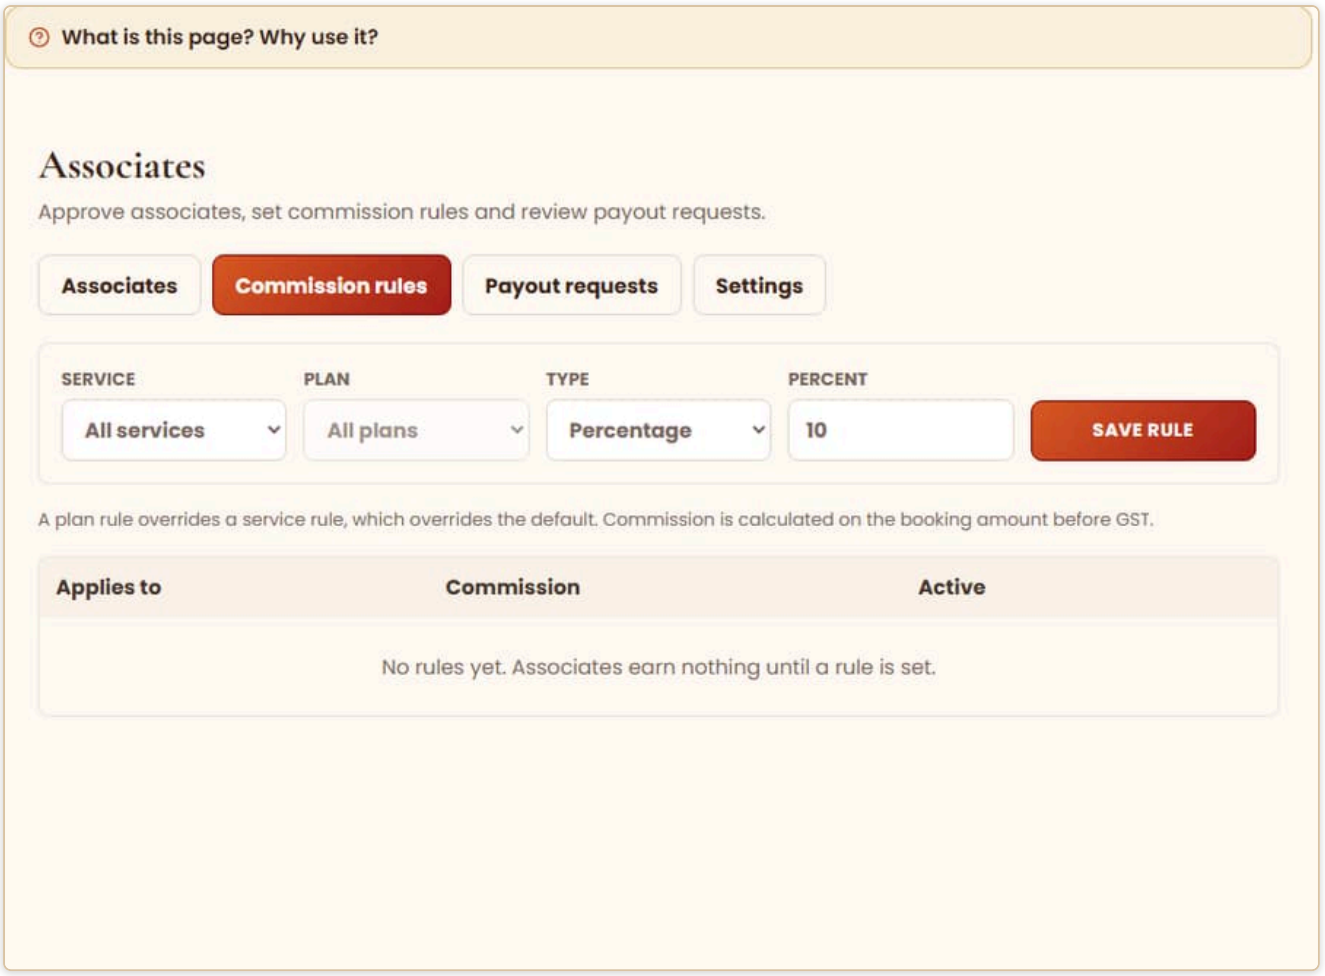

The Associates page: the associates list.

Tab 1: Associates

List columns: **Associate · Code (referral code) · Status · Bookings (orders they brought) · Earned (total commission) · Paid**. At the top **filter by status**: All statuses / Pending / Approved / Rejected / Suspended.

Status	Meaning	What you can do
Pending	A new associate has applied	**APPROVE** or **REJECT** (a reason is needed)
Approved	An active associate: earns commission on referrals	**SUSPEND** (a temporary hold)
Rejected	The application was declined (the reason is kept)	See the buttons offered on the panel
Suspended	Temporarily stopped	Activate again to restore

Tab 2: Commission rules

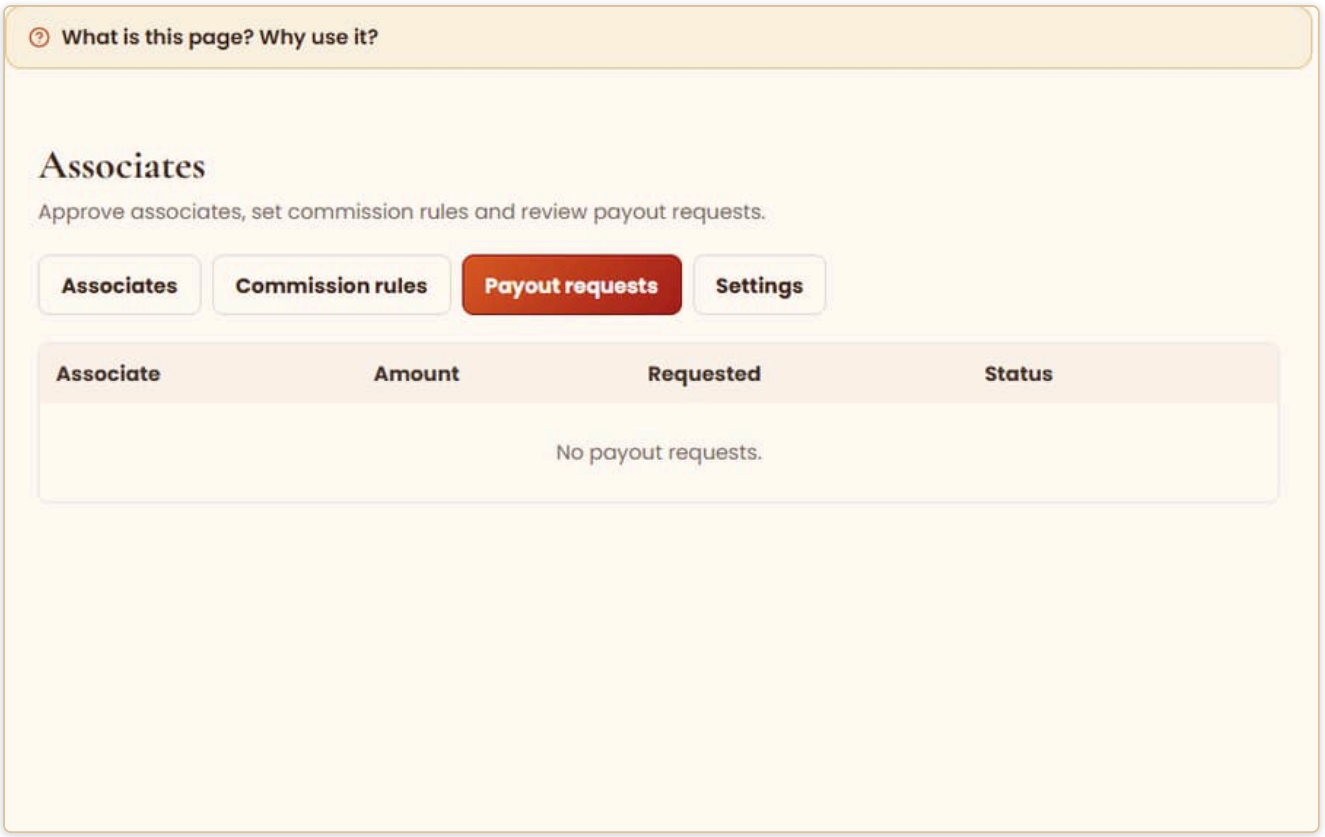

The Commission rules tab.

Here you decide how much commission an associate earns on each order. A rule has four parts:

- **SERVICE:** 'All services' or one service.
- **PLAN:** 'All plans' or one plan.
- **TYPE: Percentage** (for example 10%) or **Fixed amount (Rs.)** (for example ₹200 per order).
- **Value:** the percentage or the rupee number. Then press **SAVE RULE**.

> **Note: The most specific rule wins:** a plan's rule replaces its service's rule, and a service's rule replaces the general rule. **Commission is worked out on the booking amount before GST. Until a rule exists, associates earn no commission.** In the list each rule can also be switched **active/inactive** or removed.

Tab 3: Payout requests (paying commission)

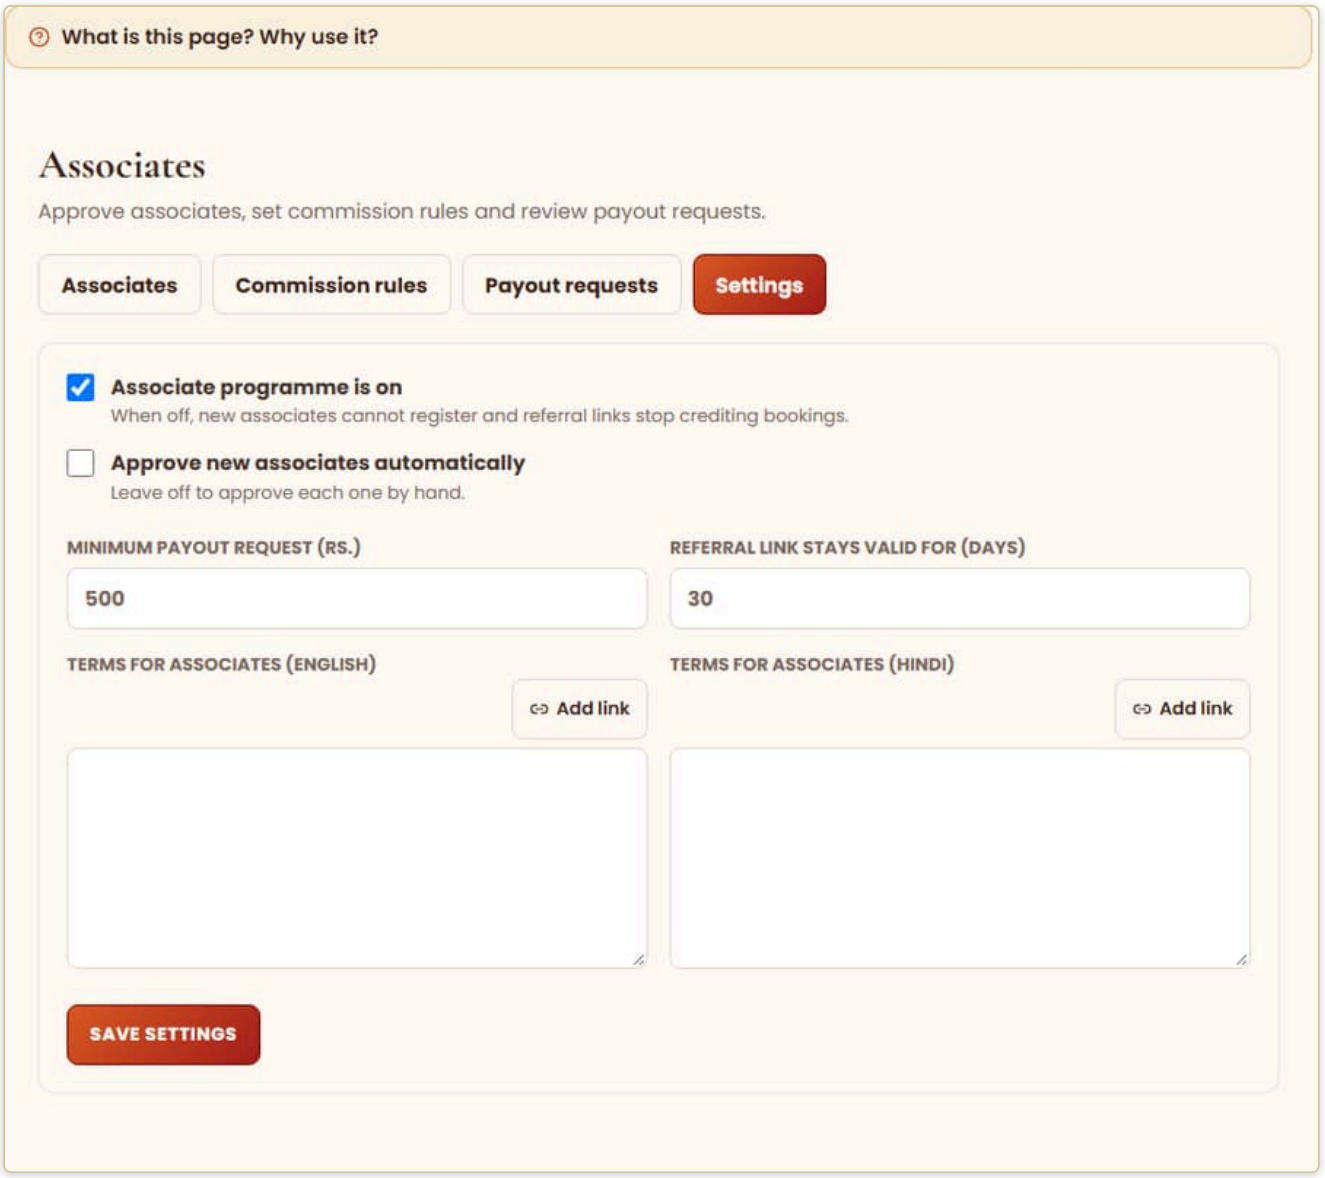

The Payout requests tab.

An associate sends a **payout request** to withdraw earnings (the minimum amount is set on tab 4). List columns: **Associate · Amount · Requested · Status**.

1. Open the request and look at the associate's UPI/bank details.
2. **Send the money from your own bank/UPI to the associate.**
3. Then press **Mark paid** and write the **payment reference (UPI/bank transaction ID)** in the window.
4. If you will not pay, or the details are wrong, choose **Reject** and write the reason.

> **Caution:** Press 'Mark paid' **only after** the money has been sent. After marking, the associate's account shows 'paid' and the associate on that order can no longer be changed.

Tab 4: Settings

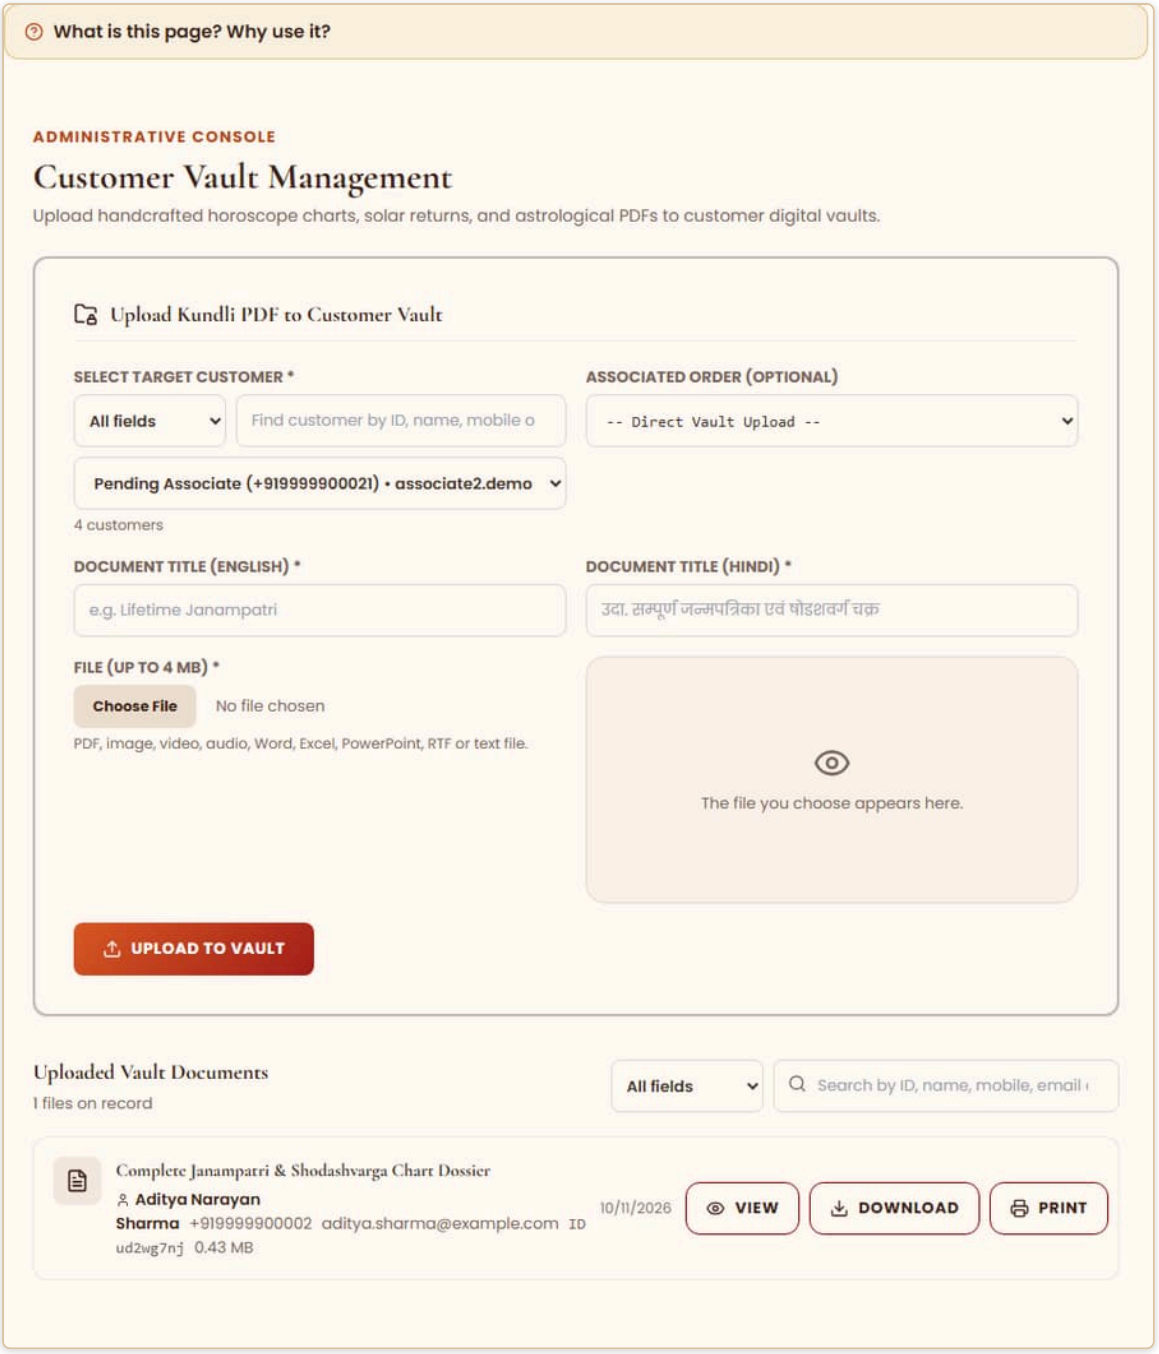

Settings of the associate programme.

Setting	Meaning
Associate programme is on	When off, new associates cannot register and referral links stop crediting bookings
Approve new associates automatically	Leave it off to approve each one by hand (the safe way)
MINIMUM PAYOUT REQUEST (RS.)	An associate cannot request less than this
REFERRAL LINK STAYS VALID FOR (DAYS)	For how many days after a customer arrives by the link their bookings go to that associate
TERMS FOR ASSOCIATES (English / Hindi)	The terms shown before someone becomes an associate: commission, payment timing and so on

After any change press **SAVE SETTINGS**.

9.3 Customer files: delivering a finished Kundli

Menu: **People** → **Customer files**. Here you put the finished **Kundli PDF** into the customer's **private vault**. The customer signs in to their account to view and download it. The file is not on a public link: **only that customer** can open it.

The Customer files (vault) page.

Steps to upload a PDF

1. In **SELECT TARGET CUSTOMER *** find the customer. Choose the search type (**All fields / Customer ID / Name / Mobile no. / Email**), type it and pick the customer from the list.

2. In **ASSOCIATED ORDER (OPTIONAL)** choose the order that this Kundli belongs to. This keeps the Kundli tied to the order.
3. Fill in **DOCUMENT TITLE (ENGLISH) *** and **(HINDI) ***: for example 'Lifetime Janampatri'.
4. Choose the PDF in **FILE (UP TO 4 MB) ***.
5. Press **UPLOAD TO VAULT**.
6. Now move that order to **KUNDLI COMPLETE** on the Orders page (chapter 3.4).

> **Caution: The file size limit is 4 MB.** If a PDF is bigger, compress it first or the upload will fail. Always choose the **right customer**: a Kundli sent to the wrong customer is hard to take back.

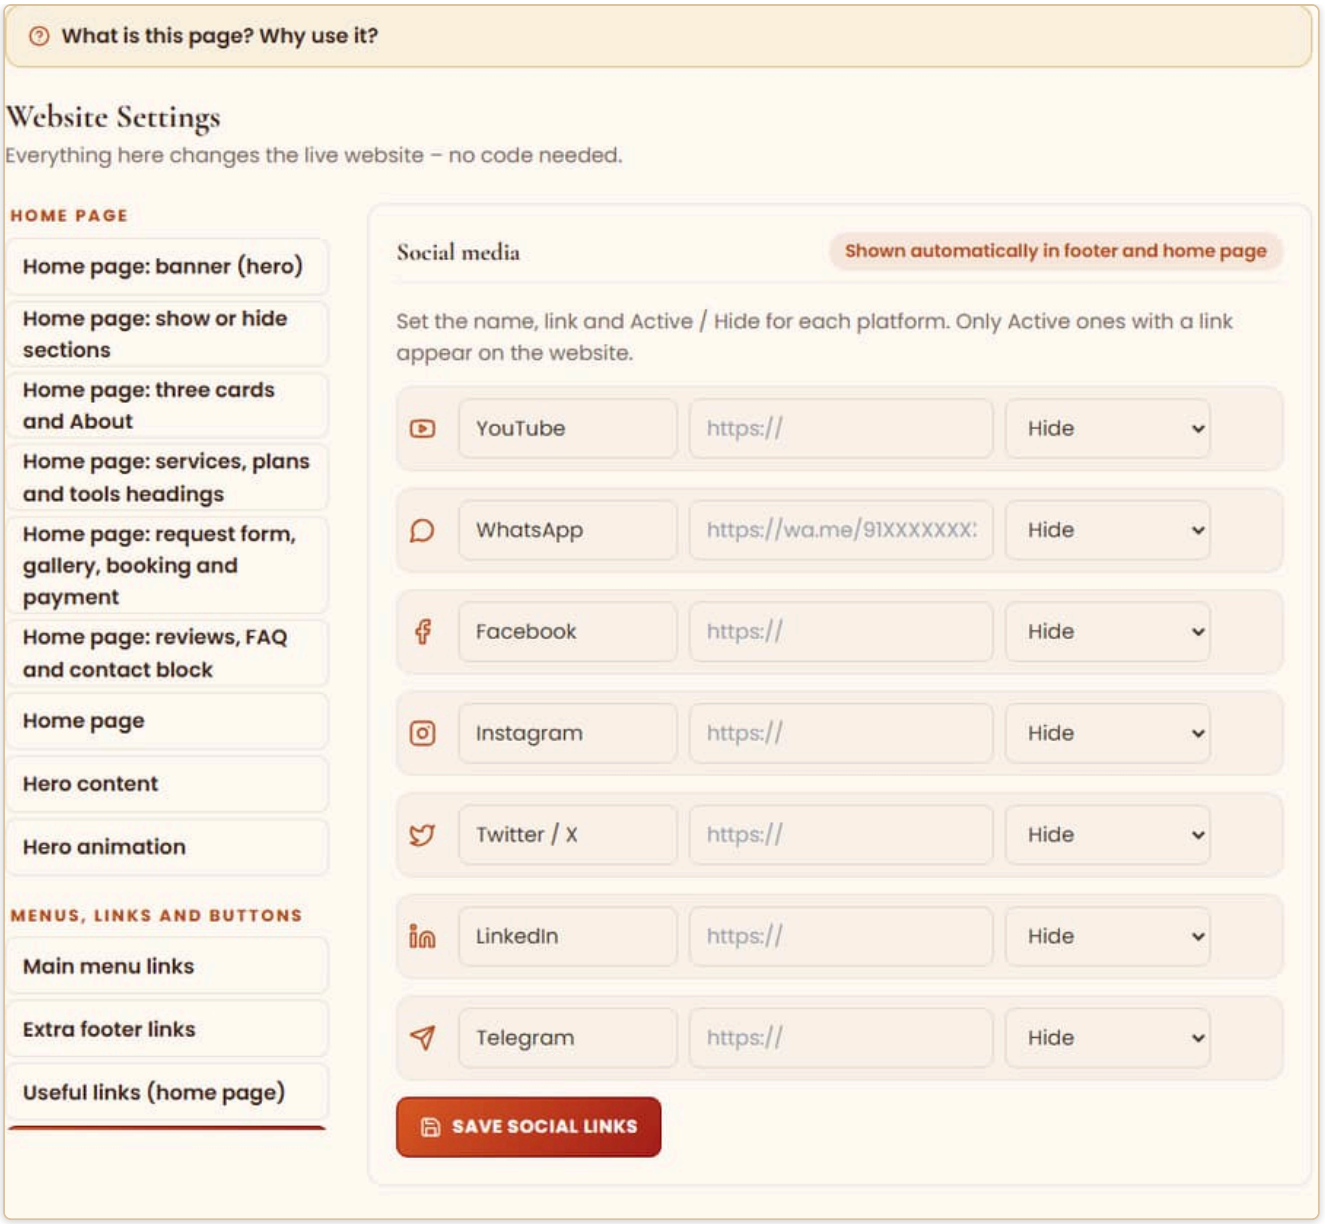

Below is the **Uploaded Vault Documents** list, with **VIEW** and **PRINT** for each file. The search box ('ID, name, mobile, e-mail or title') finds an old file.

10 Website settings: changing the look and wording of the site

Every word on the home page, the colours, logo, menus and buttons are changed here: 'Change everything here, no code needed.'

10.1 How the page is laid out

Menu: **Website** → **Website settings**. On the left is the **list of sections** (34 of them), on the right the form of the chosen section. The sections are grouped under headings: **Home page**, **Menus, links and buttons**, **Look of the site**, **Pages and content** and so on. Press a section's name to open its form. Each form has its own **Save** button.

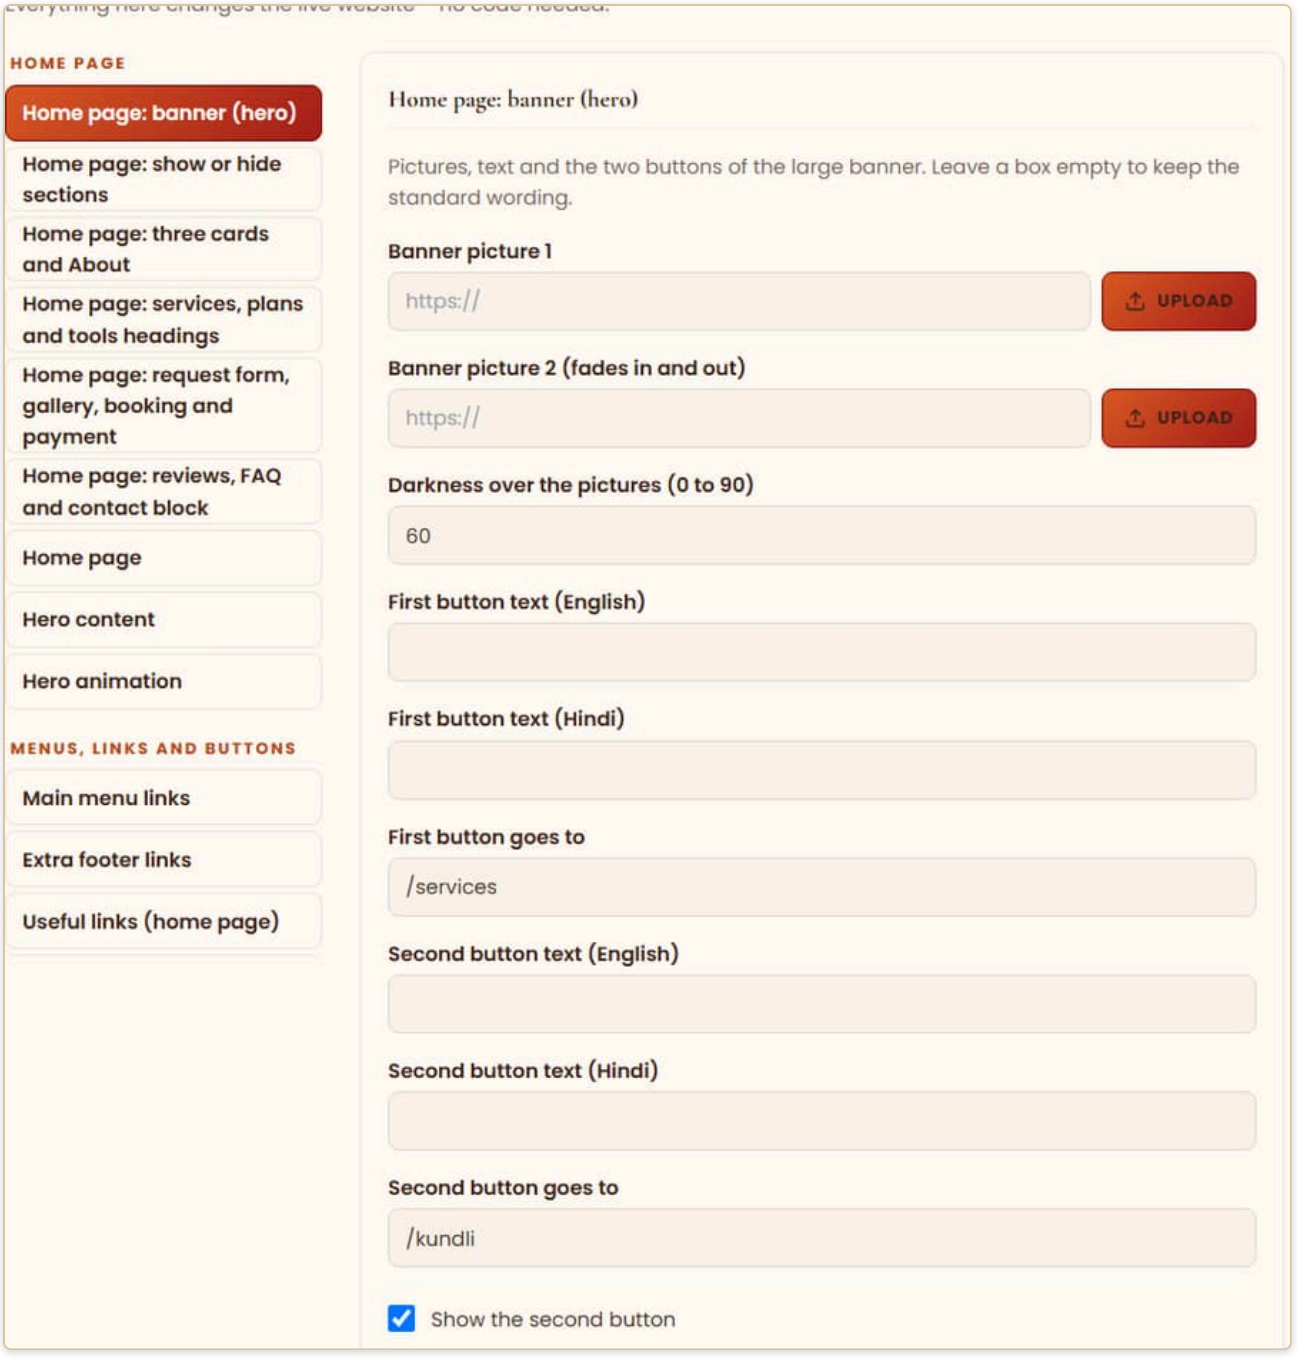

Website settings: the sections on the left, the form on the right.

> **Note: Each section is saved separately.** If you change one section and move to another without pressing Save, the first change is lost. Press **Save** after every section.

> **Tip:** Almost every wording has **two boxes**: English and Hindi. **Leaving a box empty brings the default back**, which is an easy way to undo a change.

10.2 Home page (sections 1 to 7)

Home page: banner (hero) section.

Section	What it changes	Main fields
1. Home page: banner (hero)	The big banner at the top of the home page	Banner picture 1 and 2 (the second fades in and out) · **Darkness over the pictures (0 to 90)** so text stays clear · First / second button text (English/Hindi) and **where each button goes** (for example `/services`, `https://...` or `tel:+91...`) · Show the second button

Section	What it changes	Main fields
2. Home page: show or hide sections	Which parts of the home page appear	Three cards under the banner · About · All services grid · Kundli, Prashn and Matching plans · Connected services · Free tools · Kundli request form · Gallery · Booking steps · Payment information · Reviews · FAQ · Contact block (tick or untick each)
3. Home page: three cards and About	The three cards under the banner and the 'About' block	Titles of cards 1, 2, 3 · About: small heading, heading, picture · About points 1, 2, 3 (title and text)
4. Home page: services, plans and tools headings	Headings of the services, plans and tools blocks	Services headings and link text · Janam Kundli, Prashn Kundli and Matching plans headings · Plan button text · Connected services and Free tools headings
5. Home page: request form, gallery, booking and payment	Headings of these four blocks	Request form and side panel titles · Gallery headings · Booking headings and **Step 1, 2, 3…** titles and texts · payment information
6. Home page: reviews, FAQ and contact block	Headings of reviews, FAQ and contact	Small heading and heading of each · the right-hand box title and its help points
7. Home page (status of each block)	A **Status** list beside each block	**Active** = shown; **Hide** = not shown

Two sections for the headline (hero)

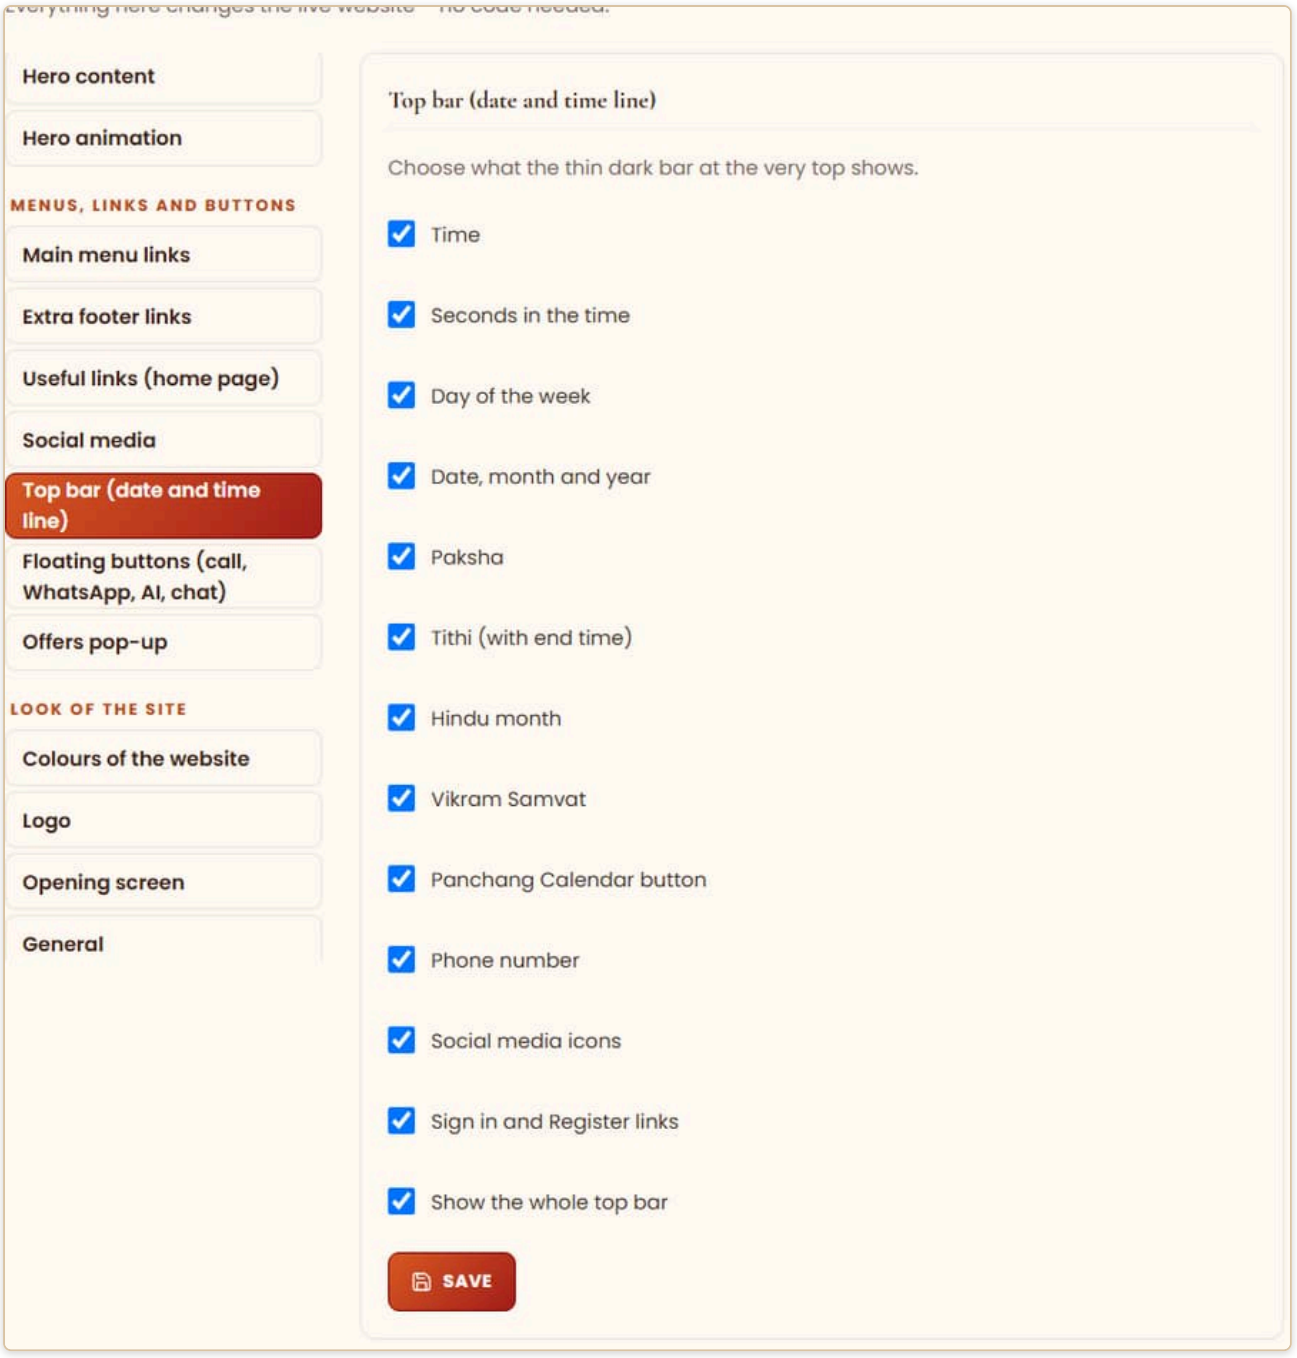

Section	What it changes
8. Hero content	The biggest words on the home page: **Small heading · Main heading · Intro text** (English and Hindi)
9. Hero animation	**Show the large Om mark behind the headline** and **Soft glow behind headline**: switch each on or off

> **Note:** The big **sliding pictures (slides)** on the home page are changed not here but on the menu page **'Home hero slides'** (chapter 11.1).

10.3 Menus and links (sections 10 to 13)

Section	What it changes	How
10. Main menu links	The options in the site's top menu: Home, About, Services...	Press **Add link**, fill in each link's name (English/Hindi) and **web address (URL)**. Until you add any, the site's default links stay. Then **Save**
11. Extra footer links	Extra links in the bottom part (footer) of the site	The same: **Add link** → name and address → **Save**
12. Useful links (home page)	The 'Useful links' block on the home page (for example government portals, a sister site)	A name and web address for each. **Only links that are switched on** show in 'Useful links' on the home page. **If the list is empty the block does not appear at all**. **Add link** → **Save**
13. Social media	Links to Facebook, Instagram, YouTube, WhatsApp and so on	Each platform's address (https://... or, for WhatsApp, https://wa.me/91XXXXXXXXXX) and **Status: Active / Hide**. Then **Save social links**

10.4 Top bar, floating buttons and the offers pop-up (sections 14 to 16)

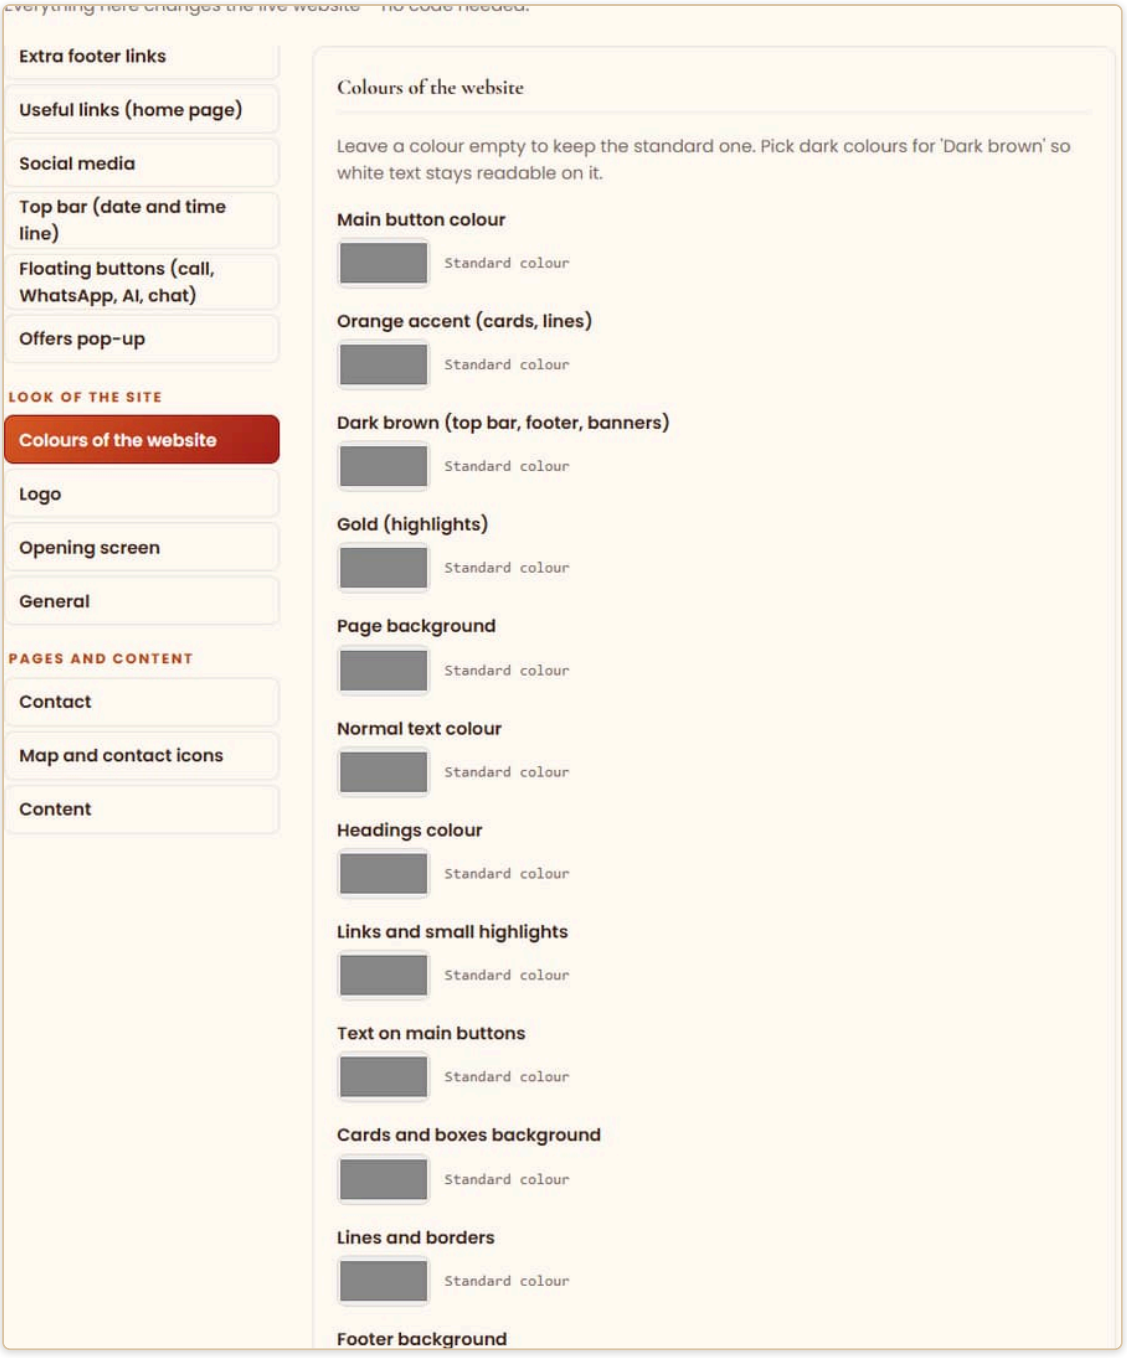

The Top bar (date and time line) section.

Section	What it changes	Main fields
14. Top bar (date and time line)	The dark strip at the very top of the site showing time, tithi and contact	**Time · Seconds in the time · Day of the week · Date, month and year · Paksha · Tithi (with end time) · Hindu month · Vikram Samvat · Panchang Calendar button · Phone number · Social media icons · Sign in and Register links** (each on/off) and **Show the whole top bar**

Section	What it changes	Main fields
15. Floating buttons (call, WhatsApp, AI, chat)	The buttons floating at the edge of the site	Call button · WhatsApp button · Ask AI button · Chat button · the 'Ask a question' bar at the bottom (large screens), each on/off. **Number the call button dials** and **WhatsApp number** (empty = main phone) and the **First WhatsApp message** (English/Hindi)
16. Offers pop-up	The small offers window when the site opens	**Show the offers pop-up** · list each offer (code, discount, validity) · show only on the home page · show even when no offer is running · **Show after (seconds)** · **Show again after (hours, 0 = on every visit)** · **Most offers to list (1 to 10)** · heading, message, button text and **where the button goes**

> **Tip: Which offers appear in the pop-up** is set by the tick 'Show this offer in the pop-up...' in each offer's form (chapter 5.5). The timing and look of the pop-up are set here.

10.5 Look of the site: colours, logo, opening screen (sections 17 to 20)

Colours of the website: a colour picker beside each colour.

17. Colours of the website

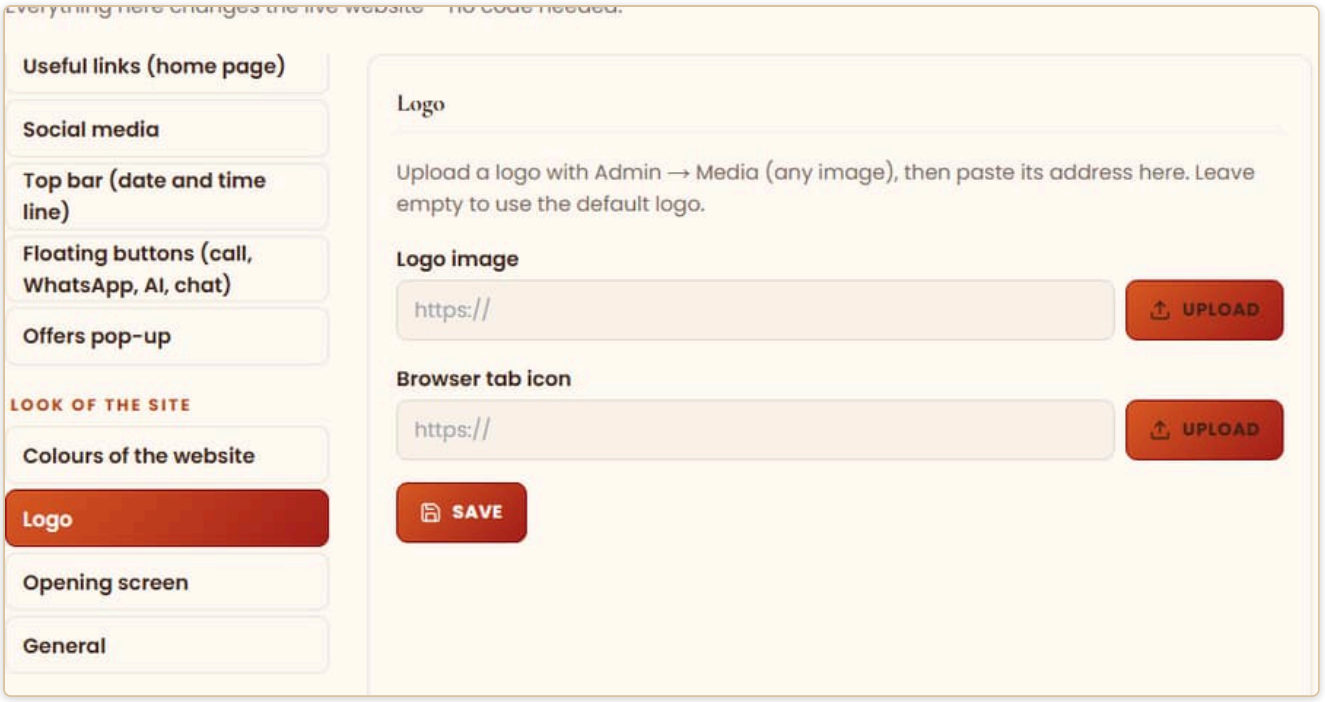

The colour of every part of the site can be changed here. **Leave a colour empty for the default**: if you pick no colour the site keeps its original one. When you choose a dark colour for something, **make sure white text stays readable on it**.

Colour	Which part of the site
Main button colour · text on the main button	The red/orange primary buttons such as 'Book' and their lettering

Colour	Which part of the site
Orange (cards, lines) · Gold (highlights) · Dark brown (top bar, footer)	The three main decorative colours
Page background · Card & box background · Footer background · Top bar background	Background colours
Normal text colour · Headings colour · Links & small highlights · Lines & borders	Text and line colours
Get-directions button (colour and text) · Book consultation button · Sign in / account round button · Panchang calendar button · Chosen-language button	The special buttons in the header and contact areas
Floating Call / WhatsApp / Ask AI / Chat buttons	The four floating buttons at the edge
Text font and **Headings font**	The look of the letters. Choose from the fonts listed (Text: Poppins, Noto Sans, Arial, Verdana, Tahoma, Trebuchet MS; Headings: Cormorant Garamond, Georgia, Times New Roman, Palatino). Empty = the original font

> **Caution:** After changing colours, open the **whole home page and one service page** and check that the text can be read. Light text on a light background cannot be seen at all. If something looks wrong, clear that colour and save: the original returns.

18. Logo

The Logo section.

- **Logo image UPLOAD:** the logo shown in the site's header. Use a clear, wide picture (roughly 2:1); a PNG with a transparent background is best.
- **Browser tab icon UPLOAD:** the small square icon shown in the browser tab. If empty, the site's default icon is used.
- After uploading press **Save**, then press **Ctrl+F5** on the tab to refresh, because the browser remembers tab icons for a long time.

19. Opening screen

The welcome curtain shown for a few seconds the first time the site opens (Om, mantra, Maharshi Kanad's photo, the name). Fields: **Show the opening screen on the first visit** (on/off) · **How long it stays (seconds, 1 to 12)** · **Mantra between the Om and the photo** (one line per row) · **Welcome line at the bottom** · **Name shown** · **Line under the name** · **Small capital line** · **Photo of Maharshi Kanad shown under the Om** (clear it to hide) · **Symbol in the circle**.

20. General

The **Tagline**, the **Footer note** and the **Copyright line**: each in English and Hindi.

10.6 Pages and content (sections 21 to 25)

Section	What it changes	Main fields
21. Contact	The wording of the 'Contact' page form	The names and examples of the form's boxes: Full name, Phone number (+91), E-mail address, Subject, Message / astrological query
22. Map and contact icons	The map and the row of contact icons	**Show the icon row** · **Show the Google map on the Contact page** · **Show the map with Help, Enquiry and Support just above the footer (every page)** · Navigation / Enquiry / Support / Tickets icons and their names · **Where Support opens** (a page, WhatsApp link or `tel:98xxxxxxxx`) · Show the full office address / mobile number / e-mail
23. Content	The site's general introduction	**Short about text** and **Mission text** (English/Hindi)
24. Features	Three big switches	**Floating Call / WhatsApp / Chat buttons** · **Credentials link in footer** · **Blog link in menus**
25. Panchang, Kundli and Matching tools	The site's three free tools	**Panchang page ON** · **Kundli page ON** · **Kundli matching page ON** and the **address** of each. Switching one off removes that page from the site

10.7 The remaining sections (26 to 34)

Section	What it changes	Main fields
26. Technology information	The details on the site's 'technology' page	Calculation method · Accuracy note · Hosting/Server · Domain & DNS · Frontend / Backend technology · Database · File storage · Authentication · Site security · SSL · Backup & recovery · Payment gateway · SMS/WhatsApp gateway · E-mail service · Analytics · SEO tools · Languages supported (kept for transparency: keep it correct)
27. Mobile app	The app download block	**Show app download section** · Android app (name, icon, Google Play link, QR) · APK file app (name, direct download link, QR) · App Store link (iPhone). Leave QR empty and it is made from the link

Section	What it changes	Main fields
28. Legal pages	A short legal notice in the footer	**Short disclaimer shown in footer** (English/Hindi). The full legal pages are in 'Pages & legal' (chapter 11.4)
29. Business	The Kendra's registration details (in the footer)	Registered business name · **Owner / proprietor** · **MSME / Udyam number** · **Year started**
30. Invoice (bill)	How the customer's invoice looks	Heading of the invoice · Name for the invoice number · **Print** business address / phone / e-mail / logo / GSTIN / customer e-mail / offer code used (each on/off) · **Terms and declaration** (one point per line) · closing line · **Name for the signature and designation** · **Customers can download their invoice**
31. Confirmation ticket	The ticket the customer gets after booking	**Give customers a confirmation ticket** · heading · message · **What happens next** (one point per line) · help line · show: amount paid, appointment date and time, birth details, Kendra phone, Kendra address
32. SEO	How the site appears in Google and similar search engines	**Page title** · **Description for Google** · **Keywords (comma separated)** · **Share image (WhatsApp/Facebook)**: the picture shown when the link is shared · **Google Search Console code**
33. Analytics	Visitor statistics	The **Allow visitor statistics** switch. (The Google Analytics ID is entered in 'API keys & Analytics', chapter 12.2)
34. Admin settings	Your private notes	**Private notes for admin (not shown to visitors)**: only administrators can see them (for example 'offer until January')

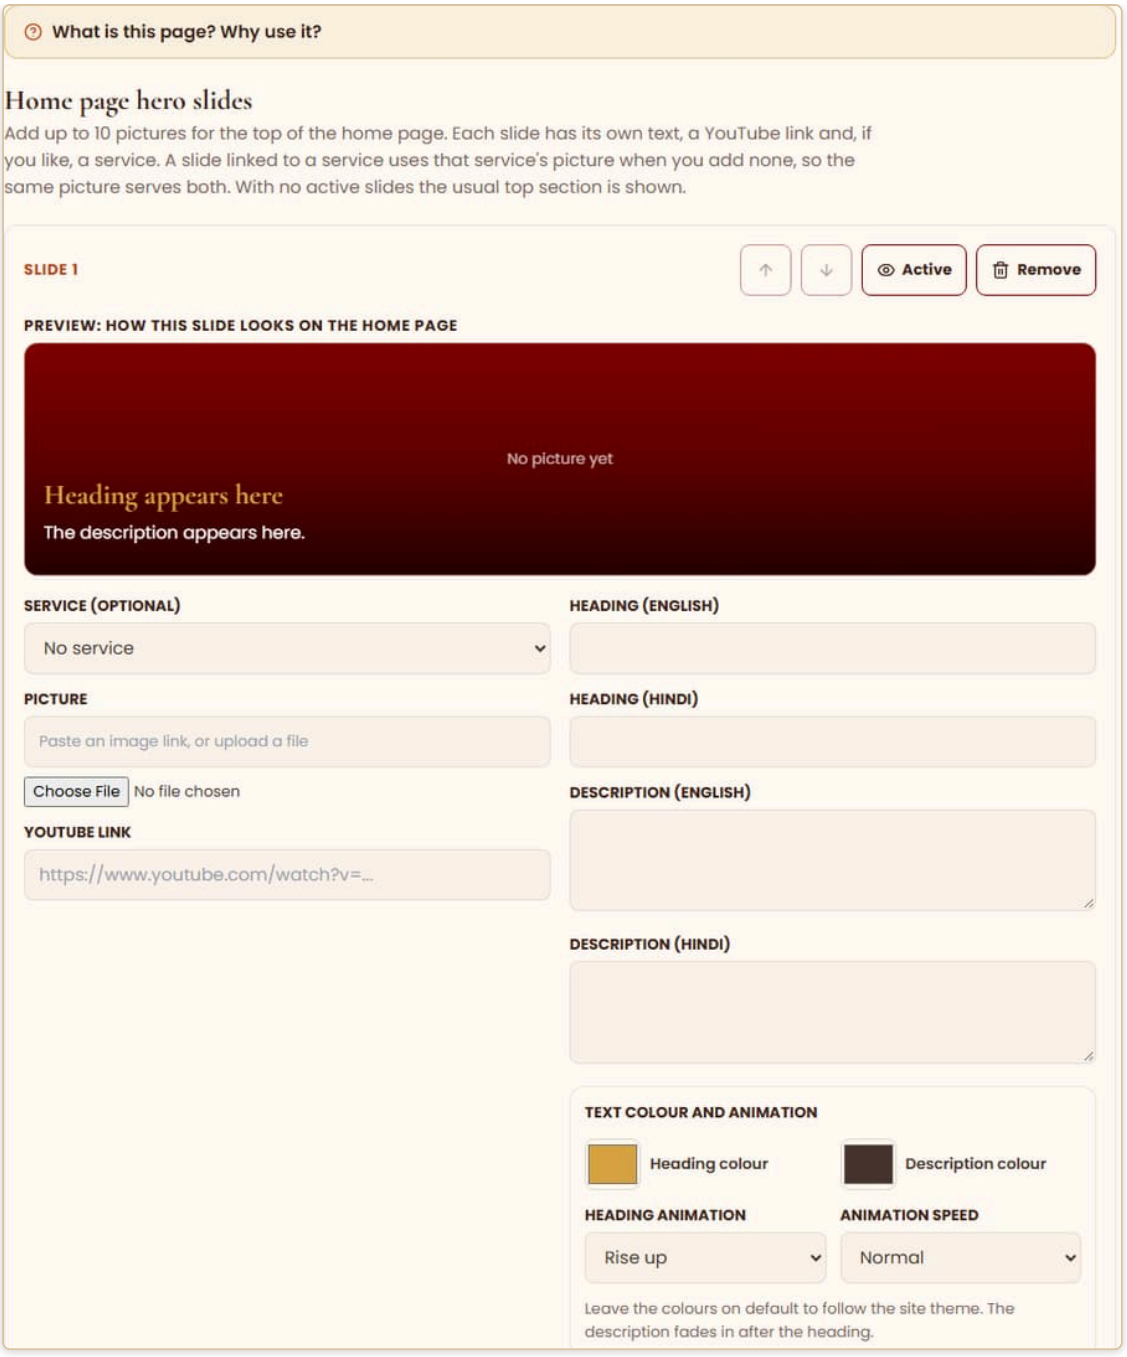

> **Tip:** The **most-used** sections: 1 (banner), 12 (useful links), 14 (top bar), 15 (floating buttons), 16 (offers pop-up), 18 (logo), 30 (invoice), 32 (SEO).

11 Website content: slides, banners, pages, articles, gallery, reviews and more

The remaining pages of the 'Website' group. Each page makes the content of one part of the site.

11.1 Home hero slides

Menu: **Home hero slides**. The big sliding picture panel on the home page. **At most 10 slides**: the button shows '(count/10)'.

The slide form.

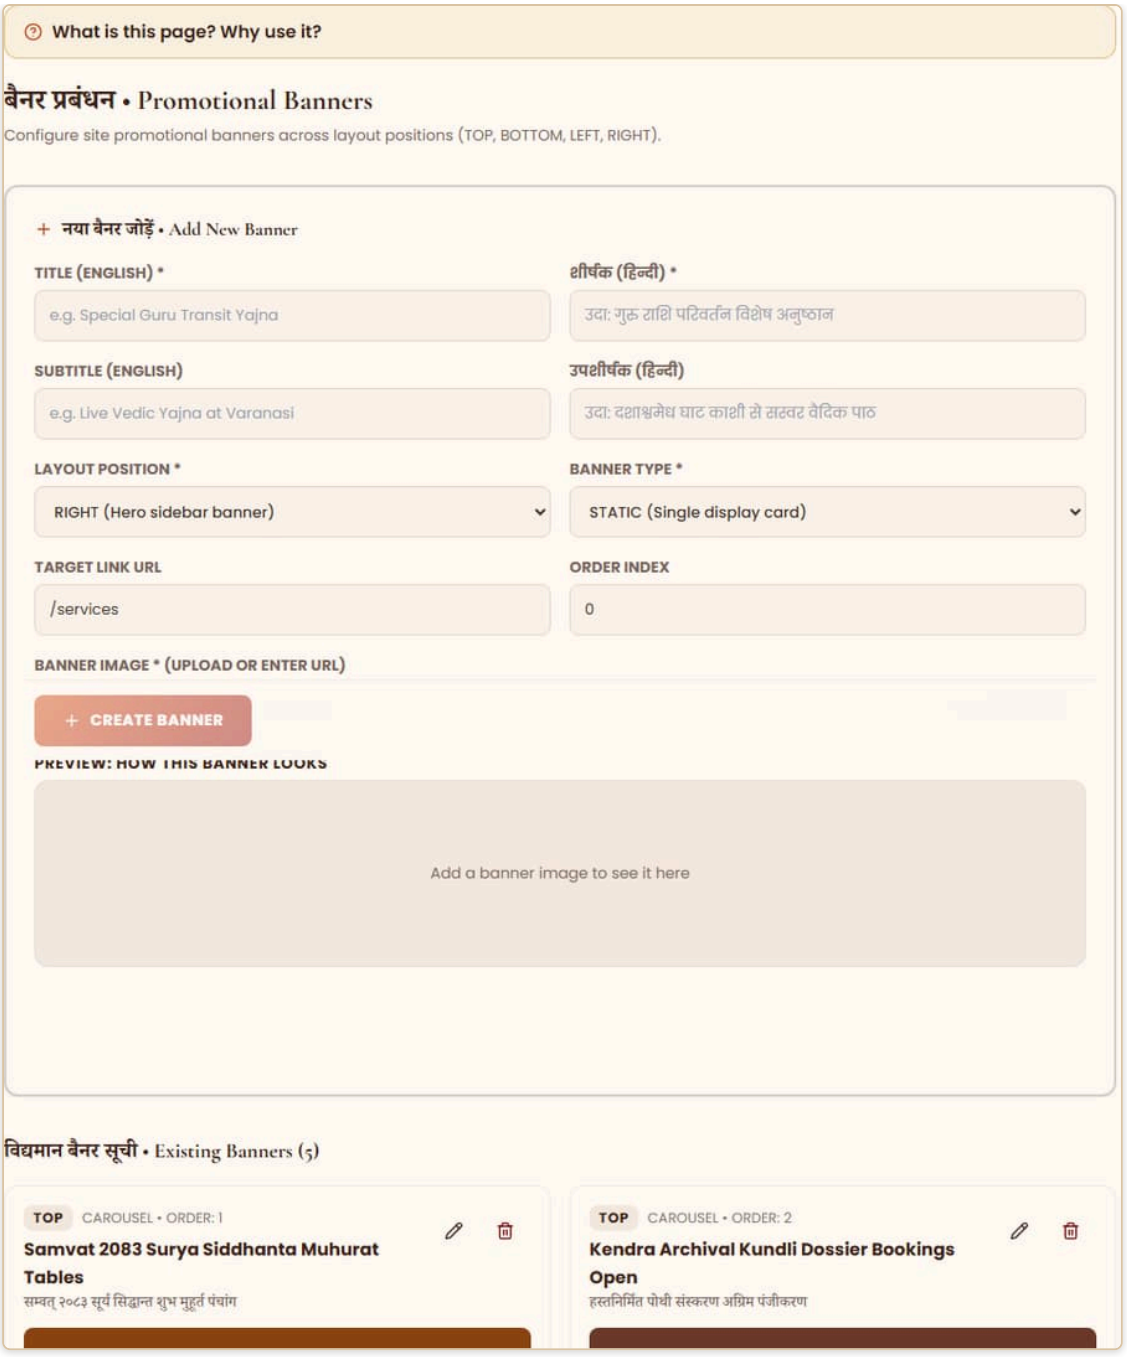

Field	What to enter
SERVICE (OPTIONAL)	Tie the slide to a service, so pressing it opens that service. 'No service' is fine too
PICTURE	Upload the slide picture or paste a link. A wide (16:9), clear picture
YOUTUBE LINK	To play a video instead of a picture
HEADING / DESCRIPTION (English/Hindi)	The words on the slide

Field	What to enter
HEADING ANIMATION	How the words appear: None, Rise up, Fade in, Slide in from left, Zoom in, Word by word, Letter by letter, Waving letters, Typewriter
ANIMATION SPEED	Slow / Normal / Fast
Move up / Move down / Active / Remove	Change the order · switch the slide on/off · delete it

Use **Add slide** for a new slide and finally press **Save slides**. Nothing goes live until you save.

11.2 Banners

Menu: **Banners**. Promotional banners shown in different parts of the site.

The Banners page: a form to add a new banner on top, existing banners below.

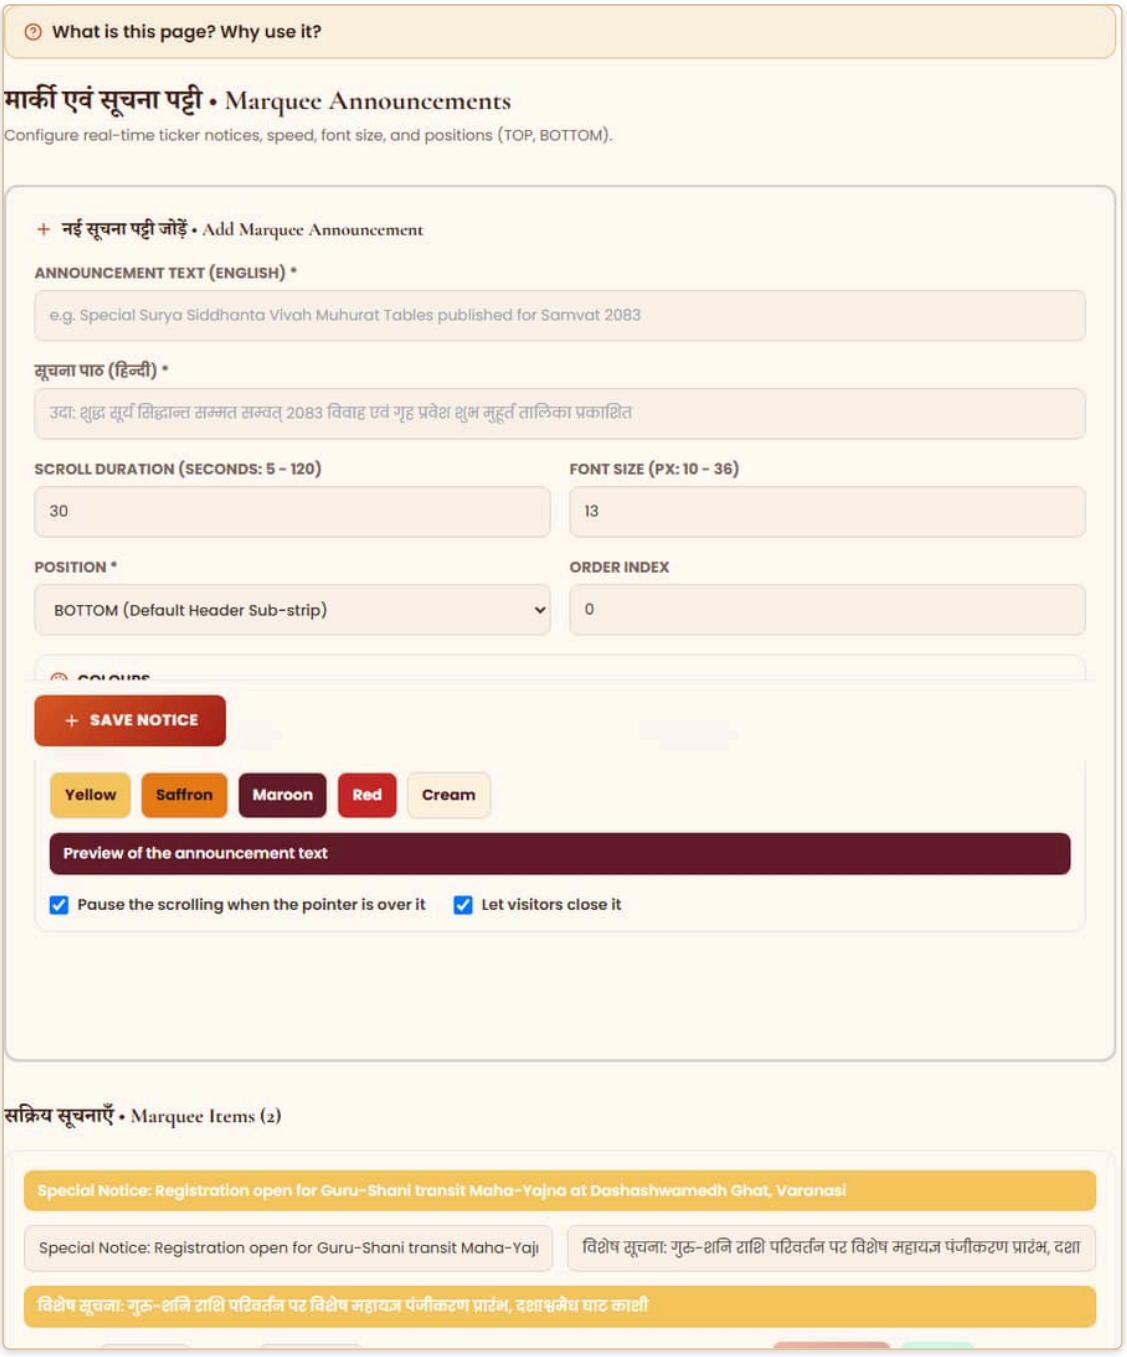

Field	What to enter
TITLE * (English / Hindi)	The banner's main words
SUBTITLE (English / Hindi)	The line below
LAYOUT POSITION *	**RIGHT** (beside the hero) · **TOP** (header notification) · **BOTTOM** (just above the footer) · **LEFT** (left sidebar)
BANNER TYPE *	**STATIC** (a single card) or **CAROUSEL** (a rotating slide)
TARGET LINK URL	Where it goes when pressed (`/services` or a full `https://...`)

Field	What to enter
ORDER INDEX	Display order
BANNER IMAGE *	Upload a picture or give a link

Save with **CREATE BANNER**. In the list each banner has the **ACTIVE** switch (show/hide), **Edit banner** and **Delete banner**.

11.3 Scrolling notice (marquee)

Menu: **Scrolling notice**. A moving notice strip above or below the header, for quick matters such as a festival date, a holiday or a special announcement.

The Scrolling notice page.

Field	What to enter
ANNOUNCEMENT TEXT * (English / Hindi)	What to say, in both languages
SCROLL DURATION (5 - 120 seconds)	How long one full pass takes: a bigger number is slower
FONT SIZE (10 - 36 px)	The letter size
POSITION *	**BOTTOM** (just below the header) or **TOP** (above the header)
Background colour / **Font colour**	Yellow, Saffron, Maroon, Red, Cream, or a colour you pick

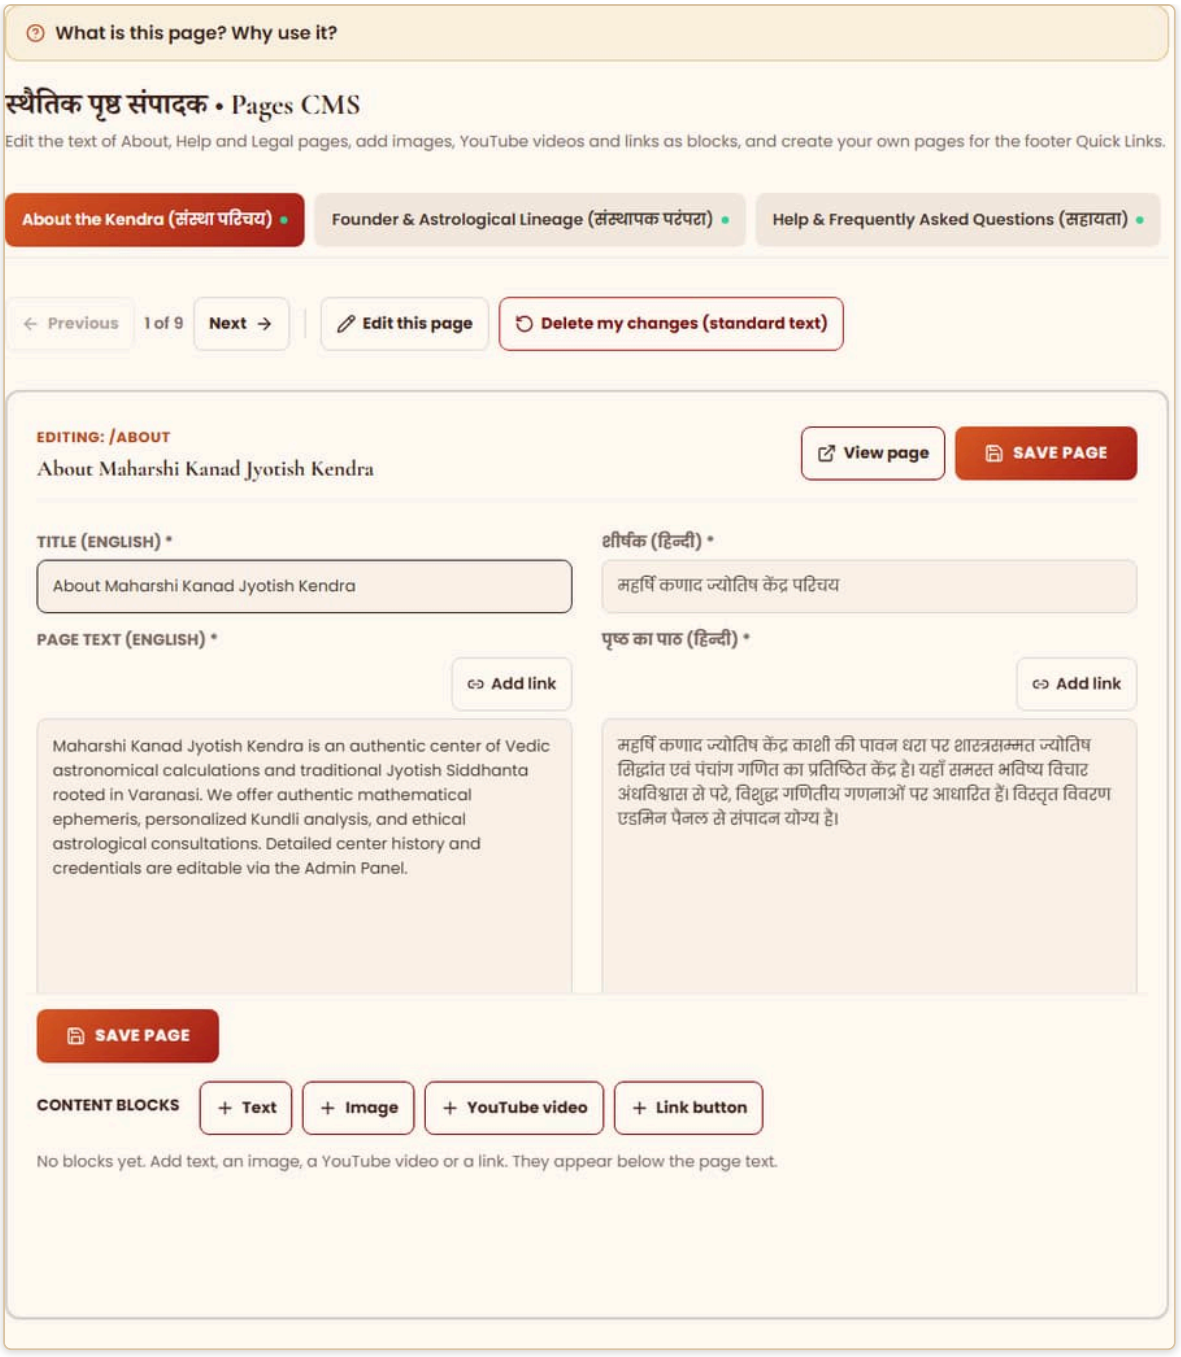

Field	What to enter
Pause the scrolling when the pointer is over it	Stops when the mouse is on it, so it can be read
Let visitors close it	Visitors can close it (×)
ORDER INDEX	The order when there are several notices

Press **SAVE NOTICE**. In the list of active notices each has an **ACTIVE** switch and **Delete announcement**, and 'Open the full form' opens the whole form (colours, size, order).

11.4 Pages & legal

Menu: **Pages & legal**. The site's permanent pages: about, the legal policies and the three guides. The list on the left has **9 ready-made pages**:

- **About the Kendra** · **Founder & Astrological Lineage** · **Help & Frequently Asked Questions**
- **Terms of Service & Astrological Ethics** · **Privacy Policy** · **Cancellation & Refund Policy**
- **Guide: User / Associate / Admin**: this very guide can be read and edited here (see chapter 15).

The page editor: each page's title and text in both languages.

Changing a page

1. Choose the page from the list on the left. Press **Edit this page**.
2. Change **TITLE (ENGLISH) ***, the Hindi title, **PAGE TEXT (ENGLISH) *** and the Hindi page text.
3. In the text use the **Text, Image, YouTube video, Link button** buttons to add pictures, videos and buttons, and **Add link** to put a link on a word.
4. Press **SAVE PAGE**.
5. If you make a mistake, **Delete my changes (standard text)** brings back the original (standard) text.

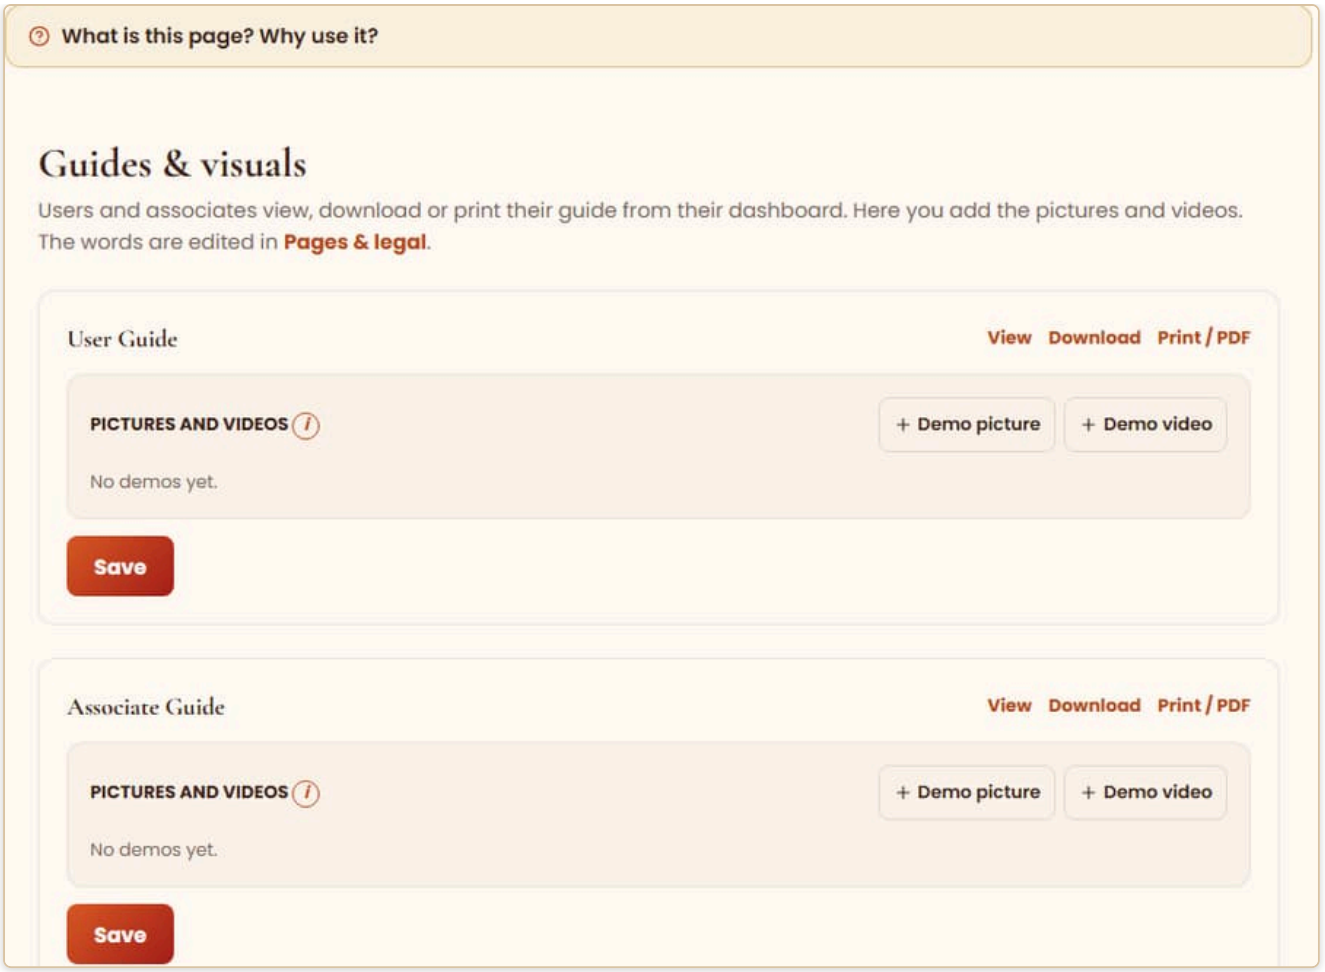

Making a new page

1. Press **New page**.
2. Leave **PAGE ADDRESS *** as it is: it is made from the title (change it if you wish). Fill in the title and text in both languages.
3. **SEARCH ENGINE DESCRIPTION** (optional): two lines for Google.
4. Tick: **Active (page is visible)** · **Show in the top menu (More list and phone menu)** · **Show in footer Quick Links**.
5. Press **SAVE PAGE**.

> **Caution: The Privacy Policy, Terms of Service and Cancellation & Refund Policy are legal pages.** Do not change them without advice from a lawyer or consultant. After every change check the page on the public portal. The customers' cancellation and refund rules are written in this last page.

11.5 Guides & visuals

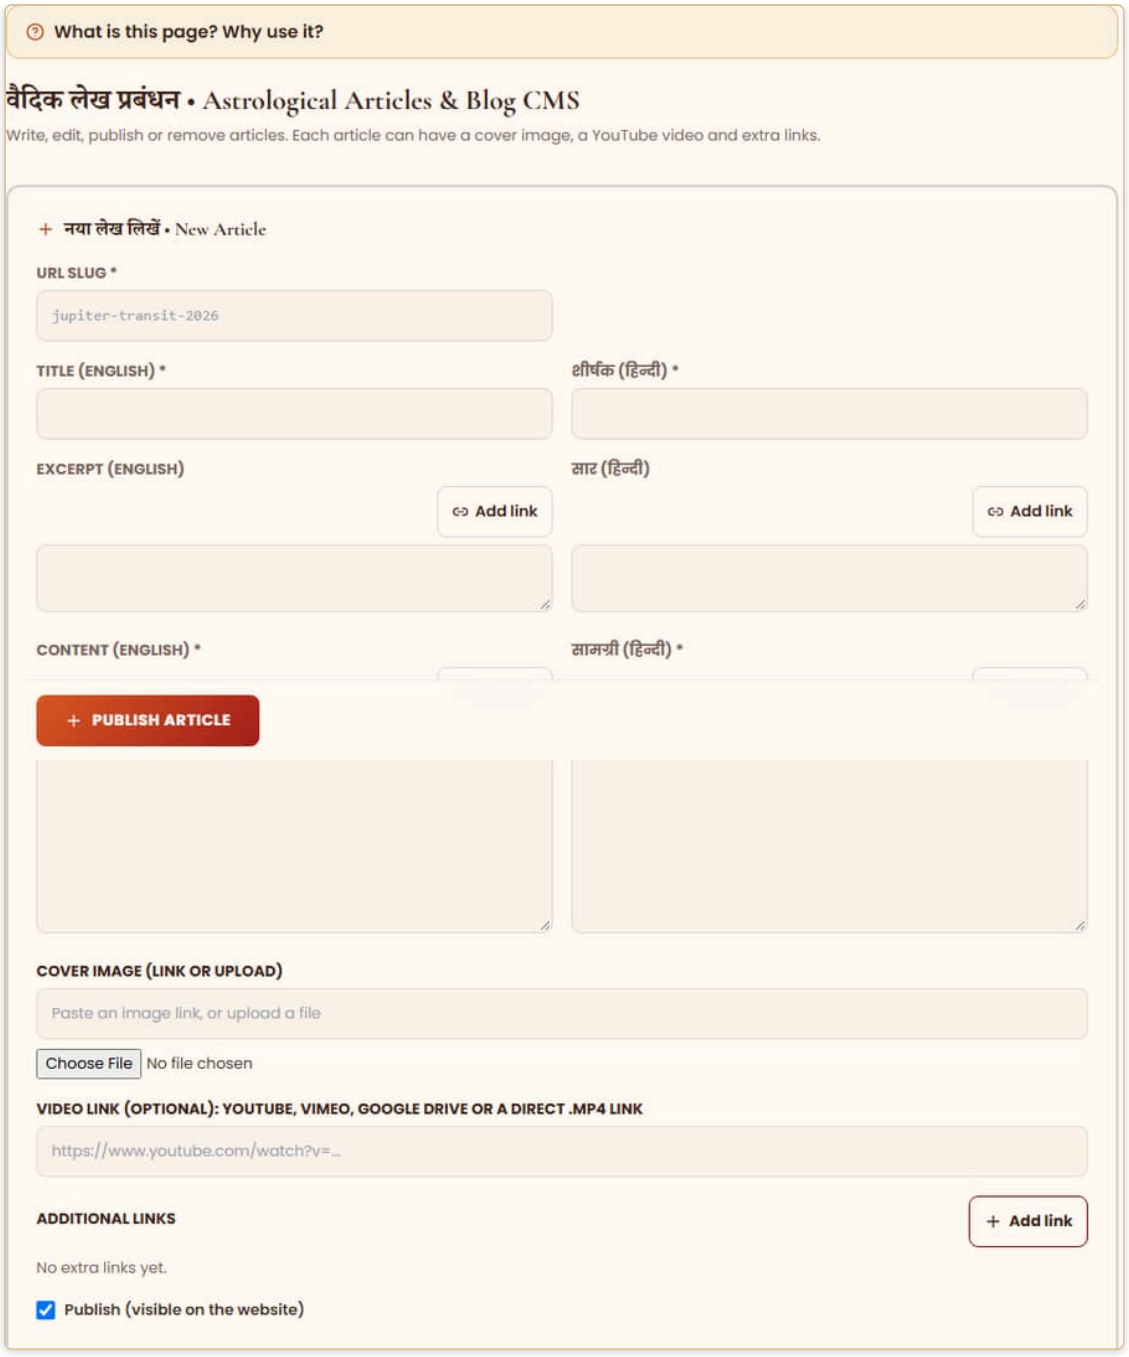

Menu: **Guides & visuals**. The site's three guides: **User Guide**, **Associate Guide** and **Admin Guide**. In each you can add a **Demo picture** and **Demo video**, so people can learn by seeing, not only reading. Then press **Save**. The **text** of these guides is changed in 'Pages & legal'.

Guides & visuals.

11.6 Articles (blog)

Menu: **Articles**. Articles on astrology, which bring visitors from search and build trust.

Articles management: a new article on top, published and draft articles below.

Field	What to enter
URL SLUG *	The article's web address (English, with dashes), such as `jupiter-transit-2026`
TITLE *	The article title in both languages
EXCERPT	A two-line summary (shows in the list)
CONTENT *	The whole article. **Add link** puts links in
COVER IMAGE (LINK OR UPLOAD)	The main picture

Field	What to enter
VIDEO LINK (OPTIONAL)	A YouTube, Vimeo, Google Drive or direct .mp4 link
Publish (visible on the website)	Tick it and the article shows on the site; leave it empty and it stays a **draft**

Press **PUBLISH ARTICLE**. In the list each article has the **PUBLISHED** tag, **Edit article** and **Delete article**.

> **Tip:** To finish an article later, untick 'Publish' and save; tick it when ready.

11.7 Gallery

Menu: **Gallery**. The pictures and videos of the 'Gallery' page.

Field	What to enter
Media Type	**Image / Photograph** · **YouTube Video Embed** · **Direct Video File**
Title * and Caption / Description	Title and description in both languages
IMAGE OR COVER PHOTO *	The picture, or the cover of the video: link or upload
Video / YouTube link (optional)	The video's address
Display Order	The order
Active (shown on the website)	Show / hide

Save with **Save Gallery Item**; each item has **ACTIVE**, **Edit item** and **Delete item**.

11.8 Reviews (testimonials)

Menu: **Reviews**. Customer experiences shown on the home page and the reviews page.

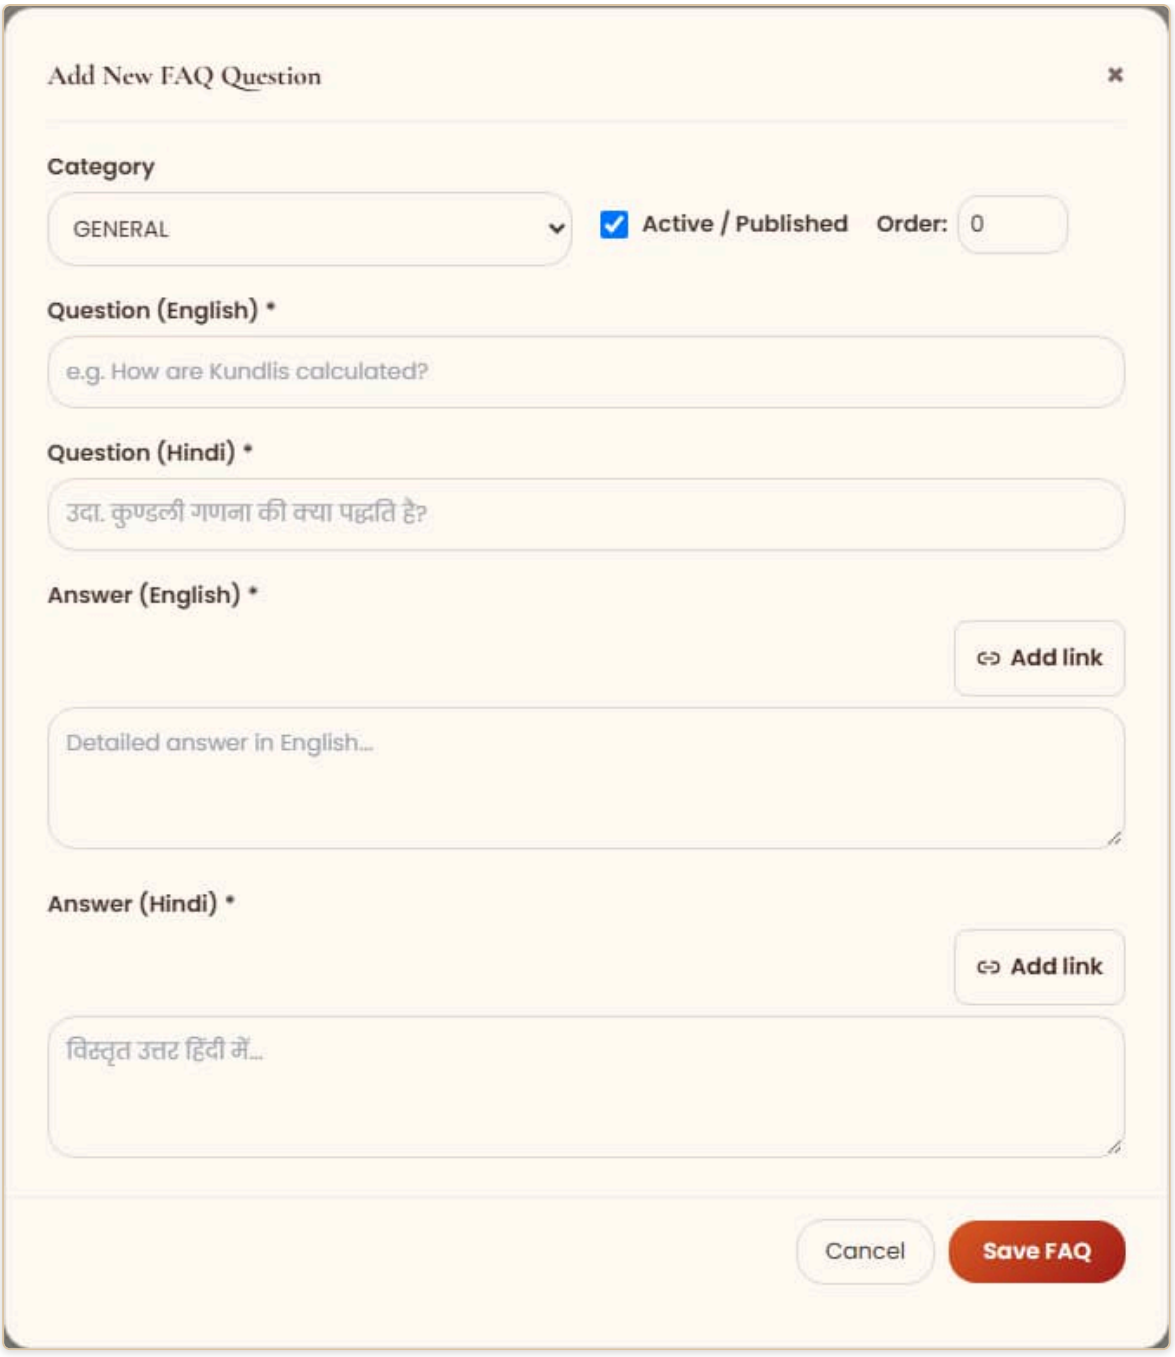

Field	What to enter
CLIENT NAME * (English / Hindi)	The customer's name
STAR RATING (1 - 5)	**5 Stars** ★★★★★ down to **1 Star** ★
TITLE / OCCUPATION * and **CITY / LOCATION ***	Their work and city (for example Lucknow)
FEEDBACK QUOTE *	The customer's words (English/Hindi)

Field	What to enter
CLIENT PHOTO, VIDEO LINK	The customer's photo and video (optional)
Verified client	**Only verified reviews appear on the site.** Tick it only after confirming with the customer
Active	Show / hide

A review tagged 'UNVERIFIED' will show on the site only once you mark it verified.

11.9 FAQ

Menu: **FAQ**. The questions and answers of the site's FAQ page. Category buttons on top: **ALL · GENERAL · KUNDLI · PUJA · PAYMENT**.

The FAQ form.

- Press **Add FAQ Question** → choose a **Category** (GENERAL / KUNDLI / PUJA / PAYMENT) → write the **Question** and **Answer** in English and Hindi → **Order** → **Active / Published** → **Save FAQ**.
- Use the search box ('Search FAQs...') to find an old question and change or delete it.

> **Tip:** Add the questions customers keep asking you by phone. It saves your time on the phone.

11.10 Founder, Team & assistants, Certificates

Founder (Founder Profile & Lineage)

Menu: **Founder**. The founder's introduction: **Founder Name · Designation · Role / Tradition Tagline** (English/Hindi) · **Portrait Photo URL** · **YouTube Video Link (Discourse / Interview)** · **Biography *** (English/Hindi; blocks of Text, Image, YouTube video and Link button can be added) · **Footer Note** (dakshina, code of conduct or disclaimer). Finally **Save Founder Profile Live**.

Team & assistants

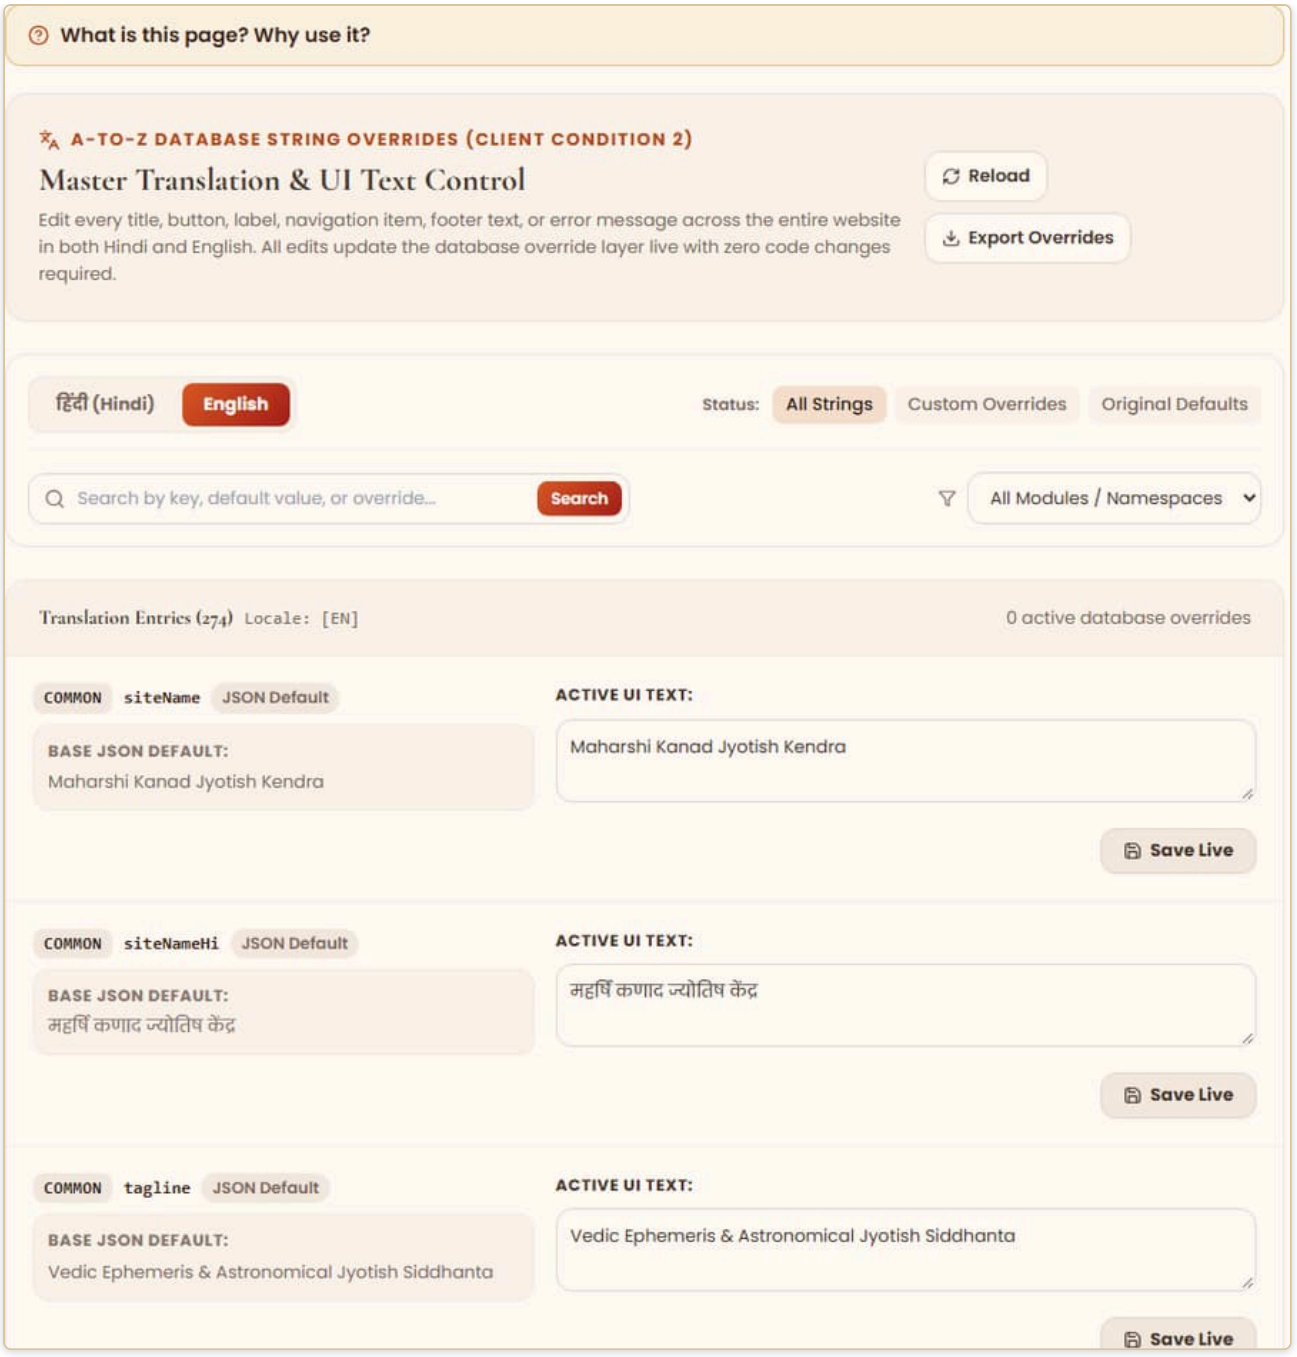

Menu: **Team & assistants**. The team members shown on the site: **NAME · ROLE** (both languages), **ABOUT (optional)**, **ORDER (LOWER SHOWS FIRST)**, **PHOTO (OPTIONAL)** and **Show on the website**. Save with **ADD TEAM MEMBER**.

Certificates (Credentials)

Menu: **Certificates**. The Kendra's registrations and proofs: **TYPE** (**GST registration · MSME / Udyam · Trademark · ISO certification · Other document**), **DOCUMENT NUMBER**, **TITLE**, **SHORT NOTE**, **DOCUMENT FILE ***, **Active (shown on the website)**, **Order**. Save with **ADD DOCUMENT**. Whether a link to these shows in the footer is set under 'Website settings → Features' (section 24).

11.11 Translations: changing any fixed word on the site

Menu: **Translations**. Words already written into the site's buttons, menus and messages (such as 'Book Now') can be **changed in Hindi and English** here.

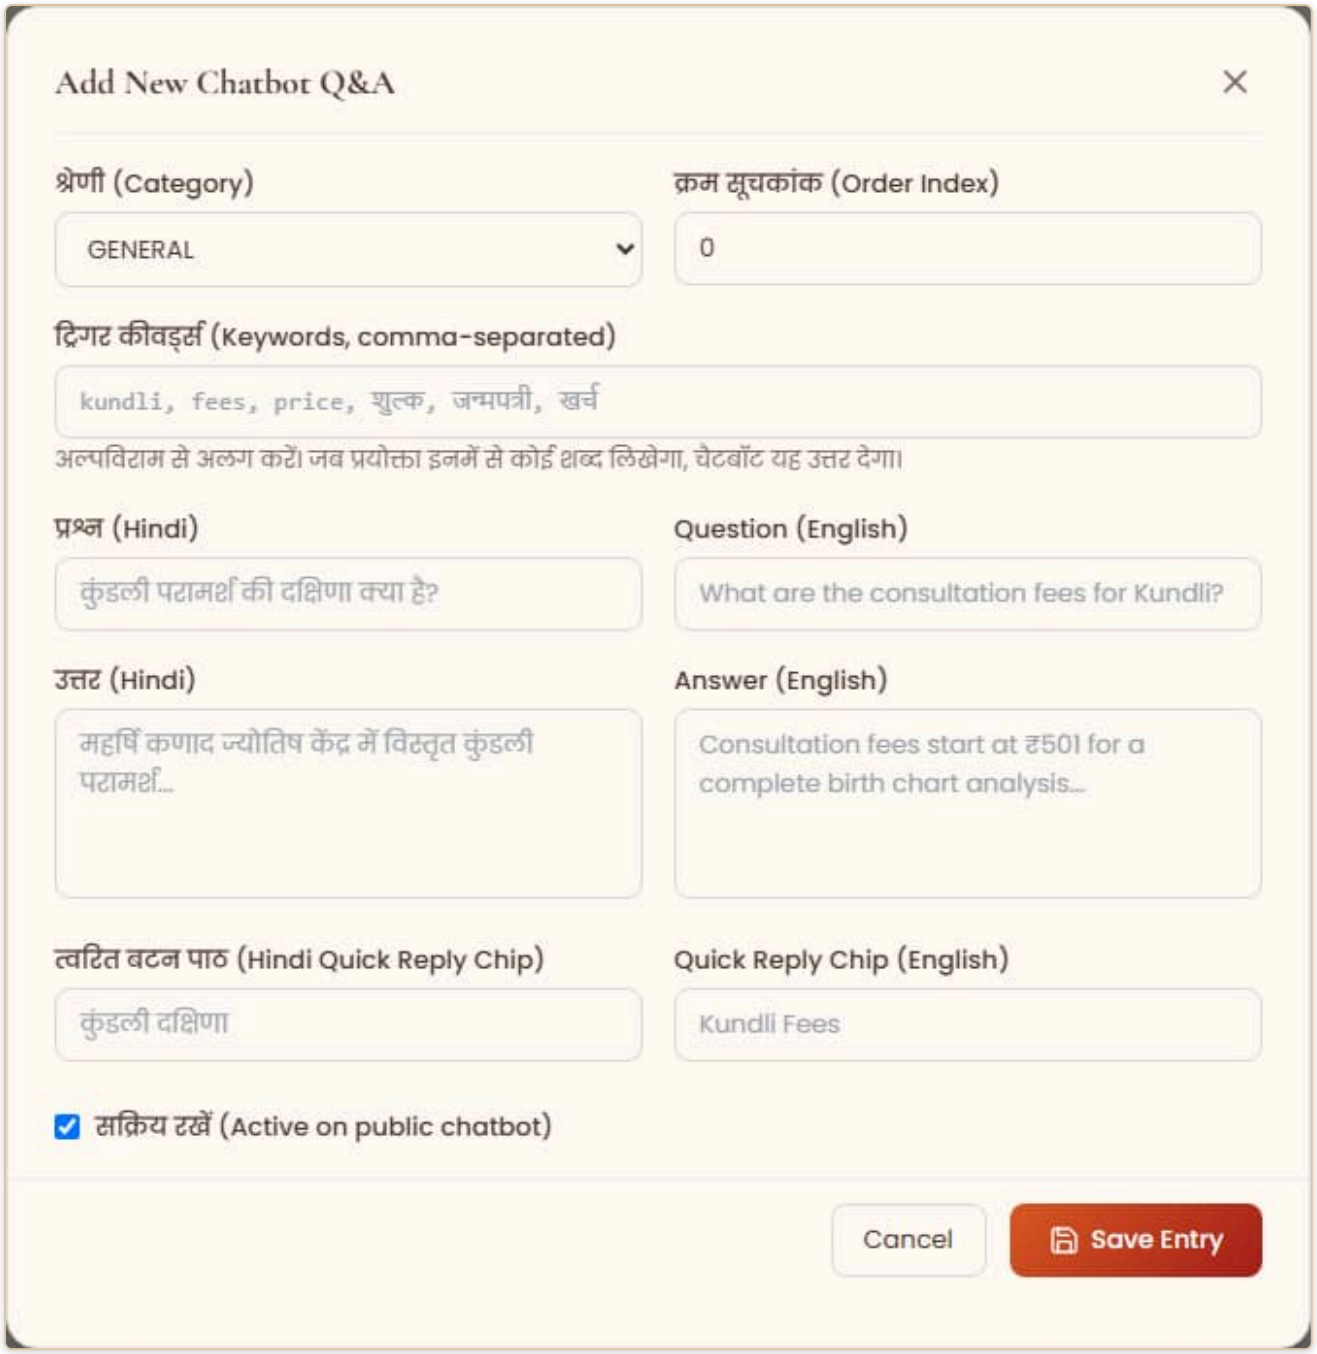

The Translations page.

1. At the top choose **Hindi** or **English**: the language of the word you want to change.
2. From the **All Modules / Namespaces** list choose the part (for example header, footer, booking, checkout). Or type the word's key, original word or your own word in the **Search** box.
3. There are three views: **All Strings** · **Custom Overrides** (the ones you changed) · **Original Defaults**.
4. In the box ('Enter customized text...') type your word.
5. Press **Save Live**: the change shows on the site at once. **Reload** refreshes the list and **Export Overrides** downloads a file of your changed words.

> **Tip:** To return a changed word to its original, empty its box and save.

11.12 Chatbot

Menu: **Chatbot**. The questions the site's chatbot knows and the answers it gives, even when nobody is available.

Add New Chatbot Q&A.

Field	What to enter
Category	GENERAL · SERVICES · PRICING · KUNDLI · MUHURTA · LOCATION · TIMINGS · ASSOCIATE
Order Index	The order in the list

Field	What to enter
Trigger keywords	Words that should bring this answer, **separated by commas**: `kundli, fees, price, शुल्क, जन्मपत्री, खर्च`
Question and **Answer**	The question and its answer in Hindi and English
Quick Reply Chip	The small suggestion button under the answer (Hindi/English)
Active on public chatbot	On / off

At the top use **All Categories** to choose a category, or the search box to find a question, answer or keyword. **ADD Q&A ENTRY** → **Save Entry**.

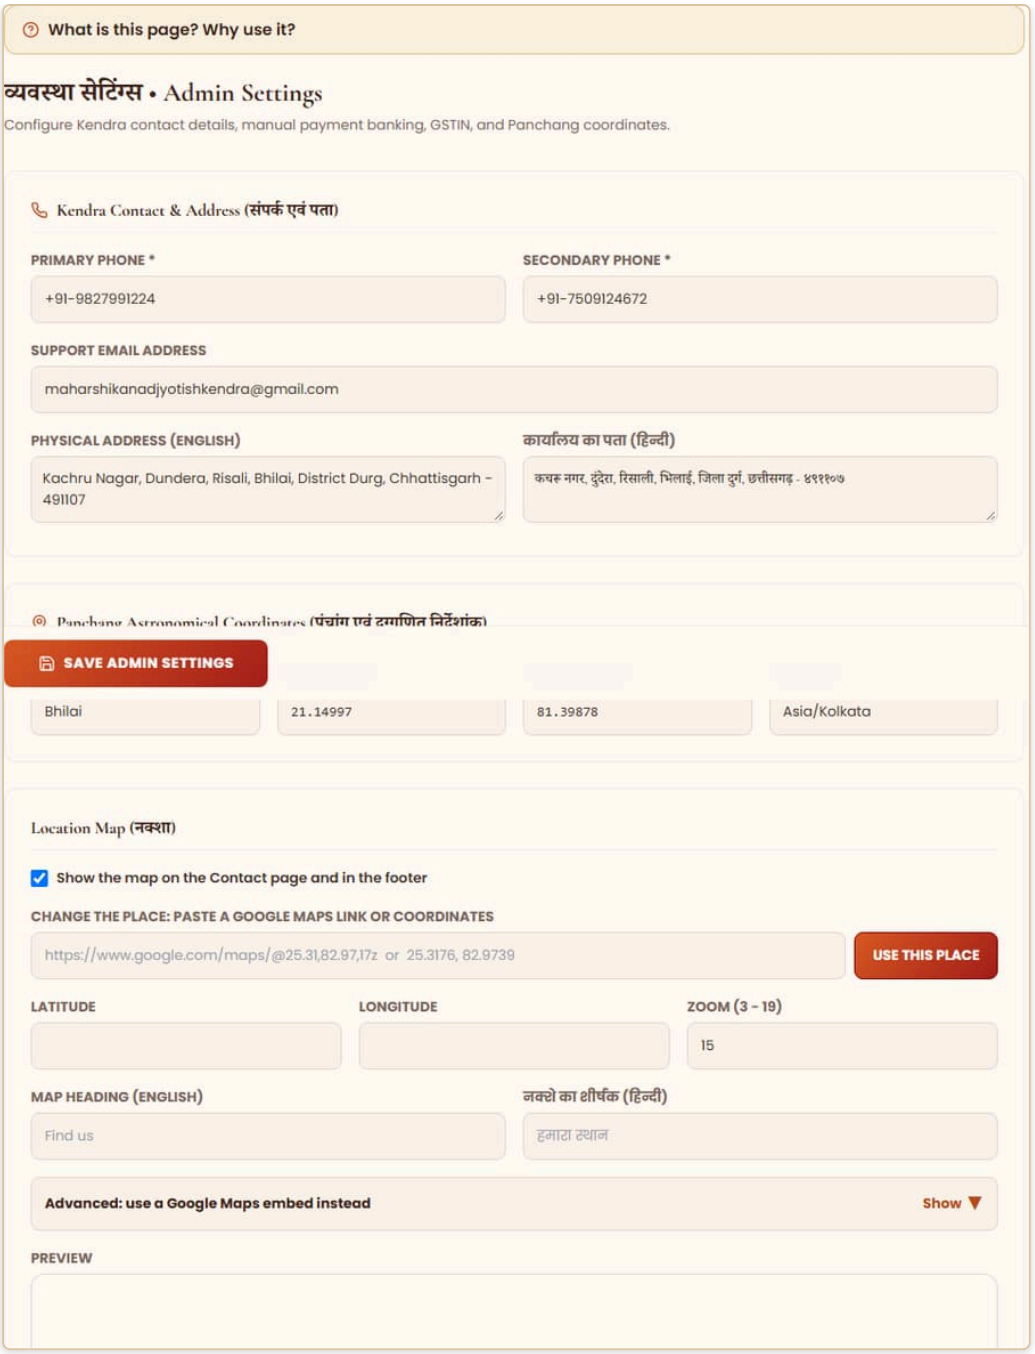

> **Tip:** Write only **true prices and timings** in chatbot answers, and when you change a price remember to change it here too. Otherwise the chatbot keeps quoting the old price.

12 System: Business settings, API keys and backups

The Kendra's basic details, the keys of outside services and the safety of your data. Change these with care.

12.1 Business settings (Admin Settings)

Menu: **System** → **Business settings**. This holds the details that print automatically on **invoices, the contact page, the payment page and the footer**, so they must be correct and current. The page has six blocks and one **SAVE ADMIN SETTINGS** button that saves them all.

Business settings (six blocks).

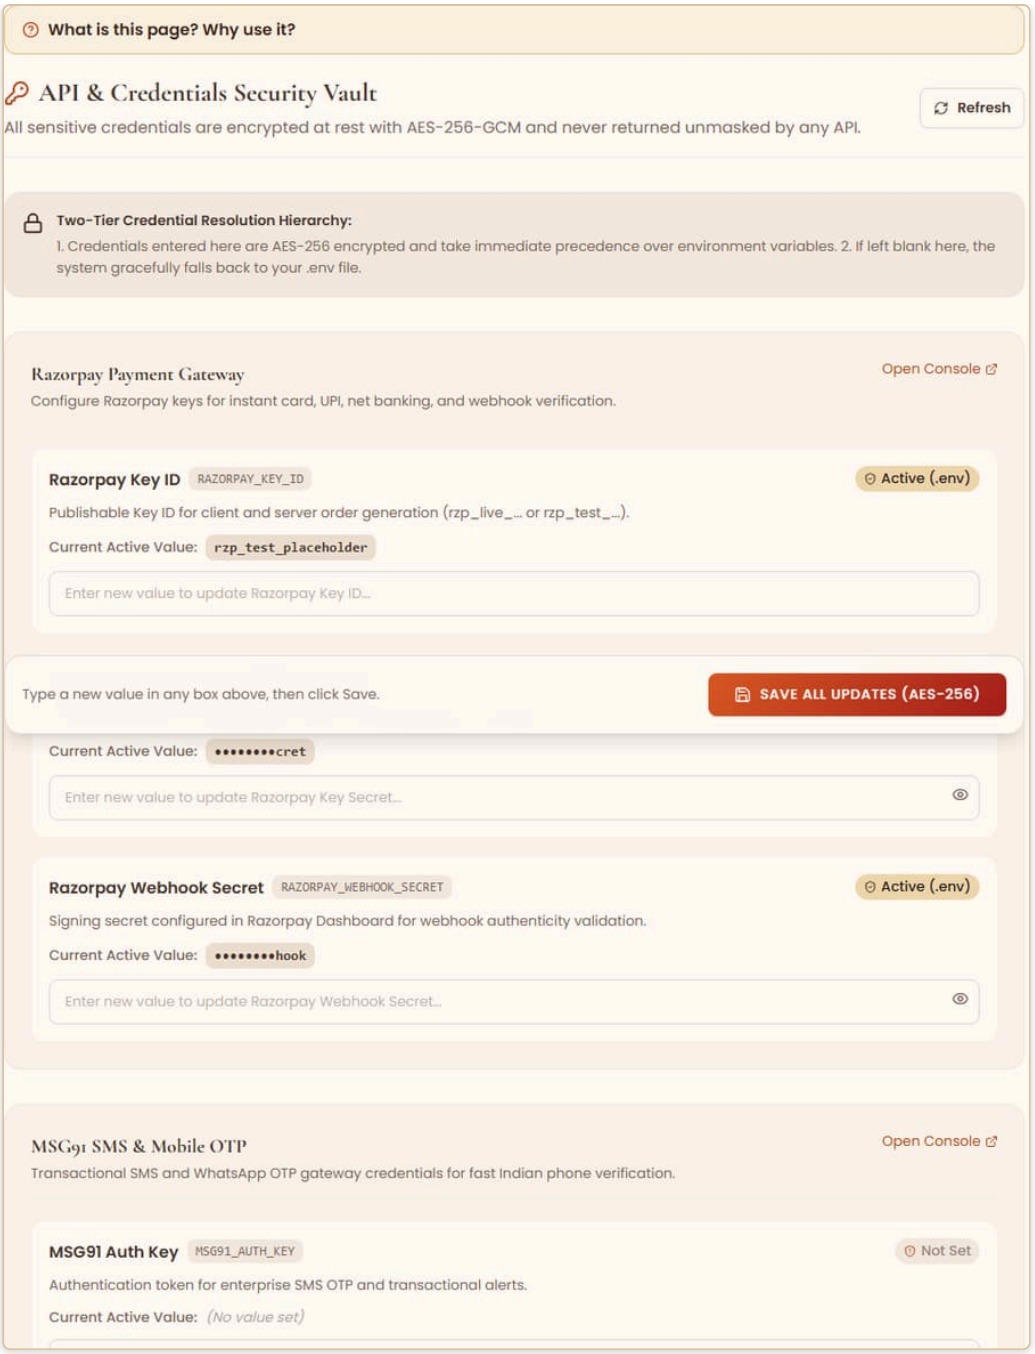

Block	Fields and meaning
Kendra Contact & Address	**PRIMARY PHONE *** and **SECONDARY PHONE *** (the Kendra's two numbers) · **SUPPORT EMAIL ADDRESS** · **PHYSICAL ADDRESS** in English and Hindi. These show in the site header, footer, contact page and invoices
Panchang Astronomical Coordinates	For which place the Panchang is calculated: **EPHEMERIS REFERENCE CITY**, **LATITUDE (°N)**, **LONGITUDE (°E)**, **TIMEZONE** (Asia/Kolkata for India). **A wrong value changes the tithi/muhurat times on the site**, so change it only when needed

Block	Fields and meaning
Location Map	**Show the map on the Contact page and in the footer** (on/off) · **CHANGE THE PLACE**: paste a Google Maps link or coordinates, then press **USE THIS PLACE** · LATITUDE, LONGITUDE · **ZOOM (3 - 19)** · **MAP HEADING** (English/Hindi)
Android App Download	**DOWNLOAD LINK** (a Google Play or APK address)
Manual Payment Options	**KENDRA UPI VPA** · **BANK NAME** · **BENEFICIARY ACCOUNT NAME** · **BANK ACCOUNT NUMBER** · **BANK IFSC CODE** · **QR CODE IMAGE**. Customers see these when paying manually. (The UPI ID and QR can also be changed on the 'Payments & invoices' page: it is the same information)
Taxation & Billing	**KENDRA GSTIN (15 DIGITS)**: printed on invoices · **DEFAULT GST RATE (BASIS POINTS)**: **1800 = 18%**

> **Caution:** A single wrong digit in the **bank account number, IFSC, UPI ID or GSTIN** can send a customer's money to the wrong place or make invoices invalid. After changing them, make a small test payment and check the public portal.

12.2 API keys & Analytics

Menu: **System → API keys & Analytics**. The site does several jobs through outside services (companies): online payment, SMS, e-mail, Panchang calculation and so on. **Each outside service starts working only when its key is saved here.**

API keys & Analytics.

Block	What it is for	If the key is missing
Razorpay Payment Gateway (Key ID, Key Secret, Webhook Secret)	Online payment by card/UPI	Only manual UPI/bank payment works
MSG91 SMS & Mobile OTP (Auth Key, Sender ID, OTP Template ID)	Mobile OTP sign-in and SMS	Mobile OTP sign-in will not work
SMTP Email Delivery (Host, Port, User, Password, From)	Password-reset and confirmation e-mails	E-mails will not be sent

Block	What it is for	If the key is missing
OAuth Social Authentication (Google Client ID/Secret, Facebook App ID/Secret)	Sign-in with 'Continue with Google'	That button will not work
AstroSage Planetary Ephemeris (User ID, API Key)	Outside Kundli/Panchang calculation	Some Panchang tools stay limited
Google Analytics 4 (Measurement ID)	How many people visit the site and from where	No statistics
Google Maps Embed (Embed URL)	The map on the contact page	The map will not show
WhatsApp Business (Access Token, Phone Number ID, Verify Token, App Secret)	The 'WhatsApp chats' page and automatic messages	The WhatsApp chats page stays empty

How to change a key

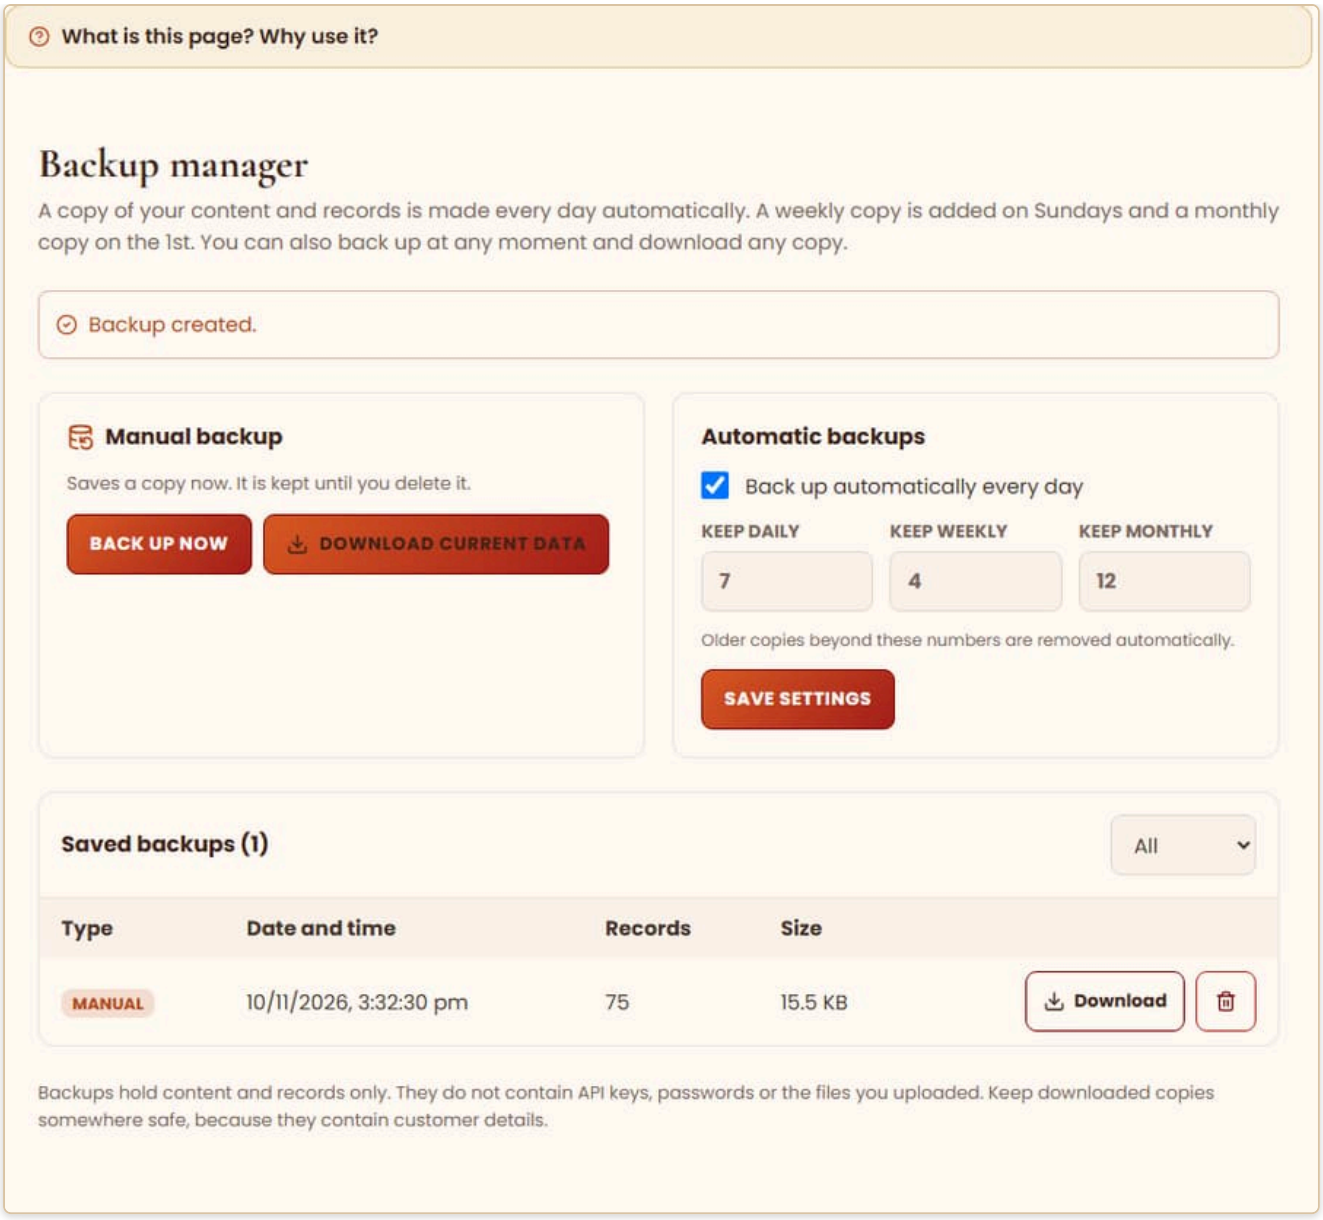

1. Beside a box the **eye symbol (Toggle secret visibility)** shows or hides the key. For safety saved keys are never shown in full.
2. To change one, paste the new key into the box ('Enter new value to change...'). **Leave it empty and the old key stays as it is.**
3. Press **SAVE ALL UPDATES (AES-256)** at the bottom. Use **Refresh** to reload the page.

> **Note:** Keys are stored **encrypted** (AES-256). They are **not in backups**, and nobody can read them back in full. So keep your own copy of your keys (from the Razorpay dashboard, Meta and so on).

> **Caution: Never send keys by e-mail or chat**, above all the Razorpay **Key Secret**. If a key reaches the wrong hands, change it at once on that service's dashboard and save the new one here.

12.3 Backups

Menu: **System** → **Backups**. This makes a safe copy of all your **records and content** (services, orders, customers, pages and so on). If anyone deletes something by mistake or the data goes wrong, this is your safety net.

The Backup manager: manual backup, automatic-backup settings and saved copies.

Three kinds of copies

Kind	When it is made
Daily	Every day by itself, if 'Back up automatically every day' is on
Weekly	Every Sunday by itself
Monthly	On the 1st of every month by itself
Manual	Whenever you press **BACK UP NOW** (do this just before any big change)

The controls on the page

- **BACK UP NOW:** makes a new copy straight away.

- **Download current data:** downloads the present data to your computer at once.
- **Automatic backups:** the **Back up automatically every day** switch, and **KEEP DAILY / KEEP WEEKLY / KEEP MONTHLY**: how many old copies of each kind to keep. Older ones are deleted automatically. Then **SAVE SETTINGS**.
- **Saved backups:** columns **Type · Date and time · Records · Size**. Use the filter at the top (All / Manual / Daily / Weekly / Monthly). Each copy has **Download** and **Delete**.

Caution: What a backup does not contain: API keys, passwords and **the files you uploaded** (logo, pictures, videos, Kundli PDFs, receipts). So keep a separate copy of the pictures and PDFs on your computer or drive.

Caution: A downloaded backup file holds customers' private details (names, phones, birth details). Keep it in a safe place, do not send it to anyone, and delete old copies when you no longer need them.

Note: Restoring data from a backup is not done from the panel; the developer does it. So **download a backup every week** and keep it somewhere other than this computer (such as Google Drive or a pen drive).

13 Daily work: checklists and complete procedures

In a hurry? Look here: every big job, step by step.

13.1 Daily checklists

Morning (10 minutes)

- Open the **Dashboard**: look at today's orders, pending Kundlis and today's calls.
- **Orders → AWAITING VERIFICATION:** if the money has reached the bank, approve the payments. (3.5)
- **KUNDLI & PRASHNA QUEUE:** move new orders to 'KUNDLI IN PROGRESS'.
- **Call bookings:** see whom you must speak to today.
- **Enquiries** and **Support tickets:** answer the new ones.

Evening (10 minutes)

- Upload finished Kundlis in **Customer files** and move the order to 'KUNDLI COMPLETE'.
- Mark orders whose pothi was sent as 'DISPATCHED' (with the courier number).
- In **Enquiries** leave nobody at 'New'; if you have contacted them, change the status.
- Sign out.

Every week

- Download a **backup** and keep it safe.
- Look at the **IN PROGRESS** filter and push forward orders stuck for days.
- Look at **Associates → Payout requests**.

Every month

- On the 1st to 5th download the **GST report** and give it to the accountant.
- Check last month's offers' 'SAVINGS': which offer worked.
- Pay associates' commission and press 'Mark paid'.

13.2 Starting a new service

See chapter **5.6**: service → package → plan → offer, then check on the public portal.

13.3 Running a festival or sale offer (for example Diwali)

1. In **4. Offers** choose the plan and **create the offer**: code (for example DIWALI10), discount, **end date**, usage limit. Tick 'Show this offer next to its plans in booking' and 'Show this offer in the pop-up...'.
2. In **Website settings** → **Offers pop-up** switch the pop-up on and write the heading and message.
3. In **Scrolling notice** add an announcement: 'Diwali 10% off: code DIWALI10'.
4. If you like, add a **banner** or a **home hero slide**.
5. Open the **public portal** and check the pop-up, the notice, and the code in booking.
6. **After the festival: Deactivate** the offer, switch off the notice and slide (do not delete them; they will be useful next time).

13.4 Taking a Kundli from ready to the customer

1. On the Orders page move the order to **KUNDLI IN PROGRESS** (note: 'calculation started').
2. When the Kundli is ready: **Customer files** → choose the customer and order → titles → PDF (up to 4 MB) → **UPLOAD TO VAULT**.
3. Move the order to **KUNDLI COMPLETE** (note: 'PDF uploaded to the vault'). The customer will see the PDF in their account.
4. For a printed pothi: **DISPATCHED** with courier and tracking number; **DELIVERED** on arrival; finally **EXECUTION COMPLETE**.

13.5 Accepting a manual (UPI/bank) payment

Orders → **AWAITING VERIFICATION** → open the order → look at the receipt and reference → check in the bank → **Approve** or **Reject** (with a reason). See chapter 3.5.

13.6 Giving a refund

Open the **order** → **Cancel order & mark refunded** (write the reason) → send the money from your bank → for an order the customer cancelled, write the UTR with **Refund sent — record it**. See chapter 3.7.

13.7 Opening your availability for calls

Appointment slots → dates, weekdays, time and minutes → **ADD SLOTS**. **Switch off** the slots of holidays. See chapter 6.2.

13.8 Adding a new associate and setting commission

1. The person first **registers as an associate**, or on **Users** you press **MAKE ASSOCIATE** by their name.
2. On **Associates** press **APPROVE** (if automatic approval is off).
3. In the **Commission rules** tab make a rule (general, for a service or for a plan). **Without a rule there is no commission.**
4. Give the associate their **referral code/link**. Every confirmed booking will add their commission automatically.

13.9 Changing a plan's price

3. Plans → choose service and package → **Edit Plan** on the plan → change the **price (rupees)** → **SAVE PLAN**. Old orders do not change. If the **chatbot** quotes the price, change it there too.

13.10 Changing the logo, colours and browser icon

Website settings → **Logo** (logo and browser icon) and **Colours of the website**. After the change press Ctrl+F5 and look at the home page, one service page and a mobile.

13.11 Publishing a new article (blog)

Articles → URL SLUG, title, excerpt, content (both languages), cover picture → tick **Publish** → **PUBLISH ARTICLE**. Then look for it in 'Vedic articles' on the public portal.

13.12 Staying safe before a big change

1. **Backups** → **BACK UP NOW**.
2. If needed switch on **maintenance mode**.
3. Make the change and check it.
4. Switch maintenance mode off.

14 Troubleshooting, safety and glossary

If something looks wrong, do not panic: this table answers most questions.

14.1 Common problems and their fixes

Problem	Likely cause	What to do
A change does not show on the site	Save was not pressed, or the browser shows an old page, or the page is a moment behind	Check that you pressed Save, then press **Ctrl+F5**. After saving in the panel pages refresh at once; sometimes it can take up to 1 minute
A service or plan does not show on the site	The service/package/plan is 'Deactivated', or the package's seats are full	Check 'active' on all three and look at the package's **SEATS** number
An offer code does not work	The date has passed, usage limit reached, order below the minimum, offer is not for that plan, the customer already used it, or it is deactivated	Look at the offer's row: dates, 'USAGE', **MIN ORDER VALUE**, plan selection, **USES PER CUSTOMER**, active
A customer says 'money was deducted but no order was made'	A hiccup in the payment gateway or network	Look at the payment in the **Razorpay dashboard**. For a manual payment look at **AWAITING VERIFICATION**. If it is not resolved give the developer the order/payment number
A customer cannot see the Kundli PDF	The PDF went to the wrong customer's account, or did not upload	In **Customer files** look in the list: check the right customer's name and the title. If the file is over 4 MB, shrink it and upload again
An upload fails (picture/video/PDF)	The file is too big or the wrong type	Use **JPG, PNG or WEBP** pictures and **PDF** documents. Pictures/PDFs may be up to 10 MB (Kundli vault PDF: 4 MB). **Videos** have a separate limit: for a very big video put it on YouTube and paste the **link**

Problem	Likely cause	What to do
E-mail or OTP is not arriving	The SMTP/MSG91 keys are empty or wrong	Check the keys of the relevant block in **API keys & Analytics** (12.2)
The Panchang/tithi time looks wrong	Coordinates or time zone are wrong	In **Business settings → Panchang Astronomical Coordinates** check Asia/Kolkata and the latitude and longitude
An 'Invalid status transition' error when changing status	You are skipping a stage or going back	Orders move in order only (3.4). Choose the next stage
A setting went wrong and you want to undo it	—	**Empty** the box and save: the default returns. For a page use **Delete my changes (standard text)**. For translations empty the box
The whole site suddenly does not open	A hosting/database problem	Tell the developer at once. (This is not something the panel can fix)

14.2 Safety rules

- Only you should know your **password**. Do not share it, write it on paper or in a chat, and change it from time to time.
- If you sign in on a public computer or someone else's, always **Log out** afterwards.
- Never send **API keys**, bank details or customers' information by e-mail or WhatsApp.
- Keep **downloaded backups** in a safe place and delete spare copies.
- When a new assistant joins, give them only the work they need. Do not hand over the admin password. Separate **associate/user** accounts are enough.
- Do not trust suspicious e-mails/messages (such as 'send your password'). Nobody from our side will ever ask for your password.

14.3 Glossary: words you meet in the panel

Word	Meaning
Order	One booking by a customer
Jataka	The person the Kundli or consultation is for (the person ordering and the Jataka can be different people)

Word	Meaning
ORDER RECEIVED	Order arrived; the work is to begin
KUNDLI IN PROGRESS	The Kundli/consultation is being prepared
KUNDLI COMPLETE	The Kundli is ready
DISPATCHED / DELIVERED	Sent / reached the customer
EXECUTION COMPLETE	All work finished, the order is closed
PAID	Payment received
AWAITING VERIFICATION	A manual payment has come but you have not checked it yet
REFUNDED	A refund has been recorded. (Refund status: **requested** = the customer asked, **sent** = you sent it, **credited** = the earlier payment was adjusted in an upgrade)
UTR / reference number	The identification number of a bank/UPI transaction
GSTIN	The Kendra's 15-character GST registration number
Taxable	The amount on which GST is charged (after discount)
CGST / SGST	The two equal halves of GST (central and state)
Slug (URL KEY)	The short English name that forms part of a service's, page's or article's web address
Vault	The customer's private safe where their Kundli PDF is kept
Associate / referral code	A partner who brings customers / the partner's own code
Audit Trail	The permanent history of every change in an order
Deactivate	Hide it from the site but keep the record (better than removing)

14.4 Jobs that need the developer

The following are not in the admin panel. Contact the developer or the hosting support:

- **Domain, hosting and database** (Hostinger/Supabase): renewals, changing passwords.
- **Restoring data from a backup** and keeping a copy of the uploaded files.
- Creating a **new Super Admin**, or when the admin password is forgotten.
- **Secret server settings** (secret keys, environment variables) and **security updates** of the site's software.

- **Daily automatic jobs** (closing unpaid expired orders, automatic backups) which are scheduled on the server.
- The first-time connection of services such as **Razorpay / WhatsApp** (creating the account and webhook).

> **Tip:** When you tell the developer about a problem, send the **order number, date and time** and a **screenshot** of the screen. It gets solved faster.

15 Reading, downloading and editing this guide inside the admin panel

The guide lives in the panel itself. You never need to hunt for a file.

15.1 Where to read it

- **Dashboard → Quick actions → Admin guide (view, download).** In the list of three guides press **View** beside the **Admin Guide**.
- Or open `/guides/admin` while signed in as admin. The guide is visible **only to signed-in administrators**.
- It opens in the language you are using on the site. Use the **हिन्दी / EN** buttons to switch.

15.2 How to download it

Button on the guide page	What you get
Download the illustrated PDF (English) and **(हिन्दी)**	The full guide with screenshots, as a PDF you can save, print or e-mail. Fixed as of the version issued with the site
Print / Save as PDF	Prints the **current text** of the guide, including any edits you have made. Choose 'Save as PDF' in the print window to get a file
Download (on the Guides & visuals page)	A single web-page file of the current text that opens in any browser, even without internet

> **Note:** The illustrated PDF shows screens as they were when it was issued and does not change when you edit the guide. The other two downloads always reflect your latest edits.

15.3 How to edit it

1. Open **Website → Pages & legal** and choose **Guide: Admin** from the list. Press **Edit this page**.
2. Change the text under **PAGE TEXT (ENGLISH)** and the Hindi page text. You can write a new section, add a note about your own way of working, or correct a step.
3. Press **SAVE PAGE**. Open `/guides/admin` to see the result.
4. If you want the original text back, press **Delete my changes (standard text)**.

How to format the text

- A new **numbered section** starts with a number, a dot and a title at the beginning of a paragraph (the first line reads, for example, '3. Orders'). It becomes a heading and an entry in the contents list.
- Leave a **blank line** between paragraphs. A single line break inside a paragraph is kept.
- To make words **bold**, put two stars on each side of them.
- To make a link, put the words in square brackets and the web address straight after them in round brackets. Links to pages of the site can use a short address that starts with a slash, such as /admin/orders.
- Pictures and videos are added separately under **Website → Guides & visuals → Admin Guide**.

> **Tip:** To keep a note for your own staff (for example 'our courier is India Post; always enter the 13-character tracking number'), add it as a new numbered section at the end of the guide.

> **Caution:** The guide lists **steps for running the panel**. Never write passwords, API keys or bank details into it.
